PIA is committed to the pursuit of higher education that is both meaningful to the individual and valuable to society. The Institute believes that it serves the dual functions of providing its learners with opportunities, while furnishing the community with its most valuable resources, skilled men and women who possess the willingness to learn and the propensity to mature as contributing members of society.

To accomplish its objectives, PIA believes that school programs must: (a) develop specific career-related skills, (b) broaden abilities in essential academic areas, and (c) form attitudinal traits compatible with career goals. In order to be effective, these studies must be dispensed through an appropriate collection of instructional techniques, each designed to best achieve its specific objective(s).

In reaching these goals, PIA accomplishes its purpose as a provider of career opportunities and fulfills its role as an institution of higher learning.

School History

The school was founded as the Curtiss-Wright Flying Service in 1927, and became PIA in 1929. From 1929 until 1944 PIA trained airframe and engine mechanics for the aviation industry. In 1944 William J. Graham purchased the school and incorporated Graham Aviation as a division of PIA. An aviation electronics (avionics) course was added to the curriculum in 1979, giving students a choice of training for certification as Aviation Maintenance Technicians or Aviation Electronics Technicians. Since 1929, PIA and the Graham Aviation Division have graduated more than 37,000 and 33,000 students, respectively. PIA graduates have been placed in careers throughout every segment of the aviation industry, including commercial air carriers, aircraft manufacturers and general aviation companies. The PIA campus, located on the Allegheny County Airport since 1946, is situated 8 miles southeast of downtown Pittsburgh.

Reorganization of PIA

On December 1, 1944, Mr. William J. Graham, President of the Graham Aviation Company and pioneer in aviation training, purchased PIA. Mr. Graham became president of the school and under his direction, the existing for-profit corporation was dissolved and the school was reorganized as a non-profit corporation chartered in the Commonwealth of Pennsylvania on February 8, 1946. Mr. Graham's early administrative reorganization plans included the 1944 appointment of Dr. T.B. Lyons to the position of Director.

In May 1946, the school established its advanced phase of training for aircraft mechanics in new shops opened at Allegheny County Airport. The facilities replaced those discontinued when the Bettis Airport location was no longer available. It was decided that the school should move its base of operation from its downtown location to Allegheny County Airport.

A long range plan was developed by the officers of the school which led to the establishment of a fully accredited institute. Even more important, however, were the efforts to have the school develop a curriculum tailored to the industry it served. During the years between 1956 and 1971, the Institute played a major role in efforts to upgrade aviation technical education in the United States. A mechanic training program was conducted at PIA by the Federal Aviation Administration where representatives of the FAA monitored a class of students through the entire program, on a monthly basis. Their findings were used for the updating of the FAA curriculum requirements for all approved schools. In 1967 PIA was acquired by Mr. Jack Graham who became active in the management of PIA as President, CEO, and Chairman of the Board.

In 2005, John Graham III began his tenure as PIA's President. In 2008, John Graham II retired and John Graham III assumed the position of CEO and Chairman of the Board.

Graduates of PIA School of Specialized Technology have been placed with airlines, electronics manufacturers, mechanical repair facilities, the space program, and a host of other industries. Many have become managers and administrative officers for those same corporations. In addition, many of the school's alumni are among the higher echelons of the electronics industry, the transportation industry, and their related technologies. PIA is recognized by the industries that it serves as a preeminent institution of education.

Separate Facilities

In addition to the facility near Pittsburgh, PA, PIA currently operates the following campuses:

Hagerstown

Branch Campus

14516 Pennsylvania Avenue
Hagerstown, MD 21742

Myrtle Beach

Branch Campus

1038 Shine Avenue
Myrtle Beach, SC 29577

Youngstown-Warren

Branch Campus

1453 Youngstown-Kingsville Rd NE
Vienna, OH 44473

Location and Facilities

PIA is located eight miles southeast of the city of Pittsburgh with its campus buildings on Allegheny County Airport, West Mifflin, PA. PIA's airport location provides an ideal atmosphere for aviation training and provides access to the airport.

The total area of school facilities is more than 100,000 square feet. In addition to classrooms and laboratory areas, the campus houses a bookstore and learning resource center.

Travel Directions

PIA's physical address for use with GPS is 5 Allegheny County Airport, West Mifflin, PA 15122. From the northwest, follow the Pennsylvania Turnpike to Cranberry Twp Exit #28. Exit turnpike onto I-79 South to Pittsburgh. Then follow I-279 South to Pittsburgh. Split off of I-279 South to the right onto I-579 South (Veterans Bridge). Follow I-579 South to exit for the Liberty Bridge. Cross bridge and proceed through the Liberty Tunnels. Stay in the right lane through the tunnels and turn onto PA Route 51 South to Uniontown. Follow Route 51 South approximately 6 miles to traffic light at the intersection of Route 51 and Old Lebanon Church Road (U-Haul Rental Agency on the left and Bill Green Shopping Center on the right). Turn Left at the traffic light. Proceed 1 mile to next traffic light and turn right onto Lebanon Church Road. Travel to 4th traffic light and turn left into the entrance of the Allegheny County Airport.

From the southwest follow I-70 east to Pennsylvania Route 51 North to Pittsburgh. Continue north for approximately 17 miles to traffic light at the intersection of Route 51 and Old Lebanon Church Road (U-Haul Rental Agency on the right and Bill Green Shopping Center on the left). Proceed through traffic light and exit Route 51 immediately after U-Haul Rental Agency onto Lebanon Church Road. Proceed 2 miles and turn left into the entrance of the Allegheny County Airport.

From the east use Pennsylvania Turnpike to Exit #75, New Stanton then follow I-70 west to Route 51 North to Pittsburgh. Continue with directions in previous paragraph.

Equipment

The equipment used for the students' practical training exceeds a value of \$20,000,000.00. This equipment consists of numerous reciprocating and jet engines, airplanes, and electrical and electronic equipment. The school's tool rooms maintain the precision and specialty tools needed to perform work on airworthy airplanes, powerplants and electrical equipment. In addition to the basic equipment used by the student, PIA also has a fleet of aircraft used for maintenance training, which includes a North American Sabreliner, a Rockwell Jet Commander, two Beechcraft U8-Ds, a Beechcraft D50C, two Cessna 310s, a King-Air 90, a Bell H-58 helicopters, and a Hughes Model 269 helicopter.

Minimum Requirements

Applicants must fulfill these minimum requirements to commence training at PIA's School of Specialized Technology:

- Possess a High School Diploma or GED Equivalency
- Be at least 16 ½ years of age

Due to Federal Aviation Administration (FAA) regulations and graduate employment requirements, applicants must be at least 16 ½ years old before they can commence training.

Suggested Courses

Applicants interested in pursuing the Aviation Maintenance Technology program are recommended to have successfully completed the following high school courses:

- Algebra I
- Basic Physics

Applicants interested in pursuing the Aviation Electronics Technology program are recommended to have successfully completed the following high school courses:

- Algebra I
- Algebra II
- Trigonometry
- Basic Physics

The aforementioned courses are not required for admission. However, they provide a solid foundation for the programs at PIA's School of Specialized Technology.

Application and Admission Procedures

Applicants for admission to PIA's School of Specialized Technology are required to visit the school for a personal interview and a tour of the school's facilities prior to beginning classes. The tour and personal interview are conducted by a qualified Admissions Representative and are intended to give the prospective student an understanding of the following:

- AMT and AET Programs
- Instruction Methods
- PIA's Learning Environment
- Program Goals and Outcomes
- Admission Policies
- Program Availability
- Academic Assistance
- Graduate Placement Statistics

Tours are generally conducted Monday through Friday by appointment. Tours can be arranged for either individuals or small groups by calling the Admissions Department at 1-800-444-1440. Visitors are encouraged to ask questions, so that they can make informed decisions concerning the career fields presented, costs, and methods of payment (for info on Financial Assistance, see page 17).

In order to apply for entrance to PIA's School of Specialized Technology, the prospective student must receive a current school catalog and submit a complete admission application form and \$150 registration fee. Applicants who are still attending high school may be conditionally accepted, pending graduation from high school. Applicants who possess a high school diploma or GED certificate may be conditionally accepted, pending proof of high school graduation or equivalency. Acceptable proof of high school graduation is an official final transcript. If it is not possible to

secure the transcript, PIA may, at its discretion, accept a letter from the appropriate high school principal, or a PIA official may photocopy the applicant's original high school diploma. Applicants with a GED certificate may have a PIA official photocopy their original GED certificate. All applicants must also complete a Math Skills Assessment (unless waived by the Director) as part of the enrollment process.

Accepted and conditionally accepted students will receive an enrollment packet which includes an enrollment agreement, disclosure statement, letter of acceptance or conditional acceptance and contact info form.

