# PIA School Philosophy

PIA is committed to the pursuit of postsecondary education that is both meaningful to the individual and valuable to society. The Institute believes that it serves the dual functions of providing its learners with opportunities, while furnishing the community with its most valuable resources, skilled men and women who possess the willingness to learn and the propensity to mature as contributing members of society.

To accomplish its objectives, PIA believes that school programs must: (a) develop specific career-related skills, (b) broaden abilities in essential academic areas, and (c) form attitudinal traits compatible with career goals. In order to be effective, these studies must be dispensed through an appropriate collection of instructional techniques, each designed to best achieve its specific objective(s).

In reaching these goals, PIA accomplishes its purpose as a provider of career opportunities and fulfills its role as an institution of higher education.

## School History

The school was founded as the Curtiss-Wright Flying Service in 1927, and became PIA in 1929. From 1929 until 1944, PIA trained airframe and engine mechanics for the aviation industry. In 1944, William J. Graham purchased the school and incorporated Graham Aviation as a division of PIA. An aviation electronics (avionics) course was added to the curriculum in 1979, giving students a choice of training for certification as Aviation Maintenance Technicians (AMT) or Aviation Electronics Technicians (AET). Since 1929, PIA and the Graham Aviation Division have graduated more than 37,000 and 33,000 students, respectively. PIA graduates have been placed in careers throughout every segment of the aviation industry, including commercial air carriers, aircraft manufacturers and general aviation companies. The PIA Main Campus, located on the Allegheny County Airport since 1946, is situated 8 miles southeast of downtown Pittsburgh.

## Reorganization of PIA

On December 1, 1944, Mr. William J. Graham, President of the Graham Aviation Company and pioneer in aviation training, purchased PIA. Mr. Graham became president of the school and under his direction, the existing for-profit corporation was dissolved and the school was reorganized as a nonprofit corporation chartered in the Commonwealth of Pennsylvania on February 8, 1946. Mr. Graham's early administrative reorganization plans included the 1944 appointment of Dr. T.B. Lyons to the position of Director.

In May 1946, the school established its advanced phase of training for aircraft mechanics in new shops opened at the Allegheny County Airport. These facilities replaced those that were discontinued when the Bettis Airport location was no longer available. It was decided that the school should move its base of operation from its downtown location to the Allegheny County Airport.

A long range plan was developed by the officers of the school which led to the establishment of a fully accredited institute. Even more important, however, were the efforts to have the school develop a curriculum tailored to the industry it served. During the years between 1956 and 1971, the Institute played a major role in efforts to upgrade aviation technical education in the United States. A mechanic training program was conducted at PIA by the Federal Aviation Administration (FAA) where representatives of the FAA monitored a class of students through the entire program, on a monthly basis. Their findings were used for the updating of the FAA curriculum requirements for all approved schools. In 1967 PIA was acquired by Mr. Jack Graham who became active in the management of PIA as President, CEO, and Chairman of the Board.

In 2005, John Graham III began his tenure as PIA's President. In 2008, John Graham II retired and John Graham III assumed the position of CEO, and Chairman of the Board as well.

Graduates of PIA School of Specialized Technology have been placed with airlines, electronics manufacturers, mechanical repair facilities, the space program, and a host of other industries. Many have become managers and administrative officers for those same corporations. In addition, many of the school's alumni number themselves among the higher echelons of the electronics industry, the transportation industry, and their related technologies. PIA is recognized by the industries that it serves as a preeminent institution of education.

The Hagerstown, MD Campus was opened in April 2011. Working in conjunction with the Hagerstown Airport Authority, PIA instituted an aviation maintenance technician school at the Hagerstown Regional Airport to serve the workforce needs of the Western Maryland area.

## Separate Facilities

In addition to Hagerstown, MD, PIA currently operates the following campuses:

***Pittsburgh  
Main Campus***

5 Allegheny County Airport  
West Mifflin, PA 15122

***Myrtle Beach  
Branch Campus***

1038 Shine Avenue  
Myrtle Beach, SC 29577

***Youngstown-Warren  
Branch Campus***

1453 Youngstown-Kingsville Rd NE  
Vienna, OH 44473

## Location and Facilities

### Location

PIA's Hagerstown Campus physical address for use with GPS is 14516 Pennsylvania Avenue, Hagerstown, MD 21742.

The campus is located on the Hagerstown Regional Airport, east off Exit 10 of Interstate 81. Exit 10 is approximately five miles north of the intersection of I-81 and I-70. This easily accessible location is within a short drive of the Pennsylvania and West Virginia borders, as well as main arteries leading to western and eastern Maryland. The airport facility provides an ideal environment for aviation maintenance training.

The total area of the school is approximately 18,000 square feet. In addition to classrooms and shop areas, the campus houses a learning resource center, a break area with vending machines, and administrative offices. Ample free parking is available adjacent to the school's building.

### Training Equipment

As an FAA-approved Aviation Maintenance Technician school, PIA's Hagerstown Campus includes all of the equipment needed to satisfy 14 CFR, Part 147 training requirements, including engine, accessory, aircraft, and electrical components. The tool rooms contain the necessary precision and specialized tools, such as micrometers, dial calipers, torque wrenches, etc., needed by the student in order to perform work on aircraft, engine, and electrical equipment.

## Minimum Requirements

Applicants must fulfill these minimum requirements to commence training at PIA's Hagerstown Campus:

- Possess a High School Diploma or GED Equivalency
- Be at least 17 years of age

Due to Federal Aviation Administration (FAA) regulations and graduate employment requirements, applicants must be at least 17 years old before they can commence training.

## Suggested Courses

Applicants interested in pursuing the Aviation Maintenance Technology program are recommended to have successfully completed the following high school courses:

- Algebra I
- Basic Physics

The aforementioned courses are not required for admission. However, they provide a solid foundation for the Aviation Maintenance Technology program.

## Application and Admission Procedures

Applicants for admission to PIA's School of Specialized Technology are required to visit the school for a personal interview and a tour of the school's facilities prior to beginning classes. The tour and personal interview are conducted by a qualified Admissions Representative and are intended to give the prospective student an understanding of the following:

- AMT Program
- Instruction Methods
- PIA's Learning Environment
- Program Goals and Outcomes
- Admission Policies
- Program Availability
- Academic Assistance
- Graduate Placement Statistics

Tours are generally conducted Monday through Friday between 8:00 am and 4:00 pm, by appointment. Tours can be arranged for either individuals or small groups by calling the Admissions Department at 1-800-444-1440. Visitors are encouraged to ask questions, so that they can make informed decisions concerning the career fields presented, costs, and methods of payment (for info on Financial Assistance, see page 17).

In order to apply for entrance to PIA's Hagerstown campus, the prospective student must receive a current school catalog and submit a complete admission application form and \$150 registration fee. Applicants who are still attending high school may be conditionally accepted, pending graduation from high school. Applicants who possess a high school diploma or GED certificate may be conditionally accepted, pending proof of high school graduation or equivalency. Acceptable proof of high school graduation is an official final transcript. If it is not possible to secure the transcript, PIA may, at its discretion, accept a letter from the appropriate high school principal, or a PIA official may photocopy the applicant's original high school diploma. Applicants with a GED certificate may have a PIA official photocopy their original GED certificate. All applicants must also complete a Math Skills Assessment (unless waived by the Director) as part of the enrollment process.

Accepted and conditionally accepted students will receive an enrollment packet which includes an enrollment agreement, disclosure statement, letter of acceptance or conditional acceptance and contact info form.

Due to strict industry regulations pertaining to criminal convictions, the school reserves the right to reevaluate a student for admission to the program if he/she has disclosed the presence of a criminal background on the enrollment agreement. In such instances, a meeting with the student will be held by the Campus Director or Director of Compliance and Career Services to determine if such a background would prevent or seriously hinder the student from benefiting from the educational programs offered by the school.

If an applicant pays the registration fee, but is not accepted into the program selected, the registration fee will be refunded in its entirety. Refer to "Refund Policies" on page 15 of this catalog for applicable registration refund possibilities.

## **Math Skills Assessment**

Unless waived by the Campus Director, the Mathematics Skills Assessment (MSA) must be taken by all applicants prior to admission to PIA's Hagerstown Campus. Its purpose is to determine the math abilities of the prospective student, allowing the Campus Director to determine if the applicant possesses the skills required for success in his/her chosen program of study, or if some form of preparatory/transitional training is needed. The results of this examination cannot predict student success with 100% accuracy, however, it does give the faculty guidance in addressing student needs.

## **Registration Expiration**

In the event an applicant cannot begin his/her studies on the starting date of the class for which he/she is registered, credit will be granted for the registration fee toward the next two class start dates. After that period, the registration will be considered "expired" and the applicant must pay a new registration fee for any future classes.

## **Student Health Coverage**

PIA does not provide health insurance coverage for its students. However, PIA recommends and expects each student to secure health insurance coverage through an appropriate provider. Please review the "Injury or Illness" section for additional information on page 41.

## Students with Disabilities

Pittsburgh Institute of Aeronautics is committed to providing a support system that partners with students to be successful in their academic pursuits, regardless of the challenges they face. As such, and in cooperation with students, PIA is dedicated to providing appropriate services and accommodations to students with documented Disabilities, in compliance with Section 504 of the Rehabilitation Act of 1973, the Americans with disabilities Act, and other applicable regulations. As a primary initial responsibility, students with disabilities who desire accommodations at PIA must make that request and provide required documentation of any disability to appropriate staff as soon as possible, and preferably before the start of the first semester/quarter of attendance. We call this step “self-identification,” and no further steps in providing accommodations can occur until the student takes this first step. Requests for accommodations and documentation of any disability should be provided to: Director, Pittsburgh Institute of Aeronautics, P.O. Box 10897, Pittsburgh, PA 15236.

Students requesting reasonable accommodations for testing and skill performance will be contacted for a meeting to discuss the nature of the accommodation(s) requested. Expenses for any learning assessments are the responsibility of the student.

Students should be advised that accommodations may not be available on FAA and/or licensing exams. The licensing body is the sole determining agency on whether or not accommodations are available for testing.

## Nondiscriminatory Policy

PIA admits students of any race, religion, age, creed, marital status, veteran status, political belief (or affiliation), color, national origin, sex, sexual preference, physical challenge, handicap or disability to all rights, privileges, programs and activities generally accorded or made available to students at the school. The institute does not discriminate on the basis of race, religion, age, creed, marital status, veteran status, political belief (or affiliation), color, national origin, sex, sexual preference, physical challenge, handicap or disability in the administration of its educational policies, activities, scholarships and loan programs, career services, and/or other school-administered programs.

Title IX of the Educational Amendments of 1972 (Title IX), 20 U.S.C. §§ 1681 et seq., and its implementing regulations, 34 C.F.R. Part 106 also prohibits gender-based harassment, which may include acts of verbal, nonverbal or physical aggression, intimidation, or hostility based on sex or sex-stereotyping, even if those acts do not involve conduct of a sexual nature. The Director of Compliance and Career Services (refer to STAFF) serves as the Title IX coordinator, and can be contacted at 5 Allegheny County Airport, West Mifflin, PA 15122 (412-346-2100).

## Clock Hour/Credit Hour Equivalency

PIA does not currently measure its Hagerstown Campus programs in credit hours. All courses are weighted according to the number of clock hours utilized. A clock hour is defined as: “a one-hour period including at least 50 minutes of student/instructor contact,” also referred to as a “contact hour.”

## Credit for Military Experience

Individuals with military experience as a line or crew chief mechanic can present their DD214 or an official letter from their commanding officer verifying the type of work and equipment worked on and total time in service. If the military training was earned as part of an accredited program, PIA may grant transfer credit as applicable. If the military training/experience was not earned as part of an accredited program, PIA will review these records to determine opportunities for by-pass testing, which will indicate what credits, if any, will be granted.

## Credit for Comparable Education, Training, and Experience

At the discretion of PIA, course and tuition credit may be granted for comparable education and training. This credit may be based upon documented course work accomplished at other recognized schools or training facilities (when course descriptions closely match), or from the results of written and/or practical evaluations (when course descriptions do not match closely enough).

Students who have been enrolled in courses, or another institution relating to the program they wish to enroll in at PIA will be advised to submit a transcript to the Admissions Office for evaluation. The school attended shall provide a transcript of the student's grades. An official of the school shall authenticate the transcript. The transcript must state the curriculum in which the student was enrolled, whether the student satisfactorily completed that curriculum, and the final grade(s) the student received. A course catalog and description from the institution attended by the student must be submitted with the transcript. Students must have received a "C" or higher in any course they wish to be considered for course and tuition credit transfer purposes. The materials will be evaluated for transfer of credit applicability, after which the student will be advised as to how many credit hours they may receive.

It is imperative that students requesting a transfer of credit provide PIA with all necessary documentation, or make arrangements with the transferring institution to provide PIA with the necessary documentation, prior to the start of the semester. It is the sole responsibility of the Student/Perspective Student to have any and all documentation provided to PIA for the Director of Student Service's review. Students/Prospective Students must apply for and have all necessary documentation submitted to the Director 30 days prior to the start of classes. An evaluating Director will review situations where the student has applied for credit transfer, but due to no fault of the student, the reporting agency has not provided PIA with the necessary documentation within 30 days of the start of classes and the evaluating Director alone will have the ability to extend time for that student on a case-by-case basis. Exceptions can be made for late enrollment, so long as the student gives the evaluating Director any and all necessary documentation within 5 business days of the start of classes. If class has started and the evaluating Director has not received the necessary documentation, the student WILL NOT receive course and tuition credit transfer for those classes which he/she is taking, THERE WILL BE NO EXCEPTIONS. However, students may still be allotted course and tuition credit transfer for classes that have yet to begin or which will begin in a subsequent quarter.

### Transfer Credit

PIA will evaluate transfer credit from other institutions. The amount of credit awarded for work accomplished at PIA's Hagerstown Campus may vary from one postsecondary institution to another. Transfer of credits from one educational institution to another is always subject to acceptance by the receiving school. PIA holds articulation agreements with a number of colleges and universities. Articulation agreements vary in amount and conditions for which transfer credit is awarded. A student may get details of transfer credit and articulation agreements from the Director of Compliance and Career Services. If a student decides to transfer out of a PIA program into another facility, he/she should speak to the Director of Compliance and Career Services. A student may leave PIA in good standing if all financial obligations to PIA are satisfied and all materials supplied by PIA are returned. PIA will then prepare a transcript listing all the grades obtained by the student. When a student signs a release, the transcript will be sent to a third party so chosen by the student. Students continuing their education at, or transferring to, other institutions must not assume that credits earned at PIA will be accepted by the receiving institution. An institution's accreditation does not guarantee that credits earned at the institution will be accepted for transfer by any other institution. Students must contact the receiving institution to determine what credits, if any, the institution will accept. It is the student's duty to check the articulation agreement and/or transfer policy of any institution they wish to transfer into. Students must be aware that articulation agreements are based on FAA certification and not individual course work.

A student who completes the entire AMT program at the Hagerstown Campus will receive 58 credit hours toward the AMT associate degree program offered at another PIA campus, or at least 18 credit hours toward any other associate degree program offered by PIA.

## Student Housing Assistance

PIA assists students in locating suitable off-campus housing accommodations. Students who desire housing assistance are referred to appropriate apartments, apartment complexes, and private homes within commuting distance of the campus. Roommate referral assistance and furniture rental referral assistance are also available upon request. Students requesting housing or roommate assistance should contact the Admissions Office 4 to 6 weeks before classes start.

## Daily Class Schedule/Hours of Attendance

### Class Size

Enrollments and class sizes are regulated by the appropriate governing agencies. Accordingly, student/instructor ratios cannot exceed 25:1 in the shop/lab environment, and cannot exceed 50:1 in the theory classroom..

### Periods of Study

The curriculum for the full-time Aviation Maintenance Technology Program is comprised of periods of study referred to as semesters. The program is four (4) semesters in length, the first three consisting of 474 contact hours, and the fourth consisting of 478 contact hours, for a total of 1,900 hours of instruction.

Classes are in session five days a week, Monday through Friday, from 8:00 am to 2:30 pm. Exceptions are scheduled holidays, vacation days, and faculty in-service days as listed on the school calendar insert provided with this catalog. On scheduled class days PIA's building is unlocked at 7:00 am. At this time, a student can enter the building and proceed to assigned classroom, shop or laboratory area, lunchroom area, or an instructor's office for a prearranged appointment or to an assigned make up area. Morning make up is arranged through the instructor.

All classes begin at 8:00 am unless otherwise specified. Students are expected to be at their assigned locations for morning roll call.

The daily class schedule consists of six 50-minute periods. Class changes of ten to fifteen minutes provide ample time for students to move from location to location and be prepared to continue their learning activities.

The student's lunch period, between periods 3 and 4, is 30 minutes in length, at which time they may use either the school's facilities or off campus facilities.

The PIA instructional staff is available to assist students after classes. Arrangements can be made for fulfilling make up requirements, and/or getting additional assistance with any of the program material.

Regular dismissal occurs at 2:30 pm each school day unless specified otherwise.

Dismissal will always be preceded by a roll call. For shop/laboratory students, roll call will be taken at predetermined locations. Students must not leave this location until dismissal. Classroom students are expected to remain in their seats until roll call is completed and the instructor dismisses the class.

To minimize congestion and maximize safety, students are encouraged to exit the building and parking areas in an orderly manner. Acts which are considered to present safety hazards will not be tolerated.

## Early Dismissal

Early dismissal, when permitted, is counted as a period of absence. Students are required to get permission from their instructor when leaving before the end of the scheduled day. Note: Excessive absence accumulated due to early dismissals is to be considered very serious and may be considered as a reason for interruption of training.

## Tardiness

Any student not present at the beginning of the first scheduled period of the day is considered as tardy and must report to his/her instructor. The exact number of minutes of tardiness will be recorded and transcribed into the student's permanent records. Tardiness is treated as a period of absenteeism.

## Absence

PIA requires all absence to be made up in order for the student to graduate from the AMT program at the Hagerstown Campus. Make-up work can be accomplished at a time determined by the Campus Director. This time may be on regular school days either before scheduled class hours, after scheduled class hours, or on weekends.

Students will be notified at certain intervals throughout the semester for excessive absence. If a student's absence reaches a certain, predetermined amount (calculated based on contact hours in which the student is enrolled), the student will be placed on a provisional status wherein no additional time can be missed prior to the end of the term. If the student misses additional time while on provisional status, the student will be considered "FA" (Failure due to Absence).

An appeal process will be available for students with extenuating circumstances. The Evaluating Director will review a student's absences along with any documentation provided by the student and make a determination on a case-by-case basis. Students may stay enrolled at PIA pending the outcome of the appeal. The following reasons are typically considered to be extenuating circumstances (This list is not exhaustive):

1. Hospitalization with documentation
2. No-fault Court appearances with Court documentation – this does not include situations where the student is a party to the legal action
3. Job interviews arranged by student or PIA Career Services, with documentation
4. Military service with Military Orders
5. Death in the immediate family (spouse; biological, step or foster children; parent; spouse's parent; grandparent; spouse's grandparent; siblings; spouse's siblings). Obituary notice including student name or documentation from funeral home is required.

Class cuts are not tolerated. Class cuts will be considered a form of absenteeism. Any student involved in cutting classes may face disciplinary action.

Any student who is absent from school for a period of five (5) consecutive scheduled class days without notifying PIA of the reason for his/her absence will be removed from the school's roll sheets, and be considered as "withdrawn." In order to reenter the program, the student must apply for readmission, and he/she must submit an acceptable reason for the absence. It must be shown that corrective action has been taken to prevent recurrence of the cause for absence. When a student applies for re-admittance, he/she will not be required to retake the MSA.

If a student misses more than the prescribed net absence in a semester, but does not exceed a maximum limit, the student's work for the term will be considered incomplete due to absence. To complete the term, absence beyond the prescribed net absence must be made up in the term which it occurred prior to advancing to the succeeding term. Certain exceptions may apply to the above-mentioned policy, and said exceptions will be determined based on an internal hearing process held before an evaluating school official. Determinations will be made on a case-by-case basis. If a student disagrees with the decision of the school official, an Appeal request may be made.

**Special Provisions for Military Service Members.** Military Members who are scheduled to be deployed should provide the Campus Director and Student Records Office with documentation and notification as far in advance as possible. For further details please see Student Records Office.

## Make-up Time

A student must attend at least 90% of all SCHEDULED class and shop/lab time. Failure to meet this standard will result in dismissal from the program. At the end of the program, a student's net absence (time missed minus time made up) must equal zero (0) in order for him/her to advance to each succeeding term of study and receive a diploma and FAA completion certificate from the school.

Make-up work is not permitted for the purpose of receiving Veterans Administration training allowances.

## Make-up Class Schedule

Upon appointment, make up time can be scheduled Monday through Friday from 7:30 am to 8:00 am and 2:30 pm - 3:30 pm unless otherwise posted. Additional times may, but are not required to, be made available by each faculty member at his/her discretion. In addition, opportunities for evening make-up time are provided throughout the term. The specific dates for each term will be announced or posted.

## Records and Procedures

Accurate and detailed attendance recording is the responsibility of the instructor. The instructor will verify a student's presence (at minimum) at the beginning and ending of the morning session, at the beginning and ending of the afternoon session, and when the class moves from one shop/classroom to another. Random roll calls may be conducted as required.

Student attendance records reflect the following information:

1. Date and amount of absence for each occurrence.
2. Number of late arrivals and early departures.
3. Total absence by term.
4. Accumulated absence.
5. Make-up time required and completed.

## Advising

When a student is absent for three consecutive days, the instructor provides notice to the appropriate personnel. An attempt will then be made to contact the student to determine the reason for the absence.

Students are advised for excessive absence at prescribed intervals throughout the term. Documentation of advisement regarding student absence becomes a part of the student's permanent record.

## School Delay/Closing

Pittsburgh Institute of Aeronautics attempts to provide an uninterrupted training schedule with few school closings/delays due to inclement weather or other reasons. To the students, this means on-time graduation and a minimum of inconveniences. Weather related delays and closings are determined based on the road/parking conditions at the PIA campus, and not necessarily on conditions in the surrounding areas. Although PIA classes may still be in session during a weather event, commuting students are advised to make their own decision as to the safety of travel during inclement weather.

In the event that a school closing/delay is necessary, the students will be notified by the following means:

1. Text Alerts – to sign up for PIA Hagerstown, text PIA3 to 79797.
2. Announcements will be given to the TV station WHAG-TV (NBC) and radio station 106.9 the Eagle.

## Student Complaint/Grievance Procedure

Full consideration will be given to student complaints concerning any aspect of programs, facilities, and all services offered by or associated with PIA. The following complaint/grievance procedure is intended as a formal process to submit any complaint for consideration. Prior to entering a formal complaint, students are encouraged to speak openly to members of the school faculty and administration. Reasonable measures will be taken to preserve the confidentiality of information that is provided and to protect persons who report the information from retaliation.

Any student wishing to submit a formal complaint must follow the procedure below.

1. A student must present to the Campus Director any complaint relating to any: (a) programs, facilities, and all services offered by or associated with the school; (b) action or alleged misrepresentation by an employee or representative of the school; (c) discrimination or harassment based on race, religion, color, age, sex, sexual orientation, national origin, disability, gender or any other protected status by any student, applicant, faculty member or other school employee, or visitor or invitee of the school; and (d) school activity. The complaint may be oral or written. The Campus Director will promptly acknowledge receipt of the complaint and maintain proper written documentation of the complaint for future reference.
2. The Campus Director or the appropriately designated school official will meet with the student to discuss and respond to the complaint. The administrator's response may be oral or written and will address the specific complaint and indicate what, if any, corrective action has been proposed or accomplished. All discussions will be documented.
3. Within three (3) school days of any such discussion, the appropriate administrator will prepare a written summary of the discussion, including any agreed upon or proposed solution of the student's complaint. The Campus Director will take the necessary steps to ensure that any agreed upon solution or other appropriate action is taken.

## Unresolved Complaints

If the complaint cannot be resolved after exhausting the institution's grievance procedure, the applicant may contact the Secretary of Higher Education at the Maryland Higher Education Commission to register complaints or to obtain information concerning the performance of PIA's Hagerstown Campus programs. This includes but is not limited to information regarding the program's enrollment, completion rate, placement rate, and pass rate of graduates on licensure examinations. Direct all inquiries to: MHEC, 6 N. Liberty St, 10th Floor, Baltimore, MD 21201; or the website at; [www.mhec.state.md.us](http://www.mhec.state.md.us).

Finally, students may contact the Maryland Office of the Attorney General, Consumer Affairs. This office can be reached at 200 St Paul Pl, Baltimore, MD 21202, at 1-888-743-0023 or by visiting <http://www.oag.state.md.us/consumer/>.

If the complaint has not been resolved by PIA to the satisfaction of the student, the complaint may also be referred to the Accrediting Commission of Career Schools and Colleges (ACCSC) 2101 Wilson Blvd., Suite 302, Arlington, VA 22201 Phone 703-247-4212 Fax 703-247-4533: or the website at: [www.accsc.org/Student-Corner/](http://www.accsc.org/Student-Corner/). A copy of the Commission's Complaint Form is available at the school and may be obtained by contacting the Director (see "Staff").

## Appeals Request

Students who wish to appeal certain determinations made by the Institute, may do so via a written request to the Campus Director. All appeals must be initiated within 24 hours of the incident or determination in question. Formal appeals will be reviewed by the Campus Director's office, and the student will be informed of the outcome in writing. Appeals are permitted for the following issues:

1. Withdrawal/Dismissal/Leave of Absence Determinations
2. Unfavorable Evaluations
3. Disciplinary Actions

## Student Grading and Progress Reports

After each term of study, a progress report is issued to the student. Students should review the report as soon as it is received. Any potential discrepancy should be reported to the Student Records department immediately. The following grading system is used for all programs:

All written examinations and quizzes, as well as shop/lab projects, are scored by percent. These percentages are then converted into letter grades. To receive credit for a shop/lab project, the student must achieve a score of 70% or higher. Individual course achievement is recorded by letter grade, each equivalent to a prescribed grade-point value. This grade-point value is then multiplied by the number of clock hours (also known as contact hours) assigned to the course, giving a quantity of grade points that will be used to calculate the student's average. The term progress report and the transcript indicate student achievement by grade point average (GPA), which is derived by dividing the sum of all grade points earned by the total number of contact hours completed. Transferred credits or other advanced standings are not used in this computation. PIA shall retain all permanent grades for as long as the school exists.

The student transcript includes the following information:

- Student name and ID number
- Major/Program completed (if applicable)
- Start date
- Applicable School Code(s)
- Courses taken
- Letter grade for each course completed
- Credits earned in a given term of study
- Total credits received
- GPA for a given term of study
- Cumulative GPA

Following is a table used to convert percentages, letter grades, and grade-point values.