Due to strict industry regulations pertaining to criminal convictions, the school reserves the right to reevaluate a student for admission to the program if he/she has disclosed the presence of a criminal background on the enrollment agreement. In such instances, a meeting with the student will be held by the School Director or Director of Compliance and Career Services to determine if such a background would prevent or seriously hinder the student from benefiting from the educational programs offered by the school.

If an applicant pays the registration fee, but is not accepted into the program selected, the registration fee will be refunded in its entirety. Refer to page 15 of this catalog for applicable registration refund possibilities.

Math Skills Assessment

Unless waived by the Director, the Mathematics Skills Assessment (MSA) must be taken by all applicants for admission into PIA's School of Specialized Technology. Its purpose is to determine the math abilities of the prospective student, allowing the Director to determine if the applicant possesses the skills required for success in his/her chosen program of study, or if some form of preparatory/transitional training is needed. The results of this examination cannot predict student success with 100% accuracy; however, it does give the faculty guidance in addressing student needs.

Registration Expiration

In the event a student cannot begin his/her studies on the starting date of the class for which the applicant registered, credit will be granted for the registration fee toward the next three class start dates. After that period, the registration will be considered "expired" and the applicant must pay a new registration fee for any future classes.

Student Health Coverage

PIA does not provide health insurance coverage for its students. However, PIA recommends and expects each student to secure health insurance coverage through an appropriate provider. Please review the Injury and Illness section for additional information on page 41.

Student Housing Assistance

PIA assists students in locating suitable off-campus housing accommodations. Students who desire housing assistance are referred to appropriate apartments, apartment complexes, and private homes within commuting distance of the campus. Roommate referral assistance and furniture rental referral assistance are also available upon request. Students requesting housing or roommate assistance should contact the Admissions Office 4 to 6 weeks before classes start.

Students with Disabilities

Pittsburgh Institute of Aeronautics is committed to providing a support system that partners with students to be successful in their academic pursuits, regardless of the challenges they face. As such, and in cooperation with students, PIA is dedicated to providing appropriate services and accommodations to students with documented disabilities, in compliance with Section 504 of the Rehabilitation Act of 1973, the Americans with Disabilities Act, and other applicable regulations. As a primary initial responsibility, students with disabilities who desire accommodations at PIA must make that request and provide required documentation of any disability to appropriate staff as soon as possible, and preferably before the start of the first semester/quarter of attendance. We call this step “self-identification,” and no further steps in providing accommodations can occur until the student takes this first step. Requests for accommodations and documentation of any disability should be provided to: Director, Pittsburgh Institute of Aeronautics, P.O. Box 10897, Pittsburgh, PA 15236.

Students requesting reasonable accommodations for testing and skill performance will be contacted for a meeting to discuss the nature of the accommodation(s) requested. Expenses for any learning assessments are the responsibility of the student.

Students should be advised that accommodations may not be available on FAA and/or licensing exams. The licensing body is the sole determining agency on whether or not accommodations are available for testing.

Nondiscriminatory Policy

PIA admits students of any race, religion, age, creed, marital status, veteran status, political belief (or affiliation), color, national origin, sex, sexual preference, physical challenge, handicap or disability to all rights, privileges, programs and activities generally accorded or made available to students at the school. The institute does not discriminate on the basis of race, religion, age, creed, marital status, veteran status, political belief (or affiliation), color, national origin, sex, sexual preference, physical challenge, handicap or disability in the administration of its educational policies, activities, scholarships and loan programs, career services, and/or other school-administered programs.

Title IX of the Educational Amendments of 1972 (Title IX), 20 U.S.C. §§ 1681 et seq., and its implementing regulations, 34 C.F.R. Part 106 also prohibits gender-based harassment, which may include acts of verbal, nonverbal or physical aggression, intimidation, or hostility based on sex or sex-stereotyping, even if those acts do not involve conduct of a sexual nature. The Director of Compliance and Career Services (refer to STAFF) serves as the Title IX coordinator, and can be contacted at 5 Allegheny County Airport, West Mifflin, PA 15122 (412-346-2100).

Credit for Military Experience

Individuals with military experience as a line or crew chief mechanic can present their DD214 or an official letter from their commanding officer verifying the type of work and equipment worked on and total time in service. If the military training was earned as part of an accredited program, PIA may grant transfer credit as applicable. If the military training/experience was not earned as part of an accredited program, PIA will review these records to determine opportunities for by-pass testing, which will indicate what credits, if any, will be granted.

Credit for Comparable Education, Training, and Experience

At the discretion of PIA, credit may be granted for comparable education and training. This credit may be based on approved course work from other recognized schools or training facilities (when course descriptions match closely), or from the results of evaluation tests (when course descriptions do not match closely enough). These examinations may be written, practical, or a combination of both depending on the area of education or training being evaluated. PIA also accepts certain College Level Examination Program (CLEP) results that meet the school's minimum score requirements. A maximum of 16 credit hours may be granted through CLEP. Students who have been enrolled in courses at another institution relating to the program they wish to enroll in at PIA will be advised to submit a transcript to the Admissions Office for evaluation. The school attended shall provide a transcript of the student's grades. An official of the school shall authenticate the transcript. The transcript must state the curriculum in which the student was enrolled, whether the student satisfactorily completed that curriculum, and the final grade(s) the student received. A course catalog and description from the institution attended by the student must be submitted with the transcript. Students must have received a "C" or higher in any course they wish to be considered for credit transfer purposes. The materials will be evaluated for transfer of credit applicability, after which the student will be advised as to how many credit hours they may receive. A minimum of 40 credit hours must be completed in residence in order to receive an associate degree from PIA.

It is imperative that Students requesting a transfer of credit provide PIA with all necessary documentation, or make arrangements with the transferring institution to provide PIA with the necessary documentation, prior to the start of classes.

Pittsburgh Institute of Aeronautics is a member of the Pennsylvania Commonwealth Prior Learning Assessment (PLA) Consortium. As such, PIA evaluates experiential learning and prior education based upon Advanced Placement (AP) courses, military training/experience, industry training programs, and professional licenses/certifications. Assessment of credit toward PIA degree and non-degree programs can be through a recognized national evaluation (CLEP, DANTES, ACE), a school challenge examination, or through a skill demonstration.

To be eligible for PLA, a candidate must be currently enrolled in a PIA degree or non-degree program, and be able to provide acceptable verification of the prior Learning. Assessment will not take place once the term in which a challenged course is offered has begun. For a student enrolled in an aviation maintenance technology program, credit may not be granted for certain courses when prohibited by 14 CFR, Part 147.

As the receiving school, PIA will be the sole determinant of what learning and/or experience is acceptable for PLA.

Transfer of credits from one educational institution to another is always subject to acceptance by the receiving school. PIA holds articulation agreements with a number of colleges and universities. Articulation agreements vary in amount and conditions for which transfer credit is awarded. A student may get details of transfer credit and articulation agreements from the Director of Compliance and Career Services. If a student decides to transfer out of a PIA program into another facility, he/she should speak to the Director of Compliance and Career Services. A student may leave PIA in good standing if all financial obligations to PIA are satisfied and all materials supplied by PIA are returned. PIA will then prepare a transcript listing all the grades obtained by the student. When a student signs a release, the transcript will be sent to a third party so chosen by the student. Students continuing their education at, or transferring to, other institutions must not assume that credits earned at PIA will be accepted by the receiving institution. An institution's accreditation does not guarantee that credits earned at the institution will be accepted for transfer by any other institution. Students must contact the receiving institution to determine what credits, if any, the institution will accept. It is the student's duty to check the articulation agreement and/or transfer policy of any institution they wish to transfer into. Students must be aware that some articulation agreements are based on FAA certification and not necessarily individual coursework.

Foreign Student Information

PIA's main campus is authorized under federal law to enroll non-immigrant alien students. Foreign students who wish to attend PIA must comply with the following requirements:

- 1) Certification of an acceptable grade on the TOEFL (Test of English as a Foreign Language) written, computer or internet-based exams (*), or verification of English language proficiency by educational transcripts.
- 2) Verification of financial capability to meet school and living expenses.
- 3) Name of the student's sponsor while attending PIA.

When these requirements have all been satisfied, the prospective student must submit a completed admissions application along with the \$150.00 registration fee in order for PIA to issue a SEVIS form I-20. Students at PIA may be approved for F-1 or M-1 status.

(*) Acceptable TOEFL Scores:	WRITTEN	COMPUTER-BASED	INTERNET-BASED
Applicants who have no prior experience in their major of study	500	173	61
Applicants who have at least one year of formal training in their major	480	157	54

Daily Class Schedule/Hours of Attendance

Class Size

Enrollments and class sizes are regulated by the appropriate governing agencies. Accordingly, student/instructor ratios cannot exceed 25:1 in the shop/lab environment, and cannot exceed 50:1 in the theory classroom.