PERCENT	LETTER	G-P VALUE
90 – 100	A	4.00
80 – 89	B	3.00
70 – 79	C	2.00
60 – 69	D	1.00
0 – 59	F	0.00

## Coding System

In lieu of issuing grades for a term, circumstances may warrant the issuance of one of the following codes.

### CODE MEANING

CR.....Credit granted

I.....Incomplete Course

FA.....Failure due to absence

FG.....Failure due to grades

FI.....Financially incomplete

UP.....Unsatisfactory Progress

TI.....Terminated (incomplete)

WC.....Withdrawal (complete)

WI.....Withdrawal (incomplete)

NOTE: If a student receives a code of WI (withdrawal, incomplete), it will remain in effect indefinitely, or until the term is satisfactorily completed.

## Satisfactory Progress

In order to advance to the succeeding term, the student must achieve a 70% or higher for all courses. A student who fails to achieve a minimum of a 70% in any course is not eligible to advance to the succeeding semester or unit until he/she repeats that course and receives a 70% or higher. A student is only permitted to repeat a course two (2) times [a total of three (3) attempts]. If after three attempts, the student is unable to achieve a 70% or higher in any course required for the completion of an AMT program, he/she will be terminated from the program.

When a student receives a written test score of less than 60%, the examination may be retaken under the following conditions: 1) BOTH the instructor and the student determine that a retake is warranted; 2) The test is retaken within five (5) school days of the failed attempt; 3) The student understands that the highest possible score he/she can receive for the retaken exam is 60% ("D"); 4) Only two (2) retakes are permitted. If the student has failed to achieve a score of 60% or better after the second retake, then the highest score attained is recorded.

NOTE: This policy does not apply to quizzes or shop/lab projects.

The learner must have satisfied all attendance requirements, making up all excess absences prior to the start of the next term. In addition, all exams and projects must be completed prior to the start of the next term. All financial obligations to the school must be met prior to advancing to the next term. Although it is PIA's policy to supply transcripts to students when properly requested, transcripts issued to students who have not satisfied all grade, attendance, and/or financial obligations will be marked with a stamp identifying the deficiency.

Any course repeated will be billed at the rate currently in effect. Regardless of the reason for unsatisfactory progress, a student MUST complete his/her selected program of study within 1.5 times the normal duration of completion. For example, a 16 month program must be completed in 24 months of attendance, or less. If a student officially withdraws from a program, then reenters, the interim time between the withdrawal and reentry is not considered in this calculation.

PIA does not have a mandatory probationary period.

## Retaking Courses

A course which is taken and receives a grade of "incomplete" must be completed with a passing grade no later than nine (9) months after the first attempt. A student cannot progress to the subsequent quarter of study until all courses designated for a given quarter of study have been passed.

## Sequence and Scheduling of Courses

**Cancellation/Alteration of Course Offerings** – Pittsburgh Institute of Aeronautics reserves the right to alter, including cancel, course offerings if enrollments, resources and/or other circumstances do not meet criteria as determined by judgment of the Administration. In such instances, PIA will make every effort to offer the student an alternate and equally appropriate sequence of courses. If such an alternate sequence is not available, the student will be required to take a one-term break in training and register for the next set of available courses leading to his/her program completion.

**Disruption of Training due to Student Factors** – PIA students, regardless of major/program, must be aware that failing or withdrawing from a term/course, taking a leave of absence, or otherwise altering the original course distribution established upon enrollment may result in a course scheduling conflict. In such circumstances, PIA will make every effort to offer the student an alternate and equally appropriate sequence of courses. If such an alternate sequence is not available, the student will be required to take a temporary break in training and register for the next set of available courses leading to his/her program completion.

## Conduct Requirements

At the time of enrollment, each student is required to sign an enrollment agreement which states that the student will abide by all regulations and policies as outlined in the enrollment agreement, this catalog/student handbook, and as presented by the staff of the Institute. Any violations of the regulations or policies may result in disciplinary action up to and including suspension or dismissal from the Institute.

## Termination of Students

PIA reserves the right to reject any applicant who does not meet the required standards, or to expel any student who does not abide by the rules and/or regulations, behaviorally and/or scholastically, as outlined in this catalog, student handbook, and the enrollment agreement.

A student may be terminated from the school for unsatisfactory academic progress, nonpayment of tuition, excessive absence or tardiness, or failure to abide by rules and policies established by the school. The termination date will be the student's last date of attendance.

Other reasons for dismissal include, but are not limited to the following:

1. Failure to comply with attendance policies
2. Submission of forged documents
3. Conviction of a Felony
4. Failure to meet academic requirements
5. Failure to meet practical (shop) requirements
6. Failure to comply with rules, regulations and policies of the Institute
7. Unprofessional, unethical, or insubordinate behavior
8. Any action or inaction which causes harm to another
9. Proven illegal use of controlled substance
10. Fighting
11. Harassment

12. Reckless or unauthorized use of vehicles
13. Reckless or unauthorized use of shop equipment
14. Theft
15. Intentional damage to school equipment/vehicles/property
16. Failure to participate in/comply with school-mandated EAP programs and recommendations
17. Other serious or repeated violations of the school's rules and/or policies

## **Request for Reinstatement following Termination**

A student seeking to return to school may be granted reinstatement under the following conditions: 1) he/she must meet minimum school admission requirements and academic criteria (refer to "Satisfactory Progress" on page 12) in force at the time of reentry; 2) he/she must be in compliance with the school's attendance policy (refer to "Absence" on page 8) at the time of reinstatement, 3) he/she must be recommended for reinstatement by the Campus Director 4) he/she must have met all financial obligations to the school up to the date of reinstatement, 5) he/she must be free of any sanctions imposed by the school, including suspensions or other forms of disciplinary action, and 6) he/she must be free of any unfulfilled requirements mandated by the EAP program.

A student seeking to return to school and granted reinstatement under the aforementioned criteria will enter the applicable program of study at the point where all of these standards have been met, even if that means that certain classes previously attended must be retaken, and all applicable conditions have been satisfied, including the payment of course/term tuition and the completion of academic requirements.

Students accepted for reinstatement will sign a revised enrollment agreement indicating any courses and tuition credits already completed, and any changes, such as graduation date, that are affected by the new agreement.

## Refund Policies

**Applicant Rejection.** All monies paid by the applicant will be refunded if his/her application for admission is rejected or enrollment is denied by the school.

**Registration Cancellation.** Any applicant may cancel his/her registration prior to the beginning of the class by requesting a cancellation in writing and mailing it to the school. If the request for cancellation is postmarked within seven (7) calendar days following the date of the enrollment agreement and prior to the start of the training program, all monies including the registration fee will be refunded. Upon cancellation after the seventh calendar day following the date of the enrollment agreement but prior to the beginning of the training program, monies paid to the school will be refunded except the registration fee. However, if the cancellation occurs prior to ninety (90) days before the beginning of the applicant's original training program, 50% (\$75) of the registration fee may be refunded in addition to the other monies paid. Notice of cancellation must be in writing and delivered to the school.

**Withdrawal from the Program.** When a student begins training and withdraws prior to completion of any term, a refund of any tuition overpayment is made as outlined in this paragraph. Accrued tuition is computed through the last day of attendance, and refund of overpaid tuition, if any, is made on a prorated basis of 100% according to the number of days remaining beyond the last day of attendance. The refund is made within 30 calendar days of the official date of withdrawal. All students, regardless of their method of payment, are subject to the same refund policy. Information concerning refunds for third-party funding agencies (Title IV, Veteran's Administration, WIA, etc.) can be obtained from the Financial Aid Office.

## Teach Out

If PIA discontinues a program at its Hagerstown Campus, all students enrolled in that program will be provided the opportunity to complete all graduation requirements, on-site at the Hagerstown Campus, by means of a teach out of the affected program. If the school closes or discontinues a course or program, the school shall refund to each currently enrolled student monies paid by the student for tuition and fees and monies for which the student is liable for tuition and fees.

## Request for Leave of Absence or Withdrawal

Students are encouraged to make an appointment with the Campus Director or Director of Student Services prior to initiating any request for temporary or permanent leave. However, students may withdraw from PIA at any time. Students wishing to withdraw from a program are required to visit the Campus Director's office to complete the necessary forms.

Students may be granted a Leave of Absence (LOA) from their program for reasons deemed acceptable and necessary by the Institute. A student may request a temporary period of absence from Pittsburgh Institute of Aeronautics (PIA) due to extenuating academic, medical or personal circumstances that prevent a student from participating fully in his/her program of study. A student must apply in advance and all requests for leave must be submitted in writing and signed and dated. The student must provide a reason for requesting the leave and a reasonable expectation when they will return. If enrollment is temporarily interrupted for a leave of absence and the leave of absence does not expire, the student will return to school in the same progress status as he/she had prior to the leave of absence. A leave of absence in NO WAY reduces the obligation on the part of the student to complete his/her program within the allotted time frame. Details on time frame should be directed to Financial Aid Office.

The Campus Director and Director of Financial Aid and Student Services will review all leave requests and determine whether the student is approved for a Leave of Absence (LOA). A student

who meets the criteria and is granted an approved LOA is not considered to have withdrawn, and no Return of Title IV calculation is required.

If the student's request for leave is determined to be a Withdrawal (W/D) and the student received financial aid and is a Title IV loan recipient, he/she will be subject to the Federal regulations governing the return of Title IV funds. A refund of any tuition overpayment is made as outlined in this paragraph. PIA will calculate the amount of grant, loan assistance and earned tuition through the last date of recorded attendance. The refund of overpaid tuition is made on a pro-rata basis of 100% according to the number of days remaining beyond the last date of recorded attendance. This refund is made within 30 calendar days of the official date of the withdrawal. All students, regardless of their method of payment, are subject to the same refund policy.

The maximum time allowed for an approved leave of absence is 180 days in any 12 month period. Students who do not return at the expiration of an approved leave of absence will have their enrollment status changed to a withdrawal and must apply for re-admission. Due to the change in enrollment status PIA will begin the return of Title IV funds outlined in the previous paragraph. Information concerning refunds for third party funding agencies (Title IV, Veteran's Administration, WIA, etc.) can be obtained from the Financial Aid Office.

If the student re-enters after 180 days, his/her remaining financial aid (as applicable) will be calculated on the remaining time to complete the program. This may lower the amount of eligible financial aid when the student re-enters.

If the student re-enters after 180 days, he/she will lose his/her six (6) month grace period (as applicable). Any active student loan(s) will enter repayment and the student will be responsible for monthly installments. Please note, once a student uses the 6 month grace period, it may not be reinstated for any reason. Based on the student enrollment status they may utilize an in-school deferment to postpone repayment of his/her loans until graduation.

## **Reentry Process**

Contact the Student Records Office and/or Campus Director to request reentry. The reentry date will be based on space available and the satisfying of all pending financial, academic, and make-up time obligations. The current hourly rate of tuition will apply to all reentry students. The Financial Aid Department will offer assistance in preparation and submission of student aid paperwork.

Should the student decide to re-enroll in the Institute, he/she will retain credit for any classes successfully completed before the withdrawal. If withdrawal occurred under unsatisfactory academic status, a student is required to meet any outstanding academic requirements for the term in which he/she withdrew prior to enrollment in the subsequent term. A student may start where they left off at time of withdrawal, provided no curriculum changes have occurred, and with the approval of the Campus Director and/or Director of Student Services. PIA reserves the right to deny a student's reentry into a program of study if such reentry is not in accordance with sound educational practices.

# Financial Assistance for Students

Financial assistance is available to qualified students attending PIA's Hagerstown Campus through various loans, grants, and scholarship programs. The school is approved by the U.S. Department of Education and is accredited by the Accrediting Commission of Career Schools & Colleges (ACCSC).

## **PIA Hagerstown Campus offers the following Financial Aid Programs:**

- Federal Direct Student Loan Program (FDLP)
- PELL Grant

PIA does not participate in Federal Supplemental Educational Opportunity Grant (FSEOG), Perkins Loans, or Federal Work Study (FWS). Certain federal and state financial assistance programs require that the applicant is registered with the Selective Service System. Details on financial aid programs are available from the Financial Aid Office.

PIA's Hagerstown Campus offers matching funds toward selected individual scholarships offered by companies and organizations. Students should contact the Campus Director and/or Director of Financial Aid for more details on applying for a scholarship match.

**Additional scholarship opportunities are available and posted for students throughout the year. Contact the Financial Aid Office for details.**

## **How to Apply for Financial Aid**

The first step in the financial aid process is submitting the Free online Application for Federal Student Aid (FAFSA). The web site is [www.fafsa.ed.gov](http://www.fafsa.ed.gov). The result of the application, the Student Aid Report (SAR) will be e-mailed or mailed to the student. The SAR will provide the Expected Family Contribution (EFC). The FAFSA must be submitted every year. Students can apply between January 1st and June 30th of the following year.

## **Pell Grant**

Pell Grants are awarded only to undergraduate students - those who have not earned a bachelor's or graduate degree. The student's EFC and cost of attendance determines the Pell Grant award. The funds are paid directly to the school and applied to the student's tuition account. If there is an overpayment, a refund is made to the student by check. The funds are disbursed once per term.

## **Direct Loans**

The Federal Direct Loan Master Promissory Note is completed by the student and provides multiple subsidized and/or unsubsidized loans over a maximum ten year period. Loan limits depend on the academic year, whether you are a dependent student and whether you receive subsidized (the government pays the interest while you are in school at least half time) or unsubsidized (interest begins at the time the loan is disbursed) loan(s). Loans are disbursed to the student once per term and electronically transferred to PIA. The funds are applied to the student's tuition account. If there is a refund, the student has the option of taking the refund or leaving the money on their account for the subsequent semester.

PIA provides online Entrance and Exit Counseling in addition to reference materials to assist the student in the loan process and responsibilities.

## **Direct Plus Loans**

Federal Direct Plus loans are credit based loans the parents can take out for their dependent undergraduate children. The Federal Direct PLUS Loan Application and Master Promissory Note must be completed. A credit check is required for each loan term. The loan is usually disbursed

once per term. The funds are sent electronically and applied to the student's tuition account. If there is a refund available, a check is mailed to the parent. Repayment begins after the money for the loan term has been disbursed, unless the parent requests an in school deferment.

## Borrower's Responsibilities

Once the borrower has received the loan funds he/she has assumed certain responsibilities.

Those responsibilities are as follows:

1. Repayment of the loan: The loan funds must be repaid to the lender on an approved schedule. The loan must be repaid if the student graduates or if the student withdraws from training.
2. Employment status: If the student becomes unemployed and cannot continue the repayment of the loan he/she may request a deferment from the lending institution. A request for deferment is not a guarantee of deferment. The student must continue payments until he/she has written approval that the deferment has been granted.
3. Notification of changes: The borrower must notify the lender of any changes that take place that could affect the loan account. Examples: name change, address change, or social security number change.

NOTE: All students must attend an exit interview before graduation or termination of classes.

The financial aid office is open from 8:00 a.m. to 4:00 p.m., Monday through Friday. Please call 412-346-2100 and ask for Financial Aid if you have any questions or concerns.

## Graduation Requirements

Following are the minimum graduation requirements for students attending PIA's Aviation Maintenance Technology program at the Hagerstown Campus.

The student must achieve a grade of "C" or higher for all required courses. In addition, the student must have passed every shop/lab project with a score of 70% or better.

Students must have attended 90% of all scheduled class/shop hours, and all absences must have been satisfactorily made up.

All financial obligations must have been met to cover tuition, books, supplies, tools, fees, etc., according to school policies.

## Career Services

### Objective of the Career Services Department

The goals of the career services department include introducing the students to a career development consciousness at the beginning of training; nurturing a keen awareness and understanding of the career development process; updating students on a regular basis throughout their training regarding industry demands and career opportunities; answering student questions and addressing concerns; and most importantly, ensuring that every graduate has the best possible placement opportunity.

### Procedure

Career services for the student's initial job begins months prior to graduation. A synopsis is prepared for each graduating class which is disseminated to numerous aviation and related companies across the country. Students are briefed on aviation industry resource information.

Utilization of this information enables the student to begin sending resumes and requesting applications. The interview process is detailed and instruction is given on proper decorum, dress and professional conduct.

Career Services personnel will diligently assist each student with preparation of all the necessary documents required by the employer, and arrange and schedule employer interviews and/or job fairs. PIA does not guarantee jobs. Ongoing career services assistance is provided for all alumni of PIA.

**Student's responsibilities:** As they progress through their training, students must strive to maintain a high GPA, a good attendance record, and a positive attitude toward learning and teamwork. Business attire is required for participation in all school sponsored interviews.

## Student Council

Student Representatives meet periodically with the Administration of the school in order to discuss student concerns and work in concert toward improving the educational experience at Pittsburgh Institute of Aeronautics. Following are the standards for selection and performance.

### Eligibility:

- The representative must be willing to make him/herself available for scheduled meetings after class hours.
- All students who are making satisfactory academic progress in the term presently attended are eligible to serve as the class representative.

### Nominations:

- Nominations for class representatives shall be held within the first two weeks of each semester.
- Any student may nominate a fellow classmate as the representative; and the nomination becomes official when "seconded" by another classmate (other than the person nominated).

### Elections:

- Elections for class representatives shall take place the day after nominations.
- All ballots will be distributed and collected by the individual designated by the instructor.
- The nominee receiving the greatest number of votes will serve as the class representative. The nominee receiving the second greatest number of votes will serve as the alternate representative.

### Duties:

- The class representative will render the viewpoints of the class during all meetings, even though these viewpoints may or may not be his/her own.
- The representative will report the minutes of all meetings to his/her class within 48 hours of their distribution.
- In the event that he/she cannot perform the duties of class representative, either temporarily or permanently, he/she must inform the elected alternate so that person may replace the representative in all duties.

## Tool Requirements

The tools listed here may be purchased from any source. As a service to its students, PIA permits vendors to visit the school and address new students concerning their tool needs. Acquisition of the tools listed is a requirement for successful progress. Students who do not obtain the required tools may be dismissed from classes, and may not be permitted to reenter school until they have acquired the prescribed tools.

## Required Tool List

The student must possess the tools listed on the first day of the semester indicated. These are new tools, which **MUST** be acquired for each semester of study. Some tools used, particularly in later terms, are those previously purchased by the student, and are not listed here. The student may obtain an inventory of all tools required for a particular semester of study from the appropriate instructor.

The following list of tools is intended to be accurate as of the date of this publication. However, since requirements can change by semester, students should consult the bookstore for the most updated listing. In instances where there are discrepancies between this publication and the bookstore listing, the bookstore listing shall prevail.

### FIRST SEMESTER/UNIT

- Soldering iron, 25 watt, grounded tip
- Allen wrench set (up to 5/16")
- Combination wrench set (up to 1")
- Flashlight
- Fluke/Amprobe Meter
- Hammer, soft face, 12-oz
- Hemostat
- Inspection mirror
- Pliers, 6" combination (slip-jaw)
- Pliers, 6" diagonal cutters
- Pliers, fine needle nose
- Pliers, duck bill
- Pliers, round nose
- Scale, 6" steel
- Screwdriver, common, 4" shank
- Screwdriver, common, 6" shank
- Screwdriver, Phillips, #1 x 3"
- Screwdriver, Phillips, #2 x 4"
- Socket set, 1/4" drive, 12 point, with extension & bits
- Toolbox
- Tweezers, curved tip
- Wire strippers

### SECOND SEMESTER/UNIT

- Crescent wrench, 4-6"
- Dial Caliper, 0 to 6"
- Pocket knife
- Screwdriver, common, stubby 3/16" x 1 1/2"
- Screwdriver, Phillips, stubby 3/16" x 1 1/2"
- Screwdriver, common, pocket #0 x 2"
- Screwdriver, Phillips, pocket #0 x 2"
- Screwdriver set, miniature or jewelers
- Adapter, 1/4" to 3/8"
- Adapter, 3/8" to 1/4"
- C-Clamps (2) 4 in.
- Crows foot set 3/8" to 3/4", 3/8" Drive
- Drill set, 10 piece
- Extension bar, 3/8" x 6"
- Feeler gauge set
- Magnet, pick-up
- Inspection magnifier, 10X
- Punch, center
- Screwdriver, common, 3/8" x 12"
- Socket set, 3/8" drive, 12 point
- Speed handle, 1/4" drive
- Speed handle, 3/8" drive

### THIRD SEMESTER/UNIT

- Aviation snips, straight
- Cold Chisel, 1/4" Flat
- Drill bits #5, 11, 13, 18, 21, and 30
- Cobalt drill bits #30 and 40
- File handles (3)
- File, half round, 8"
- File, mill (bastard cut) 10"
- File, mill (bastard cut) 6"
- Hammer, ball peen, 12 oz.
- Knife, putty, 1 1/2 "
- Nibbling tool
- Punch, pin, 3/32"
- Punch, pin 1/8"
- Punch, pin 5/32"
- Respirator
- Scale, 12", 1/64" increments
- Scissors, basic 3-4"
- Square, Combination, 12"

### FOURTH SEMESTER/UNIT

- Clecos, 3/32, 1/8, 5/32, and 3/16
- Cleco pliers
- Needle, curved
- Needle, straight

## Tool Box And Tool Locker Regulations:

For tool box identification, it is necessary that the student place his/her name on both ends of the tool box. Students are advised that PIA's tool lockers will accommodate a maximum size tool box of 8 1/2" x 8 1/2" x 20", which is of sufficient size for the complement of required tools. The student must supply a two foot length of chain and padlock for the independent securing of his/her tool box within the cage style tool lockers.

NOTE: Although tool lockers are provided for student tool storage, PIA will not be responsible for the loss of tools in any manner.

## Textbooks, Kits, And Supplies

PIA requires the acquisition of all pertinent textbooks and applicable shop/lab supplies. The PIA bookstore maintains a quantity of these articles as a convenience to the student. So as not to cause unwanted interruptions in their studies, students should obtain books and supplies prior to the start of each term.

## Required Textbooks

Due to the fact that textbooks are frequently revised by the publishers, and due to the ongoing changes in book requirements within the various academic departments, no list of required textbooks is given in this handbook. The student should refer to the list of required publications provided by the campus to determine the reading materials needed for any particular course of study.

## **KITS AND SUPPLIES**

### **FIRST SEMESTER**

- TI-30X Calculator
- Drafting Kit
- Safety Glasses
- Solderless Connector Kit
- Soldering Practice Kit
- Wire and Terminal Kit

### **SECOND SEMESTER**

- Disposable Ear Plugs
- Buzz Box Kit

### **THIRD SEMESTER**

- Acid Brush
- Marker (Blue or Red)
- Respirator Kit
- 2" Paint Brush

### **FOURTH SEMESTER**

- Welding Goggles
- Welding Gloves (MD, LG or XL)
- Welding Tip Cleaner
- Panel Fasteners
- Clecco Kit

NOTE: Kits and supplies, like textbooks, may change in accordance with revisions in the curriculum.

# Aviation Maintenance Technology Program

## Aviation Maintenance Technology Diploma Program Four Semesters 1,900 clock hours (16 months)

### Full-Time Program

The curriculum for PIA's full-time Aviation Maintenance Technology (AMT) program, as offered at the Hagerstown Campus, satisfies the requirements of 14 CFR (Code of Federal Regulations), Part 147, making the graduate eligible to test for the Federal Aviation Administration (FAA) Airframe and Powerplant (A & P) certifications. The AMT full-time program is a non-degree course of study leading to a diploma. The program is four (4) semesters in length, the first three consisting of 474 contact hours, and the fourth consisting of 478 contact hours, for a total of 1,900 hours of instruction. The program operates continuously, except for short breaks during the late summer and during the traditional holiday season. The total calendar time needed to complete this study is 16 months (64 weeks).

### AMT Diploma Curriculum Outline

#### Semester One/Unit One (474 clock hours)

Course Code and Title	Clock Hrs
MA2101 Aerospace Math	35
PH2103 Aerospace Physics	35
EL2105 Basic Electricity	35
AG2107 Maintenance Practices	45
MA2109 Aircraft Weight & Balance	25
PH2111 Theory of Flight	25
MA2113 Shop Related Math	11
EL2115 Aircraft Electricity	70
EL2117 Aircraft Electrical Systems	60
EL2119 Electrical Power Systems I	30
EL2120 Electrical Power Systems II	18
EL2123 Advanced Electrical Theory	34
EL2125 Diodes and Transistors	36
EL2127 Special Application Circuits I	15

#### Semester Two/Unit Two (474 clock hours)

Course Code and Title	Clock Hrs
EL2228 Special Application Circuits II	10
EL2229 Amplifiers	32
EL2231 Operational Amps & Power Supplies	32
EL2233 Oscillators and Pulse Circuits	30
EL2235 Navigation & Communication Systems	44
EL2237 Electrical Synthesis	12
PP2241 Introduction to Turbine Engines	42
PP2243 Turbine Engine Systems	53
PP2245 Turbine Engine Maintenance	49
PP2247 Introduction to Reciprocating Engines	68
PP2249 Engine Principles	47
PP2251 Fuel Metering Systems I	55

**Semester Three/Unit Three****(474 clock hours)**

<b>Course Code and Title</b>	<b>Clock Hrs</b>
PP2352 Fuel Metering Systems II	10
PP2355 Engine Overhaul	73
MA2357 Boolean Algebra	26
PP2359 Ignition Systems	74
PP2361 Engine Troubleshooting	39
PP2363 Aircraft Propellers	67
MA2365 Powerplant Math	16
PP2367 Powerplant Synthesis	16
AF2371 Environmental Controls	33
AF2373 Introduction to Metallurgy	67
AF2375 Fluid Mechanics	33
MA2377 Advanced Weight & Balance	20

**Semester Four/Unit Four****(478 clock hours)**

<b>Course Code and Title</b>	<b>Clock Hrs</b>
AF2481 Nonmetallic Structures	99
AF2483 Fuel Systems/Electrical Installations	40
AF2485 Working with Sheet Metal	92
AF2487 Welding Technology	57
AF2489 Aircraft Inspections	82
AF2491 Landing Gear Systems	32
AF2493 Rigging and Assembly	55
AF2495 Airframe Synthesis	21

**Aviation Maintenance Technician Job Description**

Duties of the aviation maintenance technician include inspections, component replacements, overhauls, extensive repairs, troubleshooting, and servicing of aircraft and aircraft systems.

**Transfer Credit**

PIA holds articulation agreements with a number of colleges and universities. Articulation agreements vary in the amount and conditions for which transfer credit is awarded. A student may get the details of transfer credit and articulation agreements from the office of the Director of Compliance and Career Services.

Students must contact the receiving institution to determine what credits, if any, the institution will accept. It is the student's duty to check the articulation agreement and/or transfer policy of any institution they wish to transfer into. Students must be aware that some articulation agreements are based on FAA certification and not necessarily individual coursework. An institution's accreditation does not guarantee that credits earned at that institution will be accepted for transfer by any other institution.