Periods of Study

The curriculum for all full-time programs is comprised of periods of study referred to as quarters. Each quarter consists of 59 days of study and 354 clock or contact hours.

Classes are in session five days a week, Monday through Friday, from 8:00 am to 2:30 pm. Exceptions are scheduled holidays, vacation days, and faculty in-service days as listed on the school calendar insert provided with this catalog. On scheduled class days the PIA building is unlocked at 7:00 am. At this time, a student can enter the building and proceed to assigned classroom, shop or laboratory area, lunchroom area, or an instructor's office for a prearranged appointment or to an assigned make up area. Morning make up is arranged through the instructor.

All classes begin at 8:00 am unless otherwise specified. Students are expected to be at their assigned locations for morning roll call.

The daily class schedule consists of six 50-minute periods. Morning class changes of ten to fifteen minutes provide ample time for students to move from location to location and be prepared to continue their morning learning activities, which will continue until lunch time.

The student's lunch period, between periods 3 and 4, is 30 minutes in length, at which time they may use either the school's facilities or off-campus facilities.

Ten to fifteen minute breaks are provided for afternoon class change, after which classes will resume as per the issued schedule.

The PIA instructional staff is available to assist students after classes. Arrangements can be made for fulfilling make up requirements, and/or getting additional assistance with any of the program material.

Regular dismissal occurs at 2:30 pm each school day unless specified otherwise.

Dismissal will always be preceded by a roll call. For shop/laboratory students, roll call will be taken at predetermined locations. Students must not leave this location until dismissal. Classroom students are expected to remain in their seats until roll call is completed and the instructor dismisses the class.

To minimize congestion and maximize safety, students are encouraged to exit the building and parking areas in an orderly manner. Acts which are considered to present safety hazards will not be tolerated.

Early Dismissal

Early dismissal, when permitted, is counted as a period of absence. Students are required to get permission from their instructor when leaving before the end of the scheduled day. Note: Excessive absence accumulated due to early dismissals is to be considered very serious and may be considered as a reason for interruption of training.

Tardiness

Any student not present at the beginning of the first scheduled period of the day is considered as tardy and must report to his/her instructor. The exact number of minutes of tardiness will be recorded and transcribed into the student's permanent records. Tardiness is treated as a period of absenteeism.

Absence

PIA is regulated by a number of governing agencies. Because they do not all agree on the parameters dealing with absence and grading criteria, PIA policies address these issues by complying with the most stringent regulations governing the school. Accordingly, all students are required to attend 98% of the scheduled contact hours. Any absence in excess of 2% must be made up by the learner before he/she can graduate.

Students will be notified at certain intervals throughout the quarter for excessive absence. If a student's absence reaches a certain, predetermined amount (calculated based on contact hours in which the student is enrolled), the student will be placed on a provisional status wherein no additional time can be missed prior to the end of the term. If the student misses additional time while on provisional status, the student will be considered "FA" (Failure due to Absence).

An appeal process will be available for students with extenuating circumstances. An evaluating Director will review a student's absences along with any documentation provided by the student and make a determination on a case-by-case basis. Students may stay enrolled at PIA pending the outcome of the appeal. The following reasons are typically considered to be extenuating circumstances (This list is not exhaustive):

1. Hospitalization with documentation
2. No-fault Court appearances with Court documentation – this does not include situations where the student is a party to the legal action
3. Job interviews arranged by student or PIA Career Services, with documentation
4. Military service with Military Orders
5. Death in the immediate family (spouse; biological, step or foster children; parent; spouse's parent; grandparent; spouse's grandparent; siblings; spouse's siblings). Obituary notice including student name or documentation from funeral home is required.

Special Provisions for Military Service Members. Military Members who are scheduled to be deployed should provide the Campus Director and Student Records Office with documentation and notification as far in advance as possible. For further details please see Student Records Office.

Class cuts are not tolerated. Class cuts will be considered a form of absenteeism. Any student involved in cutting classes may face disciplinary action.

Any student who is absent from school for a period of five (5) days without notifying PIA of the reason for his/her absence will be removed from the school's roll sheets and considered as "with-drawn." In order to reenter, the student must apply for readmission, and he/she must submit an acceptable reason for the absence. It must be shown that corrective action has been taken to prevent recurrence of the absence. When a student applies for re-admittance, he/she will not be required to retake the MSA.

If a student misses more than the prescribed net absence in a quarter, but does not exceed a maximum limit, the student's work for the term will be considered incomplete due to absence. To complete the term, absence beyond the prescribed net absence must be made up in the term which it occurred prior to advancing to the succeeding term. Certain exceptions may apply to the above-mentioned policy, and said exceptions will be determined based on an internal hearing process held before an evaluating school official. Determinations will be made on a case-by-case basis. If a student disagrees with the decision of the school official, an Appeal request may be made.

Make-up Time

All absence in excess of the allowable must be made up and paid for at the student's hourly tuition rate at the time of graduation. The maximum permissible absence in any term must not exceed the prescribed net absence hours, or the work for that term will be considered as incomplete due to excessive absence. Any absence beyond the prescribed net absence must be made up in the term in which the absence occurred prior to advancing to the succeeding term.

Make-up time for absence in excess of the allowable amount will be billed. The rate per hour will be the current quarterly tuition divided by 354.

Make-up work is not permitted for the purpose of receiving Veterans Administration training allowances.

Make-up Class Schedule

Upon appointment, make up time can be scheduled Monday through Friday from 7:30 am to 8:00 am and 2:30 pm - 3:30 pm unless otherwise posted. Additional times may, but are not required to, be made available by each faculty member at his/her discretion. In addition, opportunities for evening make-up time are tentatively scheduled from 2:30 pm - 7:00 pm, on the last four Wednesdays of the term. The specific dates for each term are subject to change, and will be announced or posted.

Records and Procedures

Accurate and detailed attendance recording is the responsibility of the instructor. The instructor will verify a student's presence (at minimum) at the beginning and ending of the morning session, at the beginning and ending of the afternoon session, and when the class moves from one shop/classroom to another. Random roll calls may be conducted as required.

Student attendance records reflect the following information:

1. Date and amount of absence for each occurrence.
2. Number of late arrivals and early departures.
3. Total absence by term.
4. Accumulated absence.
5. Make-up time required and completed.

Advising

When a student is absent for three consecutive days, the instructor provides notice to the appropriate personnel. An attempt will then be made to contact the student to determine the reason for the absence.

Students are advised for excessive absence at prescribed intervals throughout the term. Documentation of advisement regarding student absence becomes a part of the student's permanent record.

School Delay/Closing

Pittsburgh Institute of Aeronautics attempts to provide an uninterrupted training schedule with few school closings/delays due to inclement weather or other reasons. To the students, this means on-time graduation and a minimum of inconveniences. Weather related delays and closings are determined based on the road/parking conditions at the PIA campus, and not necessarily on conditions in the surrounding areas. Although PIA classes may still be in session during a weather event, commuting students are advised to make their own decision as to the safety of travel during inclement weather.

In the event that a school closing/delay is necessary, the students will be notified by the following means:

1. Text Alerts – to sign up for PIA Pittsburgh, text PIA1 to 79797.
2. Announcements will be given to TV stations: WPXI (Channel 11), WTAE (Channel 4) and KDKA (Channel 2)

Student Complaint/Grievance Procedure

Full consideration will be given to student complaints concerning any aspect of programs, facilities, and all services offered by or associated with PIA. The following complaint/grievance procedure is intended as a formal process to submit any complaint for consideration. Prior to entering a formal complaint, students are encouraged to speak openly to members of the school faculty and administration. Reasonable measures will be taken to preserve the confidentiality of information that is provided and to protect persons who report the information from retaliation.

Any student wishing to submit a formal complaint must follow the procedure below.

1. A student must present to the Director any complaint relating to any: (a) programs, facilities, and all services offered by or associated with the school; (b) action or alleged misrepresentation by an employee or representative of the school; (c) discrimination or harassment based on race, religion, color, age, sex, sexual orientation, national origin, disability, gender or any other protected status by any student, applicant, faculty member or other school employee, or visitor or invitee of the school; and (d) school activity. The complaint may be oral or written. The Director will promptly acknowledge receipt of the complaint and maintain proper written documentation of the complaint for future reference.
2. The school Director or the appropriately designated school official will meet with the student to discuss and respond to the complaint. The administrator's response may be oral or written and will address the specific complaint and indicate what, if any, corrective action has been proposed or accomplished. All discussions will be documented.
3. Within three (3) school days of any such discussion, the appropriate administrator will prepare a written summary of the discussion, including any agreed upon or proposed solution of the student's complaint. The Director will take the necessary steps to ensure that any agreed upon solution or other appropriate action is taken.