Details regarding requirements for FAA testing are available through the Office of the Campus Director.

## Qualifications for Federal Aviation Administration (FAA) Certification

To be eligible for a technician certificate and associated ratings a person must be at least 18 years of age, understand the English language, or in the case of an applicant who does not meet this requirement and who is employed outside of the United States by a U.S. air carrier, have this certificate endorsed "Valid only outside the United States," and have passed all of the prescribed tests within a period of 24 months (FAR 65.71). Each applicant for a technician certificate or rating must present an appropriate graduation certificate from a certificated aviation maintenance technician school.

Attainment of all FAA certifications is not a requirement for graduation, since they cannot be fully accomplished until after the student has completed the approved subject areas; however, it is school policy that all AMT students pass the FAA oral, practical, and written examinations for General and Powerplant (or General and Airframe, as applicable in alternate course scheduling arrangements) prior to advancing to their final quarter of study. The Director of Campus Operations may grant an extension to the deadline for completion of these exams, but the extension may not exceed two (2) calendar weeks.

Graduates of PIA's AMT program are qualified to test for the FAA Airframe and/or Powerplant certificate(s), as appropriate. In order to secure these certifications, the graduate must pass a battery of written, practical, and oral examinations prescribed by the FAA. PIA graduates, having successfully completed their written examinations, can arrange for practical examinations with the Campus Director.

## Knowledge (Written) Examinations

The FAA requires three knowledge (written) tests be passed for Airframe and Powerplant certification. FAA knowledge tests are administered via computer terminals at an approved testing center (PSI/CATS).

## Oral and Practical Examinations

Each applicant for a technician certificate or rating must pass oral and practical testing on the rating he/she seeks. The tests cover the applicant's basic skill in performing practical projects on the subjects covered by the written test for that rating.

According to Federal Aviation Regulation Part 183 (Representatives of the Administrator), private persons can act as representatives of the Administrator in testing persons for the purpose of issuing airman certificates. Such a person is referred to as a designated mechanic examiner (DME). For the student's convenience, PIA maintains in-house DME's.

## Authorization to Take the Oral and Practical Examinations Prior to Written Examinations

In accordance with FAR 65.80, a PIA student who has met all program requirements and all other enrollment obligations may be recommended to an FAA inspector for oral and practical tests prior to graduation and prior to passing the written examinations.

# Approvals and Accreditation

- Accredited by the Accrediting Commission of Career Schools and Colleges (ACCSC). Visit [www.accsc.org](http://www.accsc.org) for more information on accreditation.
- Approved by the Maryland Higher Education Commission (MHEC)
- Approved by the U.S. Department of Education
- Federal Aviation Administration Air Agency approval I4PT091K
- This school is approved by the Maryland State Approving Agency to offer training to veterans and other eligible dependents under the VA educational benefit programs:
  - Montgomery GI Bill .....Chapter 30
  - Veterans Educational Assistance Program (VEAP) .....Chapter 32
  - Dependents Educational Assistance (DEA) .....Chapter 35
  - Montgomery GI Bill Selected Reserve .....Chapter 1606
  - Reserve Education Assistance Program (REAP) .....Chapter 1607
  - Post 9-11 GI Bill .....Chapter 33
- Chapter 31 Vocational Rehabilitation is administered directly by the Department of Veterans Affairs through the Vocational Rehabilitation and Employment (VR&E) Program. Information pertaining to Vocational Rehabilitation benefits is available at: [www.vba.va.gov/bln/vre/](http://www.vba.va.gov/bln/vre/).

Pittsburgh Institute of Aeronautics Hagerstown Campus is a branch of Pittsburgh Institute of Aeronautics (PIA), whose main campus is located in West Mifflin, PA, a suburb of Pittsburgh. PIA is a non-profit postsecondary school governed by a Board of Directors. Daily operations are overseen by the school President.

Headings marked with an asterisk (\*) are lists of staff based at the main campus in Pittsburgh. However, students are invited to contact them by calling 1-800-444-1440. Staff from the main campus also make regularly scheduled visits to the branch, and are available to students during these visits. Students are notified of main campus administrator and personnel visits via the student info bulletin board.

## Branch Campus Administrator

Bernard Adams ..... *Hagerstown Campus Director*

## Main Campus Administrators\*

John Graham III ..... *President/CEO*  
Suzanne Markle ..... *Executive Vice President/Director*  
Gary Hoyle ..... *Director of Campus Operations*  
Jason Mongan ..... *Director of Compliance and Career Services*  
Jonathan Vukmanic ..... *Director of Financial Aid and Student Services*  
Steven Sabold ..... *Director of Admissions*

## Faculty

Paul Eisenhart ..... *Lead Instructor*  
Ross Bowman ..... *Instructor*  
R. Lee Carnes ..... *Instructor*  
Stephen Smith ..... *Instructor*  
James Stewart ..... *Instructor*  
Bob Stockslager ..... *Instructor*

## Admissions/Student Services

Roxanne Ober ..... *Admissions and Community Outreach Coordinator*  
Stephanie Ostrowski ..... *Admissions Representative – HS Recruiting*

## Financial Aid\*

Jacob Holt

## Training Equipment

As an FAA-approved Aviation Maintenance Technician school, PIA's Hagerstown Campus includes all of the equipment needed to satisfy 14 CFR, Part 147 training requirements, including engine, accessory, aircraft, and electrical components. The school's tool rooms maintain the precision and specialty tools needed to perform work on airworthy airplanes, powerplants and electrical equipment.

PIA is dedicated to providing its students the privileges, opportunities, and protections which encourage and maintain a safe and productive learning environment.

The following acts are prohibited at Pittsburgh Institute of Aeronautics. In addition to the listings below, students are to reference and adhere to specific policies outlined in this document and the enrollment agreement.

## Acts of Academic Dishonesty, including but not limited to

1. Plagiarism – presenting the work of another as one’s own work.
2. Preparing work for another that is to be used as that person’s own work.
3. Cheating by any method or means.
4. Facilitating academic dishonesty in any way.
5. Unauthorized collaboration.
6. Multiple submissions.
7. Falsification of assignments.
8. Falsification of make-up work paperwork.
9. Falsification of any attendance related paperwork.

## Acts of Social Misconduct, including but not limited to

1. Violence – physical abuse, direct threats of violence, harassment, intimidation, participation in any activity to disrupt any function of PIA, reckless behavior representing a danger to any person(s).
2. Property damage – arson, willful or malicious damage or destruction of property, reckless behavior representing a danger to property.
3. Possession of weapons – possession and/or use of firearms, knives, explosives and/or explosive devices, pellet guns, fireworks.
4. Disobedience – interference, resistance, or failure to comply with the request and/or directions of a PIA staff person acting in the line of duty.
5. Trespassing – unauthorized entry.
6. Deception – furnishing false information to the Institute with intent to deceive.
7. Forgery – including the issuance of a “bad check.”
8. Fighting.
9. Proven illegal use of a controlled substance.
10. Inappropriate behavior with other students.
11. Reckless use of vehicles.
12. Theft – includes theft of property from the institute and from other students.
13. Possession or use of controlled substances.
14. Verbal harassment of instructors, office staff, maintenance staff, administrative staff and fellow students.

## Acts of Copyright Infringement

1. Photocopying or reproducing any PIA material(s), workbook(s), textbook(s) etc. is a direct violation of the intellectual property rights protected by the copyright laws of the United States and International Copyright Treaty. Any student violation will lead to disciplinary action up to and including dismissal from the PIA.

2. Summary of Civil and Criminal Penalties for Violation of Federal Copyright Laws: Copyright infringement is the act of exercising, without permission or legal authority, one or more of the exclusive rights granted to the copyright owner under section 106 of the Copyright Act (Title 17 of the United States Code).
3. These rights include the right to reproduce or distribute a copyrighted work. In the file-sharing context, downloading or uploading substantial parts of a copyrighted work without authority constitutes an infringement.
4. Penalties for copyright infringement include civil and criminal penalties. In general, anyone found liable for civil copyright infringement may be ordered to pay either actual damages or “statutory” damages affixed at not less than \$750 and not more than \$30,000 per work infringed.
5. For “willful” infringement, a court may award up to \$150,000 per work infringed. A court can, in its discretion, also assess costs and attorneys’ fees. For details, see Title 17, United States Code, Sections 504, 505.
6. Willful copyright infringement can also result in criminal penalties, including imprisonment of up to five years and fines of up to \$250,000 per offense. For more information, please see the website of the U.S. Copyright Office at [www.copyright.gov](http://www.copyright.gov).

Acts of Academic Dishonesty or social misconduct may result in a disciplinary reprimand, disciplinary probation, reporting to law enforcement, loss of certain privileges, and restitution for damages, suspension or termination from PIA. Result will be at sole direction of PIA. If at any time during enrollment at PIA a student is arrested and/or convicted of a crime, that student must immediately notify the Director of Compliance and Student Services or Campus Director.

## Care of School Property

Student cooperation is necessary to maintain the proper maintenance and appearance of the campus (grounds), buildings, classrooms, laboratories and shops, equipment, tools, and training aids.

Since care of school property is a cooperative task which must be shared by the students and the staff, students are required to 1) report any damage to school property to your instructor as soon as it is discovered and 2) report any damage resulting from accidents, carelessness, or maliciousness.

- Students must maintain safe working conditions at all times. Liquid spills, trash, or other materials/objects that present hazardous conditions must be immediately removed from the floor, workbenches, etc. In addition, the student must maintain an orderly and clean work station at all times. As required, students will participate in general lab/shop cleanup at the end of the period.
- Shops and laboratories are stocked with equipment and tools that meet or exceed industry standards. It is the instructor’s responsibility to provide adequate directions as to the use and care of the equipment/tools and it is the student’s responsibility to follow directions. Remember, when in doubt, ask for assistance. Monetary or other forms of restitution may be imposed when damage results from inappropriate use or care of the equipment/tools.
- It is essential that students deposit all forms of waste in the appropriate containers. In addition, smokers should make use of the special containers, and refrain from placing cigarette butts in trash cans.
- Smoking is permitted only in marked, designated areas outside the buildings. Use of tobacco products and electronic smoking/vaping devices is prohibited inside PIA’s facilities. Failure to conform to this rule may result in suspension or termination.
- Students must refrain from leaning against or placing feet against the exterior and interior walls.

- Students are responsible for maintaining the established student desk arrangement and keeping the classroom free of any form of trash.
- It is the instructor's responsibility to adjust room temperature controls, window shades, and lighting.

## Sexual Harassment and Reporting Policy

PIA does not tolerate any behavior by administrators, faculty, staff or students which constitutes sexual harassment. Sexual harassment is a violation of Title VII of the Civil Rights Act of 1964, as amended. Sexual harassment is defined in the Equal Opportunity Commission's Guidelines on discrimination of sex. Following such definition and for the purposes of this policy, sexual harassment will be defined as follows: Unwelcome sexual advances; Request for sexual favors; Other verbal or physical conduct or written communication of intimidating, hostile, or offensive sexual nature where:

- (A) Submission to such conduct, either explicitly or implicitly, is made a term or condition of the employee's status of employment or student's status;
- (B) Submission to or rejection of such conduct by an employee or student is used as a basis for employment decisions affecting such employee or academic or enrollment decisions affecting such student;
- (C) Such conduct has the purpose or effect of unreasonably interfering with an employee's work situation or a student's education or creating an intimidating, hostile or offensive environment.

All administrators, supervisors, faculty, staff and students will be held accountable for compliance with this policy.

Any employee or student who has been subjected to conduct which constitutes sexual harassment is encouraged to report such conduct to the Campus Director directly, via the Office of the Director of Compliance and Career Services, and/or Human Resources office. A confidential investigation of the reported incident will be promptly initiated.

Corrective action as a result of violations of Title VII of the Civil Rights of 1964, as amended may include, but not be limited to the following: a written reprimand, suspension with pay, suspension without pay, demotion, termination, student suspension or expulsion.

Any form of willful reprisal against any employee or student who reports sexual harassment or assists in the investigation of such a report is strictly prohibited.

## Policy December 12, 2012

The school makes available information on drug awareness to all students through the Education Department. In compliance with the Drug Free Schools and Communities Act, as amended, a copy of the school's Alcohol and Drug Policy is printed below to ensure that all students at Pittsburgh Institute of Aeronautics are aware of the standards of conduct with respect to alcohol and drugs that affect them.

### **The possession, use, and/or sale of alcohol and/or drugs on any part of the school's premises or at any school sponsored event or activity is strictly prohibited.**

- Students possessing, using, or being under the influence of illegal drugs or alcohol on any part of the school's premises or at any school-sponsored event or activity will be subject to disciplinary action up to and including termination from the school and will be referred to appropriate rehabilitation agencies and/or reported to appropriate legal authorities. The school reserves the right to deny reentry to any student who fails to satisfactorily participate in a prescribed drug/alcohol treatment program.
- Students selling drugs on any part of the school's premises or any school-sponsored event will be terminated from the school and reported to the appropriate legal authorities.

## Post-Accident and Reasonable Suspicion Procedures

- When there is an accident involving a student, the school may request that the student report to a PIA-designated physician or medical center for evaluation. This evaluation will involve appropriate testing, including an alcohol/drug screen. Students refusing to report for a medical evaluation following an accident or refusing to authorize the release of alcohol/drug screen results following an accident on school premises may be terminated from the school.
- When there is reasonable suspicion that a student attending school is unfit for classroom, laboratory, and/or shop activities, the instructor or other employee who initially observed the behavior as well as at least one school administrator will complete a formal observation to determine if further action is necessary. Students who are suspected to be under the influence of drugs or alcohol while attending classes or other activities will be removed from these activities immediately, and may be asked to report to a PIA designated physician or medical center for evaluation. This evaluation will involve appropriate testing, including an alcohol/drug screen. Students refusing to report for a medical evaluation following the school's determination of reasonable suspicion, or refusing to authorize the release of alcohol/drug screen results following the school's determination of reasonable suspicion may be terminated from the school.