Unresolved Complaints

If the complaint cannot be resolved after exhausting the institution's grievance procedure, the applicant may file a complaint with the State Board of Private Licensed Schools, Pennsylvania Department of Education, 333 Market Street, Harrisburg, PA 17126-0333, Phone: 717-783-6788.

If the complaint has not been resolved by PIA to the satisfaction of the student, the complaint may also be referred to the Accrediting Commission of Career Schools and Colleges (ACCSC), 2101 Wilson Blvd., Suite 302, Arlington, VA 22201, Phone: 703-247-4212, Fax: 703-247-4533; or the website at: www.accsc.org/Student-Corner/. A copy of the Commission's Complaint Form is available at the school and may be obtained by contacting the Director (see "Staff").

Appeals Request

Students who wish to appeal certain determinations made by the Institute, may do so via a written request to the school Director. All appeals must be initiated within 24 hours of the incident or determination in question. Formal appeals will be reviewed by the Director's office, and the student will be informed of the outcome in writing. Appeals are permitted for the following issues:

1. Withdrawal/Dismissal/Leave of Absence determinations
2. Unfavorable Evaluations
3. Disciplinary Actions

Student Grading and Progress Reports

After each term of study, a progress report is issued to the student. Students should review the report as soon as it is received. Any potential discrepancy should be reported to the Student Records department immediately. The following grading system is used for all degree programs:

Grading System

Grades are calculated using the grade point system (see chart). Although individual quizzes, written tests, and practical exams are scored as a percentage, course results are recorded by letter grade, and quarter and program progress are determined as grade point averages (GPA).

The term progress report and the final transcript indicate student achievement by grade point average (GPA). To determine grade point averages, multiply the value of the letter grade received (0, 1, 2, 3, or 4) by the number of credit hours assigned to the course (1 through 4). For example, a letter grade of 'B' received for a course assigned 3 credit hours equals a total of 9 quality points. A letter grade of 'C' received for a course assigned 2 credit hours equals a total of 4 quality points. Next, add the number of quality points earned (in the example = 13), and divide by the total number of credit hours earned (in the example = 5). The resulting value (2.60) is the student's GPA. It should be noted that transferred credits are NOT used in this computation.

The student transcript includes the following information:

- Student name and ID number
- Major/Program completed (if applicable)
- Start date
- Applicable School Code(s)
- Courses taken
- Letter grade for each course completed
- Credits earned in a given term of study
- Total credits received
- GPA for a given term of study
- Cumulative GPA

Following is a table used to convert percentages, letter grades, and grade-point values.

PERCENT	LETTER	G-P VALUE
90 - 100	A	4.00
80 - 89	B	3.00
70 - 79	C	2.00
60 - 69	D	1.00
0 - 59	F	0.00

Coding System

In lieu of issuing grades for a term, circumstances may warrant the issuance of one of the following codes.

CODE MEANING

CR.....Credit granted

IIncomplete Course

FA.....Failure due to absence

FGFailure due to grades

FIFinancially incomplete

UP Unsatisfactory Progress

TI Terminated (incomplete)

WC... Withdrawal (complete)

W..... Withdrawal (incomplete)

Satisfactory Progress

The PIA grading policy requires that a learner must have achieved at least a 2.00.

GPA at the end of each term. Any student who receives a final term GPA of less than 2.00 is placed on academic probation and must repeat the entire term before he/she can advance to the next quarter or unit. A student who receives an unsatisfactory final grade for any course is considered as having failed the course. Courses are divided into two categories for this purpose. All academic courses require a minimum grade of "D"; a grade of "F" is considered unsatisfactory and constitutes a failure. All technical courses require a minimum grade of "C"; a grade of "D" is considered unsatisfactory and constitutes a failure. Therefore, passing each academic course with a minimum grade of "D" and each technical course with a minimum grade of "C" may not be sufficient to progress to the next term if the student's GPA is less than 2.00. In addition, due to certain licensing agency requirements, a student who receives a score of less than 70% on any practical exam (project) must repeat the course, regardless of any other grades attained.

Individual Examinations. When a student receives a written test score of less than 60%, the examination may be retaken under the following conditions: 1) BOTH the instructor and the student determine that a retake is warranted; 2) The test is retaken within five (5) school days of the failed attempt; 3) The student understands that the highest possible grade he/she can receive for the retaken exam is 60% ("D"). This policy does not apply to quizzes, or shop/lab projects; 4) Only two retakes are permitted for any exam.

The learner must have satisfied all attendance requirements, making up excess absence prior to the start of the next term. In addition, all exams and projects must be completed prior to the start of the next term. Finally, all financial obligations to the school must be met prior to advancing to the next term.

Although it is PIA's policy to supply transcripts to students when properly requested, transcripts issued to students who have not satisfied all grade, attendance, and/or financial obligations will be marked with a stamp identifying the deficiency.

The PIA attendance policy requires that a learner must have a net absence (time missed minus time made up) of no more than the prescribed amount in order to advance to the succeeding quarter. Additional attendance requirements can be found in the "Absence" section of this document on page 8.

Regardless of the reason for unsatisfactory progress, students MUST complete their selected program of study within 1.5 times the normal duration of completion. For example, a 21-month program must be completed in 31.5 months of attendance or less.

Retaking Courses

A course which is taken and receives a grade of "incomplete" must be completed with a passing grade no later than nine (9) months after the first attempt. A student cannot progress to the subsequent quarter of study until all courses designated for a given quarter of study have been passed.

Sequence and Scheduling of Courses

Cancellation/Alteration of Course Offerings – Pittsburgh Institute of Aeronautics reserves the right to alter, including cancel, course offerings if enrollments, resources and/or other circumstances do not meet criteria as determined by judgment of the Administration. In such instances, PIA will make every effort to offer the student an alternate and equally appropriate sequence of courses. If such an alternate sequence is not available, the student will be required to take a one-term break in training and register for the next set of available courses leading to his/her program completion.

Disruption of Training due to Student Factors – PIA students, regardless of major, must be aware that failing or withdrawing from a term/course, taking a leave of absence, or otherwise altering the original course distribution established upon enrollment may result in a course scheduling conflict. In such circumstances, PIA will make every effort to offer the student an alternate

and equally appropriate sequence of courses. If such an alternate sequence is not available, the student will be required to take a temporary break in training and register for the next set of available courses leading to his/her program completion.

Conduct Requirements

At the time of enrollment, each student is required to sign an enrollment agreement which states that the student will abide by all regulations and policies as outlined in the enrollment agreement, this catalog/student handbook, and as presented by the staff of the Institute. Any violations of the regulations or policies may result in disciplinary action up to and including suspension or dismissal from the Institute. Refer to Code of Conduct for additional Information on page 31.

Termination of Students

The Institute reserves the right to reject any applicant who does not meet the required standards, or to expel any student who does not abide by the rules and/or regulations, behaviorally and/or scholastically, as outlined in this catalog, student handbook, and the enrollment agreement.

A student may be terminated from the school for unsatisfactory academic progress, nonpayment of tuition, excessive absence or tardiness, or failure to abide by rules and policies established by the school. The termination date will be the student's last date of attendance.

Other reasons for dismissal include, but are not limited to the following:

1. Failure to comply with attendance policies
2. Submission of forged documents
3. Conviction of a Felony
4. Failure to meet academic requirements
5. Failure to meet practical (shop) requirements
6. Failure to comply with rules, regulations and policies of the Institute
7. Unprofessional, unethical or insubordinate behavior
8. Any action or inaction which causes harm to another
9. Proven illegal use of controlled substance
10. Fighting
11. Harassment
12. Reckless or unauthorized use of vehicles
13. Reckless or unauthorized use of shop equipment
14. Theft
15. Intentional damage to school equipment/vehicles/property
16. Failure to participate in/comply with school-mandated EAP programs and recommendations
17. Other serious or repeated violations of the school's rules and/or policies

Request for Reinstatement following Termination

A student seeking to return to school may be granted reinstatement under the following conditions: 1) he/she must meet minimum school admission requirements and academic criteria (refer to "Term Progress") in force at the time of reentry; 2) he/she must be in compliance with the school's attendance policy (refer to "Absence", on page 8) at the time of reinstatement; 3) he/she must be recommended for reinstatement by the Academic Dean or Director; 4) he/she must have met all financial obligations to the school up to the date of reinstatement; 5) he/she must be free of any sanctions imposed by the school, including suspensions or other forms of disciplinary action; and 6) he/she must be free of any unfulfilled requirements mandated by the EAP program.

A student seeking to return to school and granted reinstatement under the afore mentioned criteria will enter the applicable program of study at the point where all of these standards have been met, even if that means that certain classes previously attended must be retaken, and all applicable conditions have been satisfied, including the payment of course/term tuition and the completion of academic requirements.