## College Consequences

- Any student found in violation of this policy will be subject to disciplinary actions by the Institute up to and including suspension, termination from the program, and/or referral to civil authorities for criminal prosecution. The Institute may also require participation in an appropriate drug and/or alcohol assistance or rehabilitation program.

## Federal Penalties and Sanctions for Illegal Possession of a Controlled Substance

(NOTE: These are only federal penalties and sanctions. Additional state and local penalties and sanctions may also apply.)

21 U.S.C. 844(a)

- 1st conviction: Up to 1 year imprisonment and fined at least \$1,000 but not more than \$100,000, or both.

- After 1 prior drug conviction: At least 15 days in prison, not to exceed 2 years and fined at least \$2,500 but not more than \$250,000, or both.
- After 2 or more prior drug convictions: At least 90 days in prison, not to exceed 3 years and fined at least \$5,000 but not more than \$250,000, or both.

21 U.S.C.853 (a)(2) and 881(a)(7)

- Forfeiture of personal and real property used to possess or to facilitate possession of a controlled substance if that offense is punishable by more than 1-year imprisonment (See special sentencing provisions re: crack).

21 U.S.C. 881(a)(4)

- Forfeiture of vehicles, boats, aircraft, or any other conveyance used to transport or conceal a controlled substance.

21 U.S.C. 844a

- Civil fine of up to \$10,000 (pending adoption of final regulations.)

18 U.S.C. 922(g)

- Ineligible to receive or purchase a firearm.

Miscellaneous

- Revocation of certain federal licenses and benefits, e.g., pilot licenses, public housing tenancy, etc., are vested within the authorities of individual Federal agencies.

## Impact of Drug Related Conviction(s) on Student Financial Aid

Drug related convictions may affect a student's ability to obtain Student Financial Aid. Specifically, students will not be eligible for federal aid during the entire award year unless they complete a qualified drug rehabilitation program or pass two unannounced drug tests given by such a program. Detailed information on how drug related convictions affect your ability to obtain Student Financial Aid can be obtained by the Office of the Director of Financial Aid.

## Impact of Drug Related Conviction(s) on FAA Certification

Any person, who has been convicted of violating federal or state statutes relating to drug offenses, can be denied their application for a certificate or rating up to 1 year after the date of conviction. The violation can be relating to any one or more of the following actions: growing, processing, manufacturing, selling, disposing, transporting, or importing narcotic drugs, marijuana, depressants, or stimulants. They may also face the suspension or revocation of any certificate that they currently hold (AMT Handbook Chapter 13 Part 65.12). Once working in the industry, certificated mechanics face harsh penalties including suspension or revocation of FAA certification for refusal to submit to drug and alcohol testing (AMT Handbook Chapter 13 Part 65.23).

## Economic Effects of Drug and Alcohol Abuse

- Substance abuse costs American society over \$559,000,000,000 each year.
- Frequent drinking and drug use is associated with absenteeism, tardiness, leaving work/school early and poor relationships with coworkers and peers.

## Influence of Drug and Alcohol Abuse on Criminal Activity

- Alcohol and drugs weaken the brain mechanisms that normally restrain impulsive behaviors, including inappropriate aggression.
- The connection between alcohol, drugs and crime is clear. According to the National Council on Alcoholism and Drug Dependence (ncadd.org):
  - Each year, more than 600,000 students between the ages of 18 and 24 are assaulted by another student who has been drinking.
  - 95% of all violent crime on college campuses involves the use of alcohol by the assailant, victim or both.
  - 90% of acquaintance rape and sexual assault on college campuses involves the use of alcohol by the assailant, victim or both.
  - Every day in the U.S., 36 people die, and approximately 700 are injured, in motor vehicle crashes that involve an alcohol-impaired driver. Drinking and drugged driving is the number one cause of death, injury and disability of young people under the age of 21.

## Health Risks of Drug and Alcohol Abuse

- There is a strong correlation between alcohol use and cancers of the mouth, larynx, pharynx, and esophagus.
- The correlation between alcohol and oral cancer is even more pronounced for those who use alcohol and tobacco.
- There is a significant negative impact on the health of children who are exposed to illegal drugs or nicotine and who grow up in a household where drugs and tobacco are abused.
- The health effects of drug abuse are numerous and varied, depending upon the type of drug and frequency of abuse. For more information about the short-and long term health effects of drug and alcohol use, visit [drugabuse.gov](http://drugabuse.gov).

## Additional Informational Resources

- National Institute of Drug Abuse Report to Congress National Institute on Drug Abuse and the National Institute on Alcohol and Alcohol Abuse [www.nida.nih.gov](http://www.nida.nih.gov)
- U.S. Drug Enforcement Administration website [www.usdoj.gov/dea/index.htm](http://www.usdoj.gov/dea/index.htm)
- Bureau of Justice Statistics, Drugs and Crime Facts: Drug Use and Crime [www.bjs.gov/content/dcf/contents.cfm](http://www.bjs.gov/content/dcf/contents.cfm)

## Counseling Services

### Description Of Available Counseling

The following agency is available to employees and students for drug or alcohol counseling, treatment, rehabilitation or reentry programs:

**Washington EAP Services** offers student assistance with a variety of problems which may affect his or her well-being, such as Family and Parenting, Marital & Relationships, Grief and Loss, Financial, Legal, Gambling, School related concerns, and feelings of depression.

### Washington EAP Services

155 Wilson Avenue  
Washington, PA  
1-800-EAP-LINK  
724-223-3430

## Disciplinary Sanctions

In accordance with the regulatory requirement that an IHE (Institute of Higher Education) distribute a clear statement that it will impose disciplinary sanctions for violations of the IHE's standards of conduct, and consistently enforce those sanctions found in Public Law 101-226, be informed that PIA views the use, possession, transfer or sale of alcohol or drugs by all students and employees on school premises or as part of any of its activities as being very serious and subject to disciplinary sanctions consistent with local, State and Federal law up to and including expulsion for the student and termination of employment for the employee and referral for prosecution of employee/student.

## Weapons Policy

PIA does not tolerate the possession of weapons on campus. Possession, use or intent to use any such weapon or potential weapon by any student shall be grounds for immediate dismissal from PIA.

Under this policy, a weapon or potential weapon shall be construed as any contrivance, device, implement, instrument or utensil which may be used to inflict physical harm on any person or persons and is not a prescribed component of the student's required tool inventory. A weapon or potential weapon shall also be construed as a prescribed component of the student's tool inventory which is used in an improper manner for the purpose of inflicting physical harm on any person or persons, or used in a threatening manner toward any person or persons.

## School Vehicles

Students are not permitted to operate PIA's automobiles, vans, trucks or other vehicles licensed for highway use.

Only after thorough testing and under the instructor's direct supervision will a properly qualified student be permitted to operate tugs, mobile ground power units (GPUs) or other aircraft ground support equipment.

## Emergency Evacuation Procedures

The following evacuation procedures are in effect for all PIA buildings.

Posted in each classroom, shop, and laboratory are Emergency Evacuation Charts. Students are responsible to familiarize themselves with the evacuation route indicated on each chart.

The alarm to evacuate an area is one long steady tone emanating from either the class change bell or fire alarm horn. Upon hearing the signal, or receiving other notification from staff members, the student will:

1. Turn off any equipment being operated.
2. Proceed in a calm and orderly manner to the evacuation route selected by the instructor in charge.
3. Walk quickly along the evacuation route.
4. Remain with the class. Roll call will be taken by the instructor, who **MUST** be able to account for every student.
5. No smoking is permitted during drills.

Student safety and the safety of others depend on cooperation. Each individual will be held accountable for misconduct during an emergency evacuation or a routine fire drill.

## Campus Lunchroom

For convenience, a lunchroom is located on-campus.

### Hours:

The lunchroom is normally open to students from 7:15 am - 8:00 am; during morning class changes, lunch periods, and afternoon class changes; from 2:30 pm - 3:30 pm; and during evening make-up sessions. At any other time, students are not permitted in the lunchroom.

### Care of Lunchroom:

Vandalism of vending machines is cause for suspension or termination. Student abuse of vending machines will not be tolerated. If a machine is not working properly, or a refund is in order, it should be reported to the Campus Director or an instructor.

## Visitors

All visitors must register at the reception desk.

### Visiting a Student

In order to minimize classroom/shop interruptions, it is recommended that a visitor's arrival time coincide with either a class change or the student's lunchtime. Visitors needing to see a student under urgent circumstances should report to the reception desk for assistance or by calling 240-347-4805 prior to arrival.

### Visiting a Staff Member

Meetings with PIA staff members must be arranged in advance by calling 240-347-4805.

### School Visits and Tours

Every prospective student is asked to visit PIA to discuss the details of the training programs and to tour the school facilities. To make an appointment, call 412-346-2100 and ask for the Admissions Office.

## Student Advisement and Academic Assistance

Advisement begins in an informal manner at the time of the prospective student's initial interview with the Admissions Department representative. During this interview, the applicant is advised relative to the school's academic provisions for progress, and told whether or not his/her educational background has provided her/him with the basic skills needed to be successful in the selected major of study. In addition, school life, acceptable conduct, and expected interactions with fellow students, faculty, and other PIA personnel are discussed.

Each prospective student must take the Mathematics Skills Assessment (MSA) either prior to or immediately upon enrollment. Within a short time, the results of this appraisal will be discussed with the applicant, and he/she will be advised if remediation is warranted. This is never done to discourage the student; rather, it is a means of providing additional assistance early in the learning process to enhance the probability of academic success. In addition, tutoring services are available for enrolled students after classes on selected days to assist learners who are having difficulty in specific subject areas. There is no tuition charge to enrolled students for tutoring conducted at PIA.

Students who need academic assistance in order to maintain satisfactory progress have the privilege of remaining in school, each day, at the end of scheduled classes to receive personal instruction. Students may avail themselves of this opportunity by requesting it from the Campus Director. There is no charge for this assistance, provided the student is not using it to make up absence in excess of the school's allowable maximum. If so, then the policy outlined in this document (see "Absence" on page 8) will be in effect.

Students are encouraged to discuss their academic or school life problems with their immediate instructor. In matters that are of a different nature and require advisement beyond that which the instructor can provide, the student may seek assistance or EAP referral services from the Campus Director.

Those who are faced with problems of a financial matter may seek advice from the Financial Aid Office.

## **Student Messages Policy**

Emergency messages (messages requiring prompt action) — The student's classroom or shop activities will be interrupted and the student will receive the message in its entirety. The staff will help in all possible ways. Students may leave school after receiving an emergency message.

All other messages — The student will be provided with ONLY the caller's name and telephone number.

## **Cell Phone Use**

### **Cell Phones and Electronic Devices in the Classroom**

Using cell phones or other electronic devices in the classroom setting can hinder instruction and learning, not only for the student using the device but also for other students in the class. Therefore, PIA requires that students adhere to the following rules:

1. PIA prohibits the use of all cell phone applications in classrooms and laboratories, including but not limited to sending and receiving phone calls, text messages and e-mails; internet searching; and playing games.
2. Cell phones and other electronic devices must be turned off during class and make-up time, and must be kept hidden from view.
3. A cell phone is not permitted in the classroom as a substitute for a calculator.
4. When the room is being used for non-instructional purposes (such as during break times or class changes) cell phones and other electronic devices may be used in the classrooms or laboratories only with the approval of the instructor. The instructor retains the right to prohibit these devices at all times in his/her classroom/lab.
5. If a cell phone must be kept on due to a potential emergency situation, the student must inform the instructor in advance. The phone must be on a silent (vibrate) setting. If an emergency call must be taken during a class, the student must leave the classroom prior to answering the call and is not permitted back into the classroom until the beginning of the next period.
6. Instructors must adhere to any individual guidelines regarding assistive devices communicated by the Campus Director for students with disabilities.

# Network Policy

## Regarding Devices connected to PIA Devices

### General Statement

PIA is dedicated to providing a reliable network environment to facilitate education and operations. The PIA policy includes all physical cabling at any campus, wireless technologies, and all remote locations which are connected directly to PIA. In our effort to provide a secure and reliable networking environment, we reserve the right to monitor network activity to aid in the solving of problems encountered with or on the network.

Access to this technology has been allowed to enhance the educational experience of our students, and may be used in training areas only with permission of the attending instructor. Students should only use this access in the course of instruction or for other educational purposes.

**PIA RESERVES THE RIGHT TO PREVENT ACCESS TO THE NETWORK AT ANY TIME, AND TO REVOKE ANY OR ALL PRIVILEGES OR TO CHANGE SERVICE AT ANY TIME IF THE ACCESS IS BEING ABUSED.**

### Acceptable Devices

Devices are to be in good working order and designed not to interfere with other devices connected to PIA's network or other lab equipment. These devices must be used for school related activity. PIA reserves the right to restrict access to devices which are connected to the network through MAC Address or IP address blocking. The Owner is responsible for the use or misuse of the device that is attached to PIA's Networks.

### Security

Security measures should be taken to ensure that the device connected to the network is not vulnerable to compromise. Compromised or problem hosts connected to the network will be blocked until they are repaired. Recommended actions for devices connected to the network include: fully patched Operating Systems; current anti-virus software and virus definitions; secure passwords, personal firewalls, and intrusion detection software.