Refund Policies

Applicant Rejection. All monies paid by the applicant will be refunded if his/her application for admission is rejected or enrollment is denied by the school.

Registration Cancellation. Any applicant may cancel his/her registration prior to the beginning of the class by requesting a cancellation in writing and mailing it to the school. If the request for cancellation is postmarked within seven (7) calendar days following the date of the enrollment agreement and prior to the start of the training program, all monies including the registration fee will be refunded. Upon cancellation after the seventh calendar day following the date of the enrollment agreement but prior to the beginning of the training program, monies paid to the school will be refunded except the registration fee. However, if the cancellation occurs prior to ninety (90) days before the beginning of the applicant's original training program, 50% (\$75) of the registration fee may be refunded in addition to the other monies paid. Notice of cancellation must be in writing and delivered to the school.

Withdrawal from the Program. When a student begins training and withdraws prior to completion of any term, a refund of any tuition overpayment is made as outlined in this paragraph. Accrued tuition is computed through the last day of attendance, and refund of overpaid tuition, if any, is made on a pro-rata basis of 100% according to the number of days remaining beyond the last day of attendance. The refund is made within 30 calendar days of the official date of withdrawal. All students, regardless of their method of payment, are subject to the same refund policy. Information concerning refunds for third-party funding agencies (Title IV, Veteran's Administration, WIA, etc.) can be obtained from the Financial Aid Office.

Request for Withdrawal or Leave of Absence

Students are encouraged to make an appointment with the Academic Dean or Director of Student Services prior to initiating any request for temporary or permanent leave. However, students may withdraw from PIA at any time. Students wishing to withdraw from a program are required to visit the Student Records Office to complete the necessary forms.

Students may be granted a Leave of Absence (LOA) from their program for reasons deemed acceptable and necessary by the Institute. A student may request a temporary period of absence from Pittsburgh Institute of Aeronautics (PIA) due to extenuating academic, medical or personal circumstances that prevent a student from participating fully in his/her program of study. A student must apply in advance and all requests for leave must be submitted in writing, signed and dated. The student must provide a reason for requesting the leave and a reasonable expectation when they will return. If enrollment is temporarily interrupted for a leave of absence and the leave of absence does not expire, the student will return to school in the same progress status as he/she had prior to the leave of absence. A leave of absence in NO WAY reduces the obligation on the part of the student to complete his/her program within the allotted time frame. Details on time frame should be directed to Financial Aid Office.

The Director of Financial Aid and Student Services will review all leave requests and determine whether the student is approved for a Leave of Absence (LOA). A student who meets the criteria and is granted an approved LOA is not considered to have withdrawn, and no Return of Title IV calculation is required.

If the student's request for leave is determined to be a Withdrawal (W/D) and the student received financial aid and is a Title IV loan recipient, he/she will be subject to the Federal regulations governing the return of Title IV funds. A refund of any tuition overpayment is made as outlined in this paragraph. PIA will calculate the amount of grant, loan assistance and earned tuition through the last date of recorded attendance. The refund of overpaid tuition is made on a pro-rata basis of 100% according to the number of days remaining beyond the last date of recorded attendance.

This refund is made within 30 calendar days of the official date of the withdrawal. All students, regardless of their method of payment, are subject to the same refund policy.

The maximum time allowed for an approved leave of absence is 180 days in any 12 month period. Students who do not return at the expiration of an approved leave of absence will have their enrollment status changed to a withdrawal and must apply for re-admission. Due to the change in enrollment status PIA will begin the return of Title IV funds outlined in the previous paragraph. Information concerning refunds for third party funding agencies (Title IV, Veteran's Administration, WIA, etc.) can be obtained from the Financial Aid Office.

If the student re-enters after 180 days, his/her remaining financial aid (as applicable) will be calculated on the remaining time to complete the program. This may lower the amount of eligible financial aid when the student re-enters.

If the student re-enters after 180 days, he/she will lose his/her six (6) month grace period (as applicable). Any active student loan(s) will enter repayment and the student will be responsible for monthly installments. Please note, once a student uses the 6 month grace period, it may not be reinstated for any reason. Based on the student enrollment status they may utilize an in-school deferment to postpone repayment of his/her loans until graduation.

Reentry Process

Contact the Student Records Office to request reentry. The reentry date will be based on space available and the satisfying of all pending financial, academic, and make-up time obligations. The current hourly rate of tuition will apply to all reentry students. The Financial Aid Department will offer assistance in preparation and submission of student aid paperwork.

Should the student decide to re-enroll in the Institute, he/she will retain credit for any classes successfully completed before the withdrawal. If withdrawal occurred under unsatisfactory academic status, a student is required to meet any outstanding academic requirements for the term in which he/she withdrew prior to enrollment in the subsequent term. A student may start where they left off at time of withdrawal, provided no curriculum changes have occurred, and with the approval of the Academic Dean and/or Director of Student Services. PIA reserves the right to deny a student's reentry into a program of study if such reentry is not in accordance with sound educational practices.

Transfer of Major Program

A student may transfer from one major of study/program to another under the following conditions:

1. The student requesting the transfer must be in good academic standing at the time of the transfer.
2. The transfer of major/program must be approved by the Academic Dean and/or Director of Student Services.
3. The student requesting the transfer must submit a completed and approved enrollment agreement for the new major of study/program to the Student Records Department.
4. This enrollment agreement must be accepted by the Student Records Department prior to the start of the final quarter/unit of study for the student's new major/program.

Students who transfer to another major of study/program will receive full credit for courses successfully completed in the initial major of study/program if those courses are directly transferable (refer to the school catalog for lists of required courses). The student may, or may not, receive partial credit for courses that are not directly transferable from the initial major/program to the new one. Partial credit will be determined by the Director of Student Services. The Director's Office will observe all federal, state, and accreditation requirements for program completion in making such determinations.

Financial Assistance for Students

Financial assistance is available to qualified students attending PIA through various loans, grants, and scholarship programs.

The Institute is approved by:

- Pennsylvania Higher Education Assistance Agency (PHEAA)
- U.S. Department of Education

PIA does not participate in campus based financial aid programs. Certain federal and state financial assistance programs require that the applicant is registered with the Selective Service System. Details on the financial aid programs are available from the Financial Aid Office.

How to Apply for Financial Aid

The first step in the financial aid process is submitting the Free online Application for Federal Student Aid (FAFSA). The web site is www.fafsa.ed.gov. The result of the application, the Student Aid Report (SAR) will be e-mailed or mailed to the student. The SAR will provide the Expected Family Contribution (EFC). The FAFSA must be submitted every year. Students can apply between January 1st and June 30th of the following year.

Pell Grant

Pell Grants are awarded only to undergraduate students, which are those who have not earned a bachelor's or graduate degree. The student's EFC and cost of attendance determines the Pell Grant award. The funds are paid directly to the school and applied to the student's tuition account. If there is an overpayment, a refund is made to the student by check. The funds are disbursed once per term.

PHEAA Grant (Pennsylvania only)

The State Grant Division of PHEAA will send Pennsylvania residents a Status Notice based on the FAFSA. To be considered a Pennsylvania resident an individual must have lived in Pennsylvania for at least 12 months before the filing date of the FAFSA. This period must be exclusive of any time spent at any educational institution in PA. The student must complete the notice and return it to PHEAA. The status notice usually asks the student to provide information that is not on the FAFSA; such as the student's graduation date, high school name and address or GED information. After the information is processed, PHEAA will send an award notice to the student. Pennsylvania's deadline for the state grant is August 1st for new students or May 1st for previous year recipients. PHEAA must receive the FAFSA on time for the student to be eligible to receive grant funds. The amount of the award is determined by PHEAA based on dependency status, cost of attendance, EFC, the student's Pell award and housing status. The funds are disbursed once per quarter and applied to the student's tuition account or refunded to the student if there is an overpayment. A student who has a 4 year degree is not eligible for the PHEAA grant.

Direct Loans

The Federal Direct Loan Master Promissory Note is completed by the student and provides multiple subsidized and/or unsubsidized loans over a maximum ten year period. Loan limits depend on the academic year, whether you are a dependent student and whether you receive subsidized (the government pays the interest while you are in school at least half time) or unsubsidized (interest begins at the time the loan is disbursed) loan(s). Loans are disbursed to the student once per term and electronically transferred to PIA. The funds are applied to the student's tuition account. If there is a refund, the student has the option of taking the refund or leaving the money on their account for the subsequent semester.

PIA provides online Entrance and Exit Counseling in addition to reference materials to assist the student in the loan process and responsibilities.

Direct Plus Loans

Federal Direct Plus loans are credit based loans the parents can take out for their dependent undergraduate children. The Federal Direct PLUS Loan Application and Master Promissory Note must be completed. A credit check is required for each loan term. The loan is usually disbursed once per term. The funds are sent electronically and applied to the student's tuition account. If there is a refund available, a check is mailed to the parent. Repayment begins after the money for the loan term has been disbursed, unless the parent requests an in school deferment.