### Unacceptable Activities while connected to PIA's Network

PIA will not support or condone the activities listed below:

1. Activities which excessively consume network resources.
2. Activities which violate Local, State or Federal Law, and/or International Treaty. This includes, but is not limited to:
  - Providing Services which interfere with the legitimate function of other devices connected to the network
  - Commercial Activities
  - Sending Spam (Unsolicited Bulk and/or Commercial Email)
  - Open E-Mail Relays
  - Denial of Service Attacks
  - Hacking
  - Cracking
  - Probing, scanning or other activities done to learn about other connected devices, whether innocent or malicious in nature (Allowances will be made for System Administrators performing security scans on systems they manage in the course of their job duties.)
  - Packet or Content Sniffing

- Unauthorized access to hosts
  - Illegal distribution of any copyrighted material
3. "Stealing" or "Borrowing" IP addresses
  4. Any activity that tarnishes PIA's professional image

## Response to Unacceptable Activities

PIA will work in cooperation with law enforcement agencies when a crime is committed. General inquiries and requests for assistance may be placed through [admin@pia.edu](mailto:admin@pia.edu). For incidents which do not warrant involvement of law enforcement agencies, PIA will initiate disciplinary action. Hosts which participate in unacceptable activities will be blocked from network access and the responsible party contacted.

## Lost and Found

### Lost Articles

Articles that have been lost in or around the school buildings may be reported to the Campus Director and/or instructor.

### Found Articles

Articles that have been found should be reported to the instructor and taken to the Campus Director.

Lost articles will be retained for six months. After six months, unclaimed articles will be disposed of properly.

## Telephone Numbers

## Student Parking

Free parking for PIA students is available in the front of the building and along the side of the building outside of the fence. Students using these facilities are advised to comply with signs indicating restricted parking sections, stripes defining individual parking spaces, and all other standard traffic direction/warning signs.

## Reporting of Criminal Activity or Emergencies

The Institute is concerned that all situations involving criminal action, emergencies, or policy violations be reported promptly to the appropriate authority. The School actively participates in the United States Department of Education Student Right-to-Know and Campus Security Act. It is the obligation and responsibility of every employee and student to report any situation that falls into the categories specified as criminal action, emergencies, or policy violations. Students will be notified during orientation about specific security policies and concerns they should be aware of while attending PIA. Statistics concerning criminal offenses reported under this Act are available upon request at the time of registration or request for school information.

All facilities of the School are under the supervision of staff members any time they are open to students or the public. Immediate reporting of situations involving security concerns is critical. The following procedures specify the reporting policy in facilities of the Institute.

1. Report all situations to the Instructor or Staff Member.
2. All situations will be forwarded along with investigative information to the Campus Director or his/her delegated representative.
4. The School will promptly investigate any situation reported. Where policies or procedures of the Institute are violated, corrective action will be applied to resolve the situation. If the situation involves a violation of law or an emergency requiring the assistance of government agencies, the Campus Director or his/her designated representative will request such assistance.

## Personal Appearance/Attire

In keeping with state regulations, OSHA mandates, and out of consideration for the rights of other learners, the following student safety/courtesy code has been established.

1. Shirts must be opaque, have sleeves, and must be capable of being tucked into trousers/slacks.
2. Shirts/blouses may not contain illustrations or text which are offensive in nature to any group.
3. Full-length trousers/slacks must be worn. From May 1st until September 30th, a warm weather policy will be in effect. Shorts will be permitted but must be no shorter than 4" above the knee. No spandex, bike, soccer or short-shorts will be allowed.
4. Loose-fitting or baggy clothing may not be worn in the shop/lab areas.
5. Clothing with cutout or torn-out areas may not be worn.
6. Shoes must be of a nature that they offer full foot protection to the wearer. No cloth, open toe, or soft sole shoes may be worn.
7. Socks must be worn.
8. Headwear may not be worn in the classroom. Exceptions will be made for headwear of a religious nature.
9. Dark lens glasses may not be worn indoors.
10. Approved safety glasses must be worn in shop/lab areas.

11. Hair must be either trimmed to a suitable length or restrained in such a manner that it cannot be caught up in moving machinery.
12. Jewelry or other removable body adornments may not be worn in the shop/lab areas.

The instructor may make determinations regarding safety/appearance issues in his/her classroom/shop area(s). In instances of disagreement or uncertainty, the Campus Director or his/her representative will make final determinations concerning safety/appearance issues. All PIA staff members are responsible and empowered to immediately direct any student whose clothing or behavior constitutes a safety hazard.

Exceptions to this code may be granted to individual students through one of the following methods: (A) a written excuse from the student's physician; (B) a written excuse from the Office of the Campus Director. In either case, the excuse must state a specified period of time during which the exemption is in effect. All violations of these regulations will be dealt with in accordance with the procedures described in this catalog.

## Conferences with School Personnel

Students and parents are encouraged to seek the assistance of instructors, or the administrators whenever they feel it is appropriate. Parents may arrange a conference by phone or in writing. Advance notice will facilitate proper preparation (gathering of required documents, information, etc.). A student may arrange a conference with any of the aforementioned parties during regular school hours.

In most cases the student will find that the instructor is readily available to assist in resolving problems. Instructors are available to explain general policies, procedures, regulations, grades, attendance, etc. Unresolved problems should be brought to the attention of the Campus Director or appropriate department Director.

For clarification, gathering of information, or problem solving in the areas of student financial aid programs, placement procedures, grade records, or attendance records, the student is advised to contact a staff member who will then direct the student to the appropriate resource person.

## Student Review of School Records

The Family Educational Rights and Privacy Act (FERPA) is a Federal law that protects the privacy of student education records.

- Adult students have the right to inspect and review their education records maintained by the school. If copies of records are requested, the school may charge a fee for copies.
- Eligible adult students have the right to request that a school correct records which they believe to be inaccurate or misleading. If the school does not amend the record, the eligible student has the right to request a hearing before the Director.
- Generally, schools must have written permission from the eligible student in order to release any information from a student's education record.

For more detailed information on FERPA, a student may visit the online site of the U.S. Department of Education at [www.ed.gov](http://www.ed.gov). Students may review their records by making an appointment with the Campus Director.

## Injury or Illness

All accidents should be immediately reported to the instructor. The severity of the injury will determine the immediate course of action. Subsequent to all accidents, an accident report must be completed. Under no circumstances should a student leave for home, hospital or doctor's office without notifying the instructor. It is important that the student provide current information for the notification of significant persons (parents, guardian, wife, or husband) of an accident.

PIA does not provide health insurance coverage for its students. However, PIA recommends and expects each student to secure health insurance coverage through an appropriate provider. Furthermore, PIA expects students to secure normal medical services through a family physician; however, in the event of injury or other medical emergencies on campus, the nearest designated instructor or staff member will notify (if appropriate) an administrator. If the emergency is deemed serious, the appropriate professional emergency care service will be secured by the administration. PIA refers serious accidents or illnesses to the nearest hospital (or hospital of the student's choice) for emergency care and will notify the student's next of kin. Students must understand that they or their families, not PIA, are responsible for the cost of such emergency care including any necessary ambulance service. At no time will PIA be financially responsible or incur any liability for any related cost associated with student required medical assistance, should PIA assist a student in acquiring medical assistance.

## Campus Resource Center

The resource center contains many volumes which are devoted to general academic subjects as well as periodicals that provide an important resource for term papers, reports, and selective reading.

In addition, computers and internet access are available at no additional charge for assigned and personal research.

### Resource Center Hours

In addition to reading assignments and computer-center projects which occur during scheduled school hours, the Resource Center will be open from 7:15 am to 8:00 am and 2:30 pm to 3:30 pm from Monday through Thursday, and on Friday from 7:15 am to 8:00 am or by appointment.

### Sign-Out Procedure

The student must see a Resource Center staff member to check out materials prior to removing them from the library. The customary sign-out time is fifteen school days. This time may be extended with the consent of the attending staff member.

## Veteran's Policies

### Approved Programs

The Hagerstown campus offers one program: 1900 clock hour Aviation Maintenance Technology program. This program has been approved for VA educational benefits. Refer to Approvals and Accreditation on page 26 for a full listing of approved VA educational benefit programs.

### Previous Credit and Training Evaluation Procedures

PIA will obtain written records on a veteran's previous education and experience, complete a documented evaluation, grant credit where appropriate, advise the veteran and the Department of Veterans Affairs, and maintain all records. The VA will be alerted of any change in enrollment status, to include being placed on academic or attendance probation, changes with scheduling, or termination.

## Student Records and Grade Reports

Permanent grade records are maintained in both physical and electronic structures. Student transcripts are available online and are also kept indefinitely in Pittsburgh at the main campus. Veterans can continually monitor their individual academic progress through PIA's Student Portal. Report cards are issued at the beginning of every semester for the previous semester's work. Final transcripts and report cards are mailed to each student after graduation.

## Refunds

All refunds due to students who receive veteran education benefits will be paid within 40 days of the last day of attendance.

## PIA Hagerstown Campus Course Descriptions: 2015-2016

### Aviation Maintenance Technology Programs

Note: Courses are normally completed in the sequence shown.

### Explanation of Course Alpha Prefixes

- AF.....Subject matter deals primarily with the Art of Fabrication.
- AG.....Subject matter deals with the study of Aviation General topics.
- EL.....Subject matter deals with the study of ELectricity or electronics.
- MA.....Subject matter deals primarily with the study of MAtematics.
- PH.....Subject matter deals with the study of PHyysics and related topics.
- PP.....Subject matter deals with the study of ProPulsion systems.

## Semester One/Unit One

### **MA2101 Aerospace Math (35 clock hrs: 28 Theory, 7 Practical)**

This course is designed to enhance the student's skill and confidence with a variety of practical mathematics disciplines. Subject areas include basic math principles, geometry, scientific notation, algebra I, algebra II, trigonometry, and charts & graphs. The MSA is prerequisite to this course.

### **PH2103 Aerospace Physics (35 clock hrs: 28 Theory, 7 Practical)**

This course is designed to furnish the student with a basic understanding of a variety of physical laws. Topics include atomic structure, measurements and their units, temperature, heat, properties of matter, force and motion, simple machines, light, and sound. MA2101 is a co-requisite for this course.

### **EL2105 Basic Electricity (35 clock hrs: 13 Theory, 22 Practical)**

EL2105 introduces the learner to the basic theories and applications of electricity, and prepares him/her for more complex exposure to the applications of electricity and electronics. Ohm's Law is studied in the classroom and applied in the lab through construction of simple circuits and electrical diagrams. Courses MA2101 and PH2103 are prerequisites.

### **AG2107 Maintenance Practices (45 clock hrs: 11 Theory, 34 Practical)**

This course introduces the student to the fundamentals of drafting and blueprint reading, the use of precision tools, identification of hardware, and the proper use of basic hand tools. All of these skills will be utilized in subsequent courses. AG2107 has no prerequisites.

---

**MA2109 Aircraft Weight & Balance (25 clock hrs: 12 Theory, 13 Practical)**

Course MA2109 introduces the learner to the proper procedures for weighing aircraft, determining moment-arms, using manufacturer's data, and computing center-of-gravity. The student will gain experience performing and applying calculations involving fractions and decimals. MA2101 is a prerequisite to this course.

---

**PH2111 Theory of Flight (25 clock hrs: 22 Theory, 3 Practical)**

Theory of Flight is designed to introduce the student to several important topics concerning aircraft operation. Aircraft component identification, composition of the atmosphere, laws of aerodynamics, and basic aircraft instrumentation are all covered. PH2103 is a prerequisite to this course.

---

**MA2113 Shop Related Math (11 clock hrs: 9 Theory, 2 Practical)**

MA2113 is a synthesis of previously learned mathematics concepts along with several new topics, including the relationships of geometry, algebra, and trigonometry to shop maintenance practices. MA2101 is a prerequisite.

---

**EL2115 Aircraft Electricity (70 clock hrs: 35 Theory, 35 Practical)**

Course EL2115 enhances the ability of the student to grasp more complex electrical concepts by focusing on topics such as electron theory, magnetism, aircraft wiring and soldering practices, and electrical measuring instruments. Related safety practices are also discussed. Courses PH2103 and EL2105 are prerequisites.

---

**EL2117 Aircraft Electrical Systems (60 clock hrs: 30 Theory, 30 Practical)**

EL2117 introduces important aircraft electrical systems, including battery theory and maintenance, aircraft fire protection systems, lighting systems, and landing gear position & warning systems. EL2115 is a prerequisite to this course.

---

**EL2119 Electrical Power Systems I (30 clock hrs: 15 Theory, 15 Practical)**

This course introduces the principles of AC current, DC generators, and voltage regulators, as well as circuit protection devices, motor generators and inverters, auxiliary power units, and alternators. EL2117 is a prerequisite.

---

**EL2120 Electrical Power Systems II (18 clock hrs: 9 Theory, 9 Practical)**

EL2120 gives the learner practical knowledge concerning the operation and maintenance of a variety of electrically operated systems, including DC motors and starters, relays and transformers, magnetic amplifiers, AC motors, synchros and servo mechanisms. Course EL2119 is prerequisite.

---

**EL2123 Advanced Electrical Theory (34 clock hrs: 30 Theory, 4 Practical)**

Course EL2123 provides the learner with practical knowledge of electrical theory subject areas including inductance, capacitance, R-L and R-C circuit analysis, R-L-C circuit analysis, resonance and filters, and vacuum tubes. EL2120 is a prerequisite to this course.

---

**EL2125 Diodes and Transistors (36 clock hrs: 26 Theory, 10 Practical)**

This course covers topics directly related to the electrical and electronic aspects of maintenance. The learner is introduced to semiconductor fundamentals, semiconductor diodes, the zener diode, special application semiconductors, bipolar transistor characteristics, and bipolar transistor operation. EL2123 is the prerequisite course.

---

**EL2127 Special Application Circuits I (15 clock hrs: 10 Theory, 5 Practical)**

This course and its companion, EL2228, introduce the learner to special application circuits, including field effect transistors, thyristors, integrated circuits, and optoelectronic devices. Course EL2125 is a prerequisite.

---

## Semester Two/Unit Two

---

### **EL2228 Special Application Circuits II (10 clock hrs: 5 Theory, 5 Practical)**

This course and its companion, EL2127, introduce the learner to special application circuits, including field effect transistors, thyristors, integrated circuits, and optoelectronic devices. Course EL2127 is prerequisite.

### **EL2229 Amplifiers (32 clock hrs: 20 Theory, 12 Practical)**

EL2229 provides the student with an understanding of the structure and function of basic types of amplifiers. Amplifier biasing and coupling are also discussed. EL2228 is the prerequisite course.

### **EL2231 Operational Amps and Power Supplies (32 clock hrs: 18 Theory, 14 Practical)**

This course extends the student's understanding of amplifiers through the introduction of the characteristics, processes, and applications of operational amplifiers. A detailed discussion of power supplies is also included in this course. EL2229 is the prerequisite.

### **EL2233 Oscillators and Pulse Circuits (30 clock hrs: 17 Theory, 13 Practical)**

Course EL2233 provides the learner with fundamental information concerning the types and functions of oscillators. Attention is also given to pulse circuits, with information relating to waveforms, wave shaping, and types of wave generators. Prerequisite to this course is EL2231.

### **EL2235 Navigation & Communication Systems (44 clock hrs: 24 Theory, 20 Practical)**

This course of study introduces the student to the topics of amplitude and frequency modulation, basic radio principles, avionics systems, and installation and maintenance practices. EL2233 must be taken prior to this course.

### **EL2237 Electrical Synthesis (12 clock hrs: 12 Theory, 0 Practical)**

This final course in electricity reinforces the student's knowledge of electricity and electronics by synthesizing all previously related topics into a coherent compilation. All courses beginning with the prefix "EL" are prerequisite to this study.

### **PP2241 Introduction to Turbine Engines (42 clock hrs: 24 Theory, 18 Practical)**

PP2241 introduces the student to jet engine terminology, related safety practices, the history and development of turbine engines, related physics, factors affecting thrust, air inlet ducts, and compressors. Courses PH2103 and AG2107 are prerequisites.

### **PP2243 Turbine Engine Systems (53 clock hrs: 23 Theory, 30 Practical)**

This course provides the learner with information about the structure and function of turbine engine systems. Subjects covered in this course include combustion sections, turbine assemblies, exhaust systems, manufacturers' publications, lubrication, fuel systems, and ignition. PP2241 is prerequisite.

### **PP2245 Turbine Engine Maintenance (49 clock hrs: 12 Theory, 37 Practical)**

This course introduces the student to turbine engine maintenance practices. Subjects covered in this course include anti-icing systems, engine starting, instrumentation, inspections, and engine trim adjustments. The prerequisite is course PP2243.

### **PP2247 Introduction to Reciprocating Engines (68 clock hrs: 23 Theory, 45 Practical)**

In this course, the student will be introduced to the nomenclature of piston engines, their history and development, the various types of reciprocating engines, engine components, and affiliated devices such as bearings, propeller shafts, and reduction gears. In addition, relevant FAA regulations and the physics related to these types of engines are discussed. There are no prerequisites to this course.

---

**PP2249 Engine Principles (47 clock hrs: 22 Theory, 25 Practical)**

PP2249 is a detailed look at piston engine operation, focusing on horsepower and displacement, related mathematical equations, the two-stroke cycle of operation, the Otto cycle, engine firing orders, valve timing practices, engine lubrication, exhaust systems, and induction & supercharging. PP2247 and MA2101 are the prerequisites for this course.

---

**PP2251 Fuel Metering Systems I (55 clock hrs: 25 Theory, 30 Practical)**

PP2251 and its companion course, PP2352, cover topics that include basic fuel systems, related physics concepts, float carburetors, pressure injection carburetors, fuel injection systems, related maintenance practices, and system troubleshooting. PP2249 and PH2103 are the prerequisites.

---

## Semester Three/Unit Three

---

---

**PP2352 Fuel Metering Systems II (10 clock hrs: 5 Theory, 5 Practical)**

PP2352 is the conclusion to course PP2251. All of the topics covered in that course are blended into a coherent study of fuel metering systems.

---

**PP2355 Engine Overhaul (73 clock hrs: 30 Theory, 43 Practical)**

This course addresses the details of reciprocating engine overhaul, including cleaning, disassembly techniques, hardware replacement, use of maintenance publications, nondestructive testing methods, and use of manufacturer's specifications. Learners disassemble, inspect, reassemble, and run a reciprocating engine. PP2249 is a prerequisite to this course.

---

**MA2357 Boolean Algebra (26 clock hrs: 23 Theory, 3 Practical)**

MA2357 covers the concepts of binary numbers, logic functions, truth tables, and Boolean laws. This course introduces the student to complex logic circuits. MA2101 is a prerequisite.

---

**PP2359 Ignition Systems (74 clock hrs: 30 Theory, 44 Practical)**

Information covered in PP2359 includes the types of ignition systems utilized in piston engine applications and their operating characteristics. Ignition components are closely examined. Attention is also given to magneto ignition systems and their starting aids. PP2249 is a prerequisite to this course.

---

**PP2361 Engine Troubleshooting (39 clock hrs: 31 Theory, 8 Practical)**

This course provides the learner with information including, but not limited to, engine starting and starter maintenance, fuels and fuel systems, lubrication systems, and engine detonation problems. It concludes with a systematic method for practicing reciprocating engine troubleshooting. PP2352 and PP2359 are prerequisite courses.

---

**PP2363 Aircraft Propellers (67 clock hrs: 41 Theory, 26 Practical)**

As the title implies, PP2363 examines the fundamental design of aircraft propellers and their related systems. Topics covered consist of basic propeller engineering for the various types of propellers used in modern aircraft. These types include counterweight propellers, full-feathering props, and turbine engine propellers. Propeller balancing, maintenance, and synchronization are also covered.

---

**MA2365 Powerplant Math (16 clock hrs: 16 Theory, 0 Practical)**

This course focuses on important mathematical concepts as they relate to aircraft powerplants and their systems. Subject areas include algebraic functions, squares and square roots, the Pythagorean Theorem, and ratios & proportions. MA2101 and all courses beginning with the prefix PP are prerequisites.

---

**PP2367 Powerplant Synthesis (16 clock hrs: 16 Theory, 0 Practical)**

This course is an overview of all subjects related to aircraft powerplants, tying them together in a coherent composition. All courses that begin with the prefix PP are prerequisites to this course.

---

**AF2371 Environmental Controls (33 clock hrs: 20 Theory, 13 Practical)**

AF2371 introduces the learner to various aircraft environmental controls, including pressurization, ventilation, ice elimination, and oxygen supply systems. Course PH2111 is prerequisite.

---

**AF2373 Introduction to Metallurgy (67 clock hrs: 30 Theory, 37 Practical)**

Course AF2373 takes a comprehensive look into properties of various metals, the process of heat treating, nondestructive testing methods, corrosion and its control, metal fatigue, and bonded metal construction. PH2103 is a prerequisite course.

---

**AF2375 Fluid Mechanics (33 clock hrs: 14 Theory, 19 Practical)**

This course provides the student with a variety information on fluid mechanics as it relates to aircraft systems. Subject areas covered in AF2375 include hydraulic terms, principles of hydraulics and pneumatics, hydraulic fluids, reservoirs, fluid filters and seals, power pumps, check valve operation, valve disconnects, auxiliary power units, pressure regulation and measurement, actuators, and the use of fluid system schematics. PH2103 and AG2107 are prerequisites to this course.

---

**MA2377 Advanced Weight & Balance (20 clock hrs: 11 Theory, 9 Practical)**

This course reviews the weight and balance principles first addressed in MA2109. It then introduces more advanced skills including the actual weighing of an aircraft, computing of its center-of-gravity, and calculating ratios and proportions. Mathematics principles such as trigonometric functions and vectors are also discussed. MA2109, of course, is a prerequisite for MA2377.

---

## Semester Four/Unit Four

---

**AF2481 Nonmetallic Structures (99 clock hrs: 23 Theory, 76 Practical)**

This course examines the construction, repair, and inspection of aircraft wooden structures, fabric coverings, and plastic components. An in depth study of advanced composite materials is given, including fabrication techniques and repair methods. The course concludes with the application of aircraft finishing materials. AG2107 and PH2111 are prerequisites.

---

**AF2483 Fuel Systems & Electrical Installations (40 clock hrs: 15 Theory, 25 Practical)**

AF2483 covers a variety of topics that will be needed when performing aircraft inspections and maintenance. These include a discussion of fuel system components not previously covered, refueling techniques, wiring procedures, related federal regulations, and electrical systems maintenance practices. AG2107 and EL2117 are prerequisites to this course.

---

**AF2485 Working with Sheet Metal (92 clock hrs: 25 Theory, 67 Practical)**

AF2485 introduces the student to subjects that are of paramount concern in the field of aircraft maintenance. Topics include using various types of sheet metal tools, operating the machinery and equipment employed in sheet metal shops, forming sheet metal, using metal and rivet codes, installing and removing fasteners, interpreting blueprints, repairing primary and secondary structures, and employing special application fasteners. AG2107 is a prerequisite for this course.

---

**AF2487 Welding Technology (57 clock hrs: 22 Theory, 35 Practical)**

This course emphasizes the close inspection of welds employed in structural components. Practical application is utilized to enhance conceptual aspects of the topic. Included in this course is information on welding nomenclature and equipment, welding processes, torch welding procedures, metal identification, welded repairs, exotic metals, brazing, and silver soldering. AF2373 is a prerequisite.

---

---

**AF2489 Aircraft Inspections (82 clock hrs: 12 Theory, 70 Practical)**

During this course, live job conditions are mirrored to provide practical experience performing aircraft inspections. The student will apply knowledge gained from the program to this point. Specific subjects covered in AF2489 include the use of maintenance forms and records and exercising mechanic privileges and limitations. The instructor's permission, rather than any specific course, is prerequisite for participation in this course of study.

---

**AF2491 Landing Gear Systems (32 clock hrs: 12 Theory, 20 Practical)**

AF2491 introduces the learner to all aspects of landing gear systems and their maintenance, including brakes and brake systems, tires and tubes, anti-skid devices, shock struts, shock absorbers, shimmy dampers, nose wheel steering systems, and boost control systems. AF2375 is the prerequisite course.

---

**AF2493 Rigging and Assembly (55 clock hrs: 22 Theory, 33 Practical)**

This course provides the learner with information relevant to aircraft rigging and assembly practices. Among the topics covered are rigging concepts, cables and related components, pertinent hardware, flight controls, helicopter theory, and helicopter rigging. AG2107 and PH2111 are prerequisite courses.

---

**AF2495 Airframe Synthesis (21 clock hrs: 21 Theory, 0 Practical)**

AF2495 is an amalgamation of aircraft general and airframe subject areas covered throughout the program. In this course, all airframe related materials are tied together to give the student a better understanding of the overall operation of modern aircraft. All courses beginning with the prefix AF are prerequisites for this course.

January 1, 2, & 3, 2016  
April 25 & 26, 2016  
May 30, 2016

## Tuition, Fees, and Charges

### Application Fee - None

### Registration Fee - \$150.00.

This fee must accompany the enrollment application at the time that the candidate makes formal registration. The registration fee is not applied toward tuition, and is not refundable except as outlined in this catalog under "Refund Policies."

## Tuition Schedule

Tuition is charged at the rates shown:

<b>Advance Payment</b> .....	<b>\$25,680.00</b>
<b>Tuition per Semester (Full-Time)</b> .....	<b>\$6,420.00</b>
<b>Tuition per Unit (Part-Time)</b> .....	<b>\$6,420.00</b>

The tuition rate is subject to change with 120 days advance notice.

Payments for all terms are due in full two weeks prior to the beginning of classes, unless other arrangements, such as payment options, are made through the Financial Aid Department. Payment options may allow up to four installments, and will be free of interest and/or service charges by the Pittsburgh Institute of Aeronautics.

Academic and tuition credit for comparable prior training may be granted at the discretion of the school, and as outlined in this catalog under "General Information."

## Books, Tools, and Supplies

The charges for books, tools, and supplies are approximate costs and are subject to applicable sales taxes. Because the school does not establish costs for these items, prices may change without notice.

<b>AMT Full-Time Program</b> .....	<b>\$2,022.00</b>
<b>AMT Part-Time Program</b> .....	<b>\$2,022.00</b>

## FAA Certification Fees

Three Federal Aviation Administration (FAA) practical and oral examinations are required for certification: General, Airframe, and Powerplant. The cost is established by the current market rate charged by FAA Designated Mechanic Examiners (DMEs). The typical cost is \$200.00 per exam, for a total of \$600.00.

The FAA also requires three knowledge tests, conducted by computer, be passed for each of the three aforementioned areas. The cost for these exams is established by the test provider, not by the school, and is typically \$115.00 per test, for a total of \$345.00.