Borrower's Responsibilities

Once the borrower has received the loan funds he/she has assumed certain responsibilities.

Those responsibilities are as follows:

1. Repayment of the loan: The loan funds must be repaid to the lender on an approved schedule. The loan must be repaid if the student graduates or if the student withdraws from training.
2. Employment status: If the student becomes unemployed and cannot continue the repayment of the loan he/she may request a deferment from the lending institution. A request for deferment is not a guarantee of deferment. The student must continue payments until he/she has written approval that the deferment has been granted.
3. Notification of changes: The borrower must notify the lender of any changes that take place that could affect the loan account. Examples: name change, address change, or social security number change.

NOTE: All students must attend an exit interview before graduation or termination of classes.

The financial aid office is open from 8:00 a.m. to 4:00 p.m., Monday through Friday. Please call 412-346-2100 and ask for Financial Aid if you have any questions or concerns.

Scholarships

PIA Memorial Scholarship Fund – Maximum of five awards annually. To be eligible to apply for these scholarships, students must :

1. Be enrolled full-time in an Associate in Specialized Technology degree program or Aviation Maintenance program at PIA or one of its branch campuses, and
2. Have completed at least one academic quarter/semester at PIA as of the scholarship deadline.

Funded by PIA Memorial Scholarship Fund.

Association for Woman in Aviation Maintenance (AWAM) – PIA funds up to four annual awards in the amount of 25% of current tuition rate per quarter, available to women enrolling for the first time in a degree program at PIA's main campus, and whose start date for training is after the scholarship deadline. Minimum requirements: Submission of application to AWAM, including 200+ word essay, letter of recommendation. Recipients selected by representatives of AWAM. Scholarship award distributed on a per quarter basis. Recipients must maintain 3.0 GPA throughout program of study to continue eligibility. Additional information available through Financial Aid Office.

Aviation Council of Pennsylvania (ACP) – One annual award: \$2,000 for student currently enrolled in aviation related program. Minimum requirements: 2.75 GPA, need for funding. Funded by ACP.

Professional Aviation Maintenance Foundation (PAMF) – Several annual awards (varies in quantity): ranging from \$1,000 to \$2,000 for students enrolled in aviation-related programs. Competition is at the national level. Funded by PAMA, National and PAMA, Western PA.

Additional scholarship opportunities are available and posted for students throughout the year. Contact the Financial Aid Office for details.

Graduation Requirements

Following are the minimum graduation requirements for students attending one of PIA's programs:

- The student must have achieved a cumulative GPA of 2.00, or higher. In addition, the student must have passed every shop/lab project with a score of 70% or better. He/she must have achieved a letter grade of "C" or better for every technical-subject course, and a letter grade of "D" or better for every academic-subject course.
- All absence in excess of the allowable 2% has been satisfactorily made up.
- All financial obligations have been met to cover tuition, make-up time, books, supplies, tools, fees, etc., according to school policies.

In addition, Aviation Electronics students must have passed either the FCC General Radiotelephone Operator's licensing examination (U.S. citizens), or the equivalency test (non-U.S. citizens).

Career Services

Objective of the Career Services Department

The goals of the career services department include introducing the students to a career development consciousness at the beginning of training; nurturing a keen awareness and understanding of the career development process; updating students on a regular basis throughout their training regarding industry demands and career opportunities; answering student questions and addressing concerns; and most importantly, ensuring that every graduate has the best possible placement opportunity.

Procedure

Career services for the student's initial job begins months prior to graduation. A synopsis is prepared for each graduating class which is disseminated to numerous aviation and related companies across the country. Students are briefed on aviation industry resource information. Utilization of this information enables the student to begin sending resumes and requesting applications. The interview process is detailed and instruction is given on proper decorum, dress and professional conduct.

Career Services personnel will diligently assist each student with preparation of all the necessary documents required by the employer, and arrange and schedule employer interviews and/or job fairs. PIA does not guarantee jobs. Ongoing career services assistance is provided for all alumni of PIA.

Student's responsibilities: As they progress through their training, students must strive to maintain a high GPA, a good attendance record, and a positive attitude toward learning and teamwork. Business attire is required for participation in all school sponsored interviews.

Student Council

Student Representatives meet periodically with the Administration of the school in order to discuss student concerns and work in concert toward improving the educational experience at Pittsburgh Institute of Aeronautics. Following are the standards for selection and performance.

Eligibility:

- The representative must be willing to make him/herself available for scheduled meetings after class hours.
- All students who are making satisfactory academic progress in the term presently attended are eligible to serve as the class representative.

Nominations:

- Nominations for class representative shall be held within the first ten days of the term.
- Any student may nominate a fellow classmate as the representative; and the nomination becomes official when "seconded" by another classmate (other than the person nominated).

Elections:

- Election for class representative shall take place on the seventh day of the term by secret ballot.
- All ballots will be distributed and collected by the individual designated by the instructor.
- The nominee receiving the greatest number of votes will serve as the class representative. The nominee receiving the second greatest number of votes will serve as the alternate representative.

Duties:

- The class representative will render the viewpoints of the class during all meetings, even though these viewpoints may or may not be his/her own.
- The representative will report the minutes of all meetings to his/her class within 48 hours of their distribution.
- In the event that he/she cannot perform the duties of class representative, either temporarily or permanently, he/she must inform the elected alternate so that person may replace the representative in all duties.

Tool Requirements

The tools listed here may be purchased from any source. As a service to its students, PIA permits vendors to visit the school and address new students concerning their tool needs. Acquisition of the tools listed is a requirement for successful progress. Students who do not obtain the required tools at the times indicated will be sent home by their respective Instructors, and will not be permitted to reenter school until they have acquired the prescribed tools.

Required Tool List

The student must possess the tools listed on the first day of the quarter indicated. These are new tools, which **MUST** be acquired for each quarter of study. Some tools used, particularly in later terms, are those previously purchased by the student, and are not listed here. The student may obtain an inventory of all tools required for a particular quarter of study from the appropriate instructor.

The following list of tools is intended to be accurate as of the date of this publication. However, since requirements can change on a quarterly basis, students should consult the bookstore for the most updated listing. In instances where there are discrepancies between this publication and the bookstore listing, the bookstore listing shall prevail.

FIRST QUARTER

- Soldering pencil, 25 watt, grounded tip

SECOND QUARTER

- Allen wrench set (up to 5/16")
- Combination wrench set (up to 1")
- Flashlight
- Hammer, soft face, 12-oz
- Hammer, 4-oz Ball Pein
- Hemostat
- Inspection mirror
- Pliers, 6" combination (slip-jaw)
- Pliers, 6" diagonal cutters
- Pliers, fine needle nose
- Pliers, duck bill
- Pliers, round nose
- Scale, 6" steel
- Screwdriver, common, 4" shank
- Screwdriver, common, 6" shank
- Screwdriver, Phillips, #1 x 3"
- Screwdriver, Phillips, #2 x 4"
- Socket set, 1/4" drive, 12 point, with extension & bits
- Toolbox
- Tweezers, curved tip
- Wire strippers

THIRD QUARTER

- Crescent wrench, 4-6"
- Pocket knife
- Screwdriver, common, stubby 3/16" x 1 1/2"
- Screwdriver, common, pocket #0 x 2"
- Screwdriver, Phillips, stubby 3/16" x 1 1/2"
- Screwdriver, Phillips, pocket #0 x 2"
- Screwdriver set, miniature or jewelers
- Mini grabber and test leads

FOURTH QUARTER (AMT)

- Adapter, 1/4" to 3/8"
- Adapter, 3/8" to 1/4"
- Crows Foot Set, 3/8"
- Drive, 3/8-3/4"
- C-Clamp (2) 4 in.
- Drill set, 10 piece
- Extension bar, 3/8" x 6"
- Feeler gauge set
- Inspection magnifier, 10x
- Magnet, pick-up
- Punch, center
- Screwdriver, common (3/8"), 12"
- Socket set, 3/8" drive
- Speed handle, 1/4" drive
- Speed handle, 3/8" drive

FOURTH QUARTER (AET)

- Alignment tool kit
- Inspection magnifier, 10x
- Pin Vise
- Pliers, 90 degree flush cutters

FIFTH QUARTER (AMT)

- Aviation snips, straight
- Clecos, 3/32, 1/8, 5/32, and 3/16
- Cleco pliers
- Cold Chisel, 1/4" Flat
- Dial caliper, 0 to 6"
- Drill bits, #5,11,13,18,21,30,40, and 30 cobalt
- File handles (3)
- File, half round, 8"
- File, mill (bastard cut), 10"
- File, mill (bastard cut), 6"
- Hammer, Ball Peen, 12 oz.
- Hardware Gauge
- Jewelers Files
- Knife, putty, 1 1/2"
- Needle, curved Needle, straight
- Nibbling tool
- Nut and Bolt Gauge
- Punch, pin 3/32"
- Punch, pin 1/8" Punch, pin 5/32"
- Respirator
- Scale, 12", 1/64 increments
- Scissors, 3-4"
- Square, combination,12"
- Tape Measure

FIFTH QUARTER (AET)

- Extractor, integrated circuit chip

SIXTH QUARTER (AMT)

- Ignition wrench set

SIXTH QUARTER (AET)

- Pliers, Ignition
- Scribe
- Tweezers, Fine point #5
- Ignition Wrench Set

SEVENTH QUARTER (AMT)

- Hacksaw
- Welding Tip

SEVENTH QUARTER (AET)

- None

Tool Box and Tool Locker Regulations

For tool box identification, it is necessary that the student place his/her name on both ends of the tool box. Students are advised that PIA's tool lockers will accommodate a maximum size tool box of 8 1/2" x 8 1/2" x 20", which is of sufficient size for the required tools. The student must supply a two-foot length of chain and padlock for the independent securing of his/her tool box within the cage style tool lockers.

NOTE: Although tool lockers are provided for student tool storage, PIA will not be responsible for the loss of tools in any manner.

Textbooks, Kits, and Supplies

PIA requires the acquisition of all pertinent textbooks and applicable shop/lab supplies. The PIA bookstore maintains these items in inventory. Students are expected to obtain books and supplies prior to the start of each term.

Required Textbooks

The student should refer to the list of required publications provided by the bookstore and on the PIA website to determine the reading materials needed for any particular course of study.

KITS AND SUPPLIES

FIRST QUARTER

- Calculator, (suggested TI-30XIIS), Drafting kit
- Safety glasses (OSHA approved Z-87 code)

SECOND QUARTER

- Cotton Scalp Cap
- Masking Tape (3/4" - 1")
- Multimeter, digital, with Temperature Probe
- Solderless Connector Kit
- Wire and Terminal Soldering Kit

THIRD QUARTER

- Ear Plugs or other Hearing Protection

FOURTH QUARTER (AMT)

- None

FIFTH QUARTER (AMT)

- Acid brush
- Marker, blue or red
- Paint brush, 2"
- Panel Fastener Kit

SIXTH QUARTER (AMT)

- None

SEVENTH QUARTER (AMT)

- Composite kit
- Gloves
- Welding Goggles
- Welding Tip Cleaner

FOURTH QUARTER (AET)

- AM/FM Radio Kit
- Coax Cable Kit
- Soldering Practice Kit

FIFTH QUARTER (AET)

- None

SIXTH QUARTER (AET)

- None

SEVENTH QUARTER (AET)

- None

Required Core Curriculum

All full-time programs share 39 credit hours of common core required courses, affording the student the opportunity to change his/her major of study any time during the first academic year. The first academic year consists of three quarters of study which are:

First Quarter	General Studies	(17 Credit Hours)
EN101	English Composition	3.0
GS111	Blueprint Reading	1.0
GS113	Safety & the Environment	1.0
HI104	World History – Aviation	3.0
MA102	Foundations of Mathematics	4.0
PH117	Basic Physics	4.0
PH119	Introduction to Electricity	1.0

Second Quarter	Electricity/Publications	(11 Credit Hours)
EL125	Practical Electricity	3.0
EL126	Electrical Systems	3.0
GS127	Using Reference Materials	2.0
MA106	Mathematics for Technology	3.0

Third Quarter	Electronics/Instruments	(11 Credit Hours)
EL135	Introduction to Electronics	3.0
EN105	Technical Writing	3.0
GS136	Introduction to Instruments & Controls	2.0
GS137	Advanced Instruments & Controls	3.0

Credit Equivalency

Clock hour/credit hour equivalency is based on the ratios of 34 clock hours being equal to one (1) credit hour for technical subject courses, and 16 clock hours being equal to one (1) credit hour for academic subject courses. A clock hour is defined as: “a one-hour period including at least 50 minutes of student/instructor contact,” also sometimes referred to as a “contact hour.”

Credit hour is a measurement, not necessarily an indicator of transferability. Transfer of credits from one educational institution to another is always subject to acceptance by the receiving school. Even though PIA employs a quarterly academic schedule, its credit hours are calculated according to semester hours. This is done to help accommodate the transfer of credits to various institutions with which PIA holds articulation agreements. Most of these schools employ semester-hour systems.

Transfer Credit

PIA holds articulation agreements with a number of colleges and universities. Articulation agreements vary in the amount and conditions for which transfer credit is awarded. A student may get the details of transfer credit and articulation agreements from the office of the Director of Compliance and Career Services.

Students must contact the receiving institution to determine what credits, if any, the institution will accept. It is the student’s duty to check the articulation agreement and/or transfer policy of any institution they wish to transfer into. Students must be aware that some articulation agreements are based on FAA certification and not necessarily individual coursework. An institution’s accreditation does not guarantee that credits earned at that institution will be accepted for transfer by any other institution.

Aviation Maintenance Technology Program

Associate in Specialized Technology Degree

Seven Quarters of Study – 21 Months: 79 Credits – 2,478 Clock Hours

Graduates of the Aviation Maintenance Technology (AMT) Program (full-time) are awarded the Associate in Specialized Technology (AST) degree. The curriculum for this program not only meets Pennsylvania Department of Education (PDE) criteria for conferral of the degree, but it also satisfies the requirements of 14 CFR (Code of Federal Regulations), Part 147, making the graduate eligible for FAA Airframe and Powerplant (A&P) certification examinations. This program is designed not only to meet the aforementioned requirements, but also to provide the skills needed for entry-level employment in the aviation maintenance industry.

The following courses are listed in their most commonly assigned order; however, there are several approved sequences of courses which can be assigned to a student based on student or institutional requirements.

AMT Associate Degree Curriculum

Core Courses: 39 Credits (Quarters 1, 2, and 3) See page 24 for outline of Core Courses.

Major Courses: 40 Credits (Quarters 4, 5, 6, and 7)

Fourth Quarter	Propulsion Systems	10 Credit Hours
PP241	Introduction to Turbine Engines	2.0
PP242	Turbine Engine Technology	3.0
PP245	Introduction to Reciprocating Engines	3.0
PP246	Reciprocating Engine Technology	2.0

Fifth Quarter	Aircraft Structures	10 Credit Hours
AF253	Non-Metallic Structures	1.0
AF255	Introduction to Metallic Structures	2.0
AF256	Working with Metallic Structures	3.0
AG251	Basic Systems Maintenance	4.0

Sixth Quarter	Advanced Powerplant	10 Credit Hours
AG266	Fuels & Fuel Systems	2.0
EN208	Professional Communication	1.0
PP265	Advanced Engine Overhaul	2.0
PP267	Ignition Systems	2.0
PP268	Propeller Systems	2.0
PP269	Advanced Engine Maintenance	1.0

Seventh Quarter	Advanced Airframe	10 Credit Hours
AF371	Working With Composite Materials	2.0
AF373	Fluid-Powered Systems	4.0
AF375	Welding Technology	1.0
AG377	Advanced Aircraft Maintenance	3.0

Aviation Maintenance Technician Job Description

Duties of the aviation maintenance technician include inspections, component replacements, overhauls, extensive repairs, troubleshooting, and servicing of aircraft and aircraft systems.

Details regarding requirements for FAA testing are available through the Office of the Director of Campus Operations.

Qualifications for Federal Aviation Administration (FAA) Certification

To be eligible for a technician certificate and associated ratings a person must be at least 18 years of age, understand the English language, or in the case of an applicant who does not meet this requirement and who is employed outside of the United States by a U.S. air carrier, have this certificate endorsed "Valid only outside the United States," and have passed all of the prescribed tests within a period of 24 months (FAR 65.71). Each applicant for a technician certificate or rating must present either an appropriate graduation certificate from a certificated aviation maintenance technician school or documentary evidence, satisfactory to the Administrator of 1) At least 3,000 work hours of practical experience with the procedures, practices, materials, tools, machine tools, and equipment generally used in constructing, maintaining, or altering airframes, or powerplants appropriate to the rating sought or 2) At least 5,000 work hours of practical experience concurrently performing the duties appropriate to both the airframe and powerplant ratings (FAR 65.77).

Attainment of all FAA certifications is not a requirement for graduation, since they cannot be fully accomplished until after the student has completed the approved subject areas; however, it is school policy that all AMT students pass the FAA oral, practical, and written examinations for General and Powerplant (or General and Airframe, as applicable in alternate course scheduling arrangements) prior to advancing to their final quarter of study. The Director of Campus Operations may grant an extension to the deadline for completion of these exams, but the extension may not exceed two (2) calendar weeks.

Graduates of PIA's AMT program are qualified to test for the FAA Airframe and/or Powerplant certificate(s), as appropriate. In order to secure these certifications, the graduate must pass a battery of written, practical, and oral examinations prescribed by the FAA. In accordance with FARs 65.71 and 65.77, PIA graduates, having successfully completed their written examinations, can arrange for practical examinations by calling 412-346-2100 or inquiring at the administration offices.

Knowledge (Written) Examinations

The FAA requires three knowledge (written) tests be passed for Airframe and Powerplant certification. FAA knowledge tests are administered via computer terminals at an approved testing center (PSI/CATS).

Oral and Practical Examinations

Each applicant for a technician certificate or rating must pass oral and practical testing on the rating he/she seeks. The tests cover the applicant's basic skill in performing practical projects on the subjects covered by the written test for that rating (Regulation 65.79).

According to Federal Aviation Regulation Part 183 (Representatives of the Administrator), private persons can act as representatives of the Administrator in testing persons for the purpose of issuing airman certificates. Such a person is referred to as a designated mechanic examiner (DME). For the student's convenience, PIA maintains in-house DME's.

Authorization to Take the Oral and Practical Examinations Prior to Written Examinations

In accordance with FAR 65.80, whenever PIA demonstrates to an FAA inspector that any student has made satisfactory progress at the school and is prepared to take the oral and practical tests prescribed by FAR 65.79, that student may take those tests during the final subjects of training in the approved curriculum, before meeting the applicable experience requirements of FAR 65.77 and before passing each section of the written tests prescribed by FAR 65.75.

Aviation Electronics Technology Program

Associate in Specialized Technology Degree

Seven Quarters of Study – 21 Months: 79 Credits – 2,478 Clock Hours

Graduates of the Aviation Electronics Technology (AET) Program are awarded the Associate in Specialized Technology (AST) degree. The curriculum for this program not only meets Pennsylvania Department of Education (PDE) criteria for conferral of the degree, but it also prepares the learner for the Federal Communications Commission (FCC) General Radiotelephone Operator License (GROL) examination. This program is designed not only to meet the aforementioned requirements, but also to provide the skills needed for entry-level employment in the aviation electronics industry.

The following courses are listed in their most commonly assigned order; however, there are several approved sequences of courses which can be assigned to a student based on student or institutional requirements.

AET Associate Degree Curriculum

Core Courses: 39 Credits (Quarters 1, 2, and 3) See page 24 for outline of Core Courses.

Major Courses: 40 Credits (Quarters 4, 5, 6, and 7)

Fourth Quarter	Intermediate Electronics	10 Credit Hours
EL243	Diodes, Transistors, and Semiconductors	3.0
EL244	Applications of Amplifiers and Power Supplies	4.0
EL247	Electronic Techniques and Practices	3.0

Fifth Quarter	Digital/Microprocessors	10 Credit Hours
EL252	Basic Digital Techniques	2.0
EL254	Advanced Digital Techniques	4.0
EL257	Introduction to Microprocessors	2.0
EL258	Digital Applications for Electronics	2.0

Sixth Quarter	Navigation/Communication	10 Credit Hours
EL261	Advanced Radio Theory	2.0
EL262	Communications Transceivers	3.0
EL263	Navigation Systems	3.0
EL264	Individualized Audio & Entertainment Systems	1.0
EN208	Professional Communication	1.0

Seventh Quarter	Advanced Avionics	10 Credit Hours
EL372	Avionics Shop Practices	1.0
EL374	Microwave Systems	4.0
EL376	Radar Surveillance and Weather Avoidance	2.0
EL378	Automatic Flight Control Systems	3.0

Aviation Electronics Technician Job Description

Duties of the aviation electronics technician include inspections, and trouble-shooting of aircraft electronics systems. The “avionics” technician must be able to isolate malfunctions, and make necessary equipment changes or repairs. Tasks may be performed either on the aircraft (line maintenance) or in the shop (bench maintenance).

FCC Certification

A GENERAL RADIOTELEPHONE OPERATOR LICENSE (GROL) is required to adjust, maintain or internally repair Federal Communications Commission (FCC) licensed radiotelephone transmitters in the aviation, maritime and international fixed public radio services. It conveys all of the operating authority of the Marine Radio Operator Permit (MROP). Electronics technicians are required to maintain, internally repair and test a variety of transmission type equipment. Consequently, a graduation requirement for the Electronics student is to have passed the General Radiotelephone Operator License examination.

Qualifications for FCC Certification

1. Be a legal resident of (or employable in) the United States.
2. Be able to receive and transmit spoken messages in English.
3. Pass a written examination covering basic radio laws required to repair and maintain radio transmitters and receivers.

Preparation for Certification

Subject material presented in quarters one through six of the Aviation Electronics program prepares the student for examination.

GROL Written Examinations

The Federal Communications Commission's General Radiotelephone Operator License testing consists of two exams (24 and 100 questions, respectively) covering the fundamentals of electronics and other technical matters, operating and technical rules in the aviation and maritime services, and maintenance techniques as necessary for repair of transmitters and receivers. Total time allotted for completion of the examinations is three hours.

Testing Deadline for Aviation Electronics Students

An individual whose major is in an area of electronics must pass the Federal Communications Commission's (FCC) General Radiotelephone Operator's License (GROL) examination prior to advancing to their final quarter of study. NOTE: Since those who are not U.S. citizens are ineligible to hold an FCC GROL, these students must pass an equivalency exam prior to advancing to their final quarter of study.

Ship Radar Endorsement Certifications

Although the Ship Radar Endorsement is not a qualification for graduation, it is advisable for the student to obtain this endorsement since aircraft radar is extensively used in general and commercial aviation.

FCC Examinations and Regulatory Fees

As per federal law, an examination fee and a regulatory fee will be required for taking the GROL exams. An examination fee will be required for the ship radar endorsement. Fees are variable and are determined by the FCC. A current fee schedule is available through PIA's PSI Test Center. Fees must be paid in full prior to the administration of any FCC exam. Retesting of any failed exam will incur additional examination fees.

Approvals and Accreditation

- Federal Aviation Administration Avionics Repair Station Certificate HE1R189K
- Federal Aviation Administration approval HE1T189K
- Approved by the Pennsylvania Department of Education to award an Associate in Specialized Technology Degree
- Licensed by the Pennsylvania State Board of Private Licensed Schools
- Accredited by the Accrediting Commission of Career Schools and Colleges (ACCSC). Visit www.accsc.org for more information on accreditation.
- Approved for Pennsylvania Higher Education Assistance Agency (PHEAA) grant programs
- Approved by the Department of Education for the Federal Direct Student Loan Program (FDLP)
- Approved for the training of veterans:
 - Montgomery GI BillChapter 30
 - Veterans Educational Assistance Program (VEAP)Chapter 32
 - Dependents Educational Assistance (DEA)Chapter 35
 - Montgomery GI Bill Selected ReserveChapter 1606
 - Reserve Education Assistance Program (REAP)Chapter 1607
 - Vocational RehabilitationChapter 31
 - Post 9-11 GI BillChapter 33
- Approved as an Institution of Higher Learning (IHL) for veteran training
- Approved by the Bureau of Vocational Rehabilitation, Commonwealth of Pennsylvania
- Approved by the Ohio State Board of Proprietary School Registration
- Approved by the West Virginia Council for Community and Technical College Education
- Authorized under Federal law to enroll non-immigrant alien students
- Accredited by the National Center for Aerospace & Transportation Technology (NCATT)

Executive and Administrative Staff

John Graham III	<i>President/CEO</i>
Suzanne L. Markle	<i>Executive Vice President/School Director</i>
Gary E. Hoyle	<i>Director of Campus Operations*</i>
Jason S. Mongan	<i>Director of Compliance and Career Services*</i>
Jonathan S. Vukmanic	<i>Director of Financial Aid & Student Services*</i>

PIA is dedicated to providing its students the privileges, opportunities, and protections which encourage and maintain a safe and productive learning environment.

The following acts are prohibited at Pittsburgh Institute of Aeronautics. In addition to the listings below, students are to reference and adhere to specific policies outlined in this document and the enrollment agreement.

Acts of Academic Dishonesty, including but not limited to

1. Plagiarism – presenting the work of another as one’s own work.
2. Preparing work for another that is to be used as that person’s own work.
3. Cheating by any method or means.
4. Facilitating academic dishonesty in any way.
5. Unauthorized Collaboration.
6. Multiple Submissions.
7. Falsification of assignments.
8. Falsification of make-up work paperwork.
9. Falsification of any attendance related paperwork.

Acts of Social Misconduct, including but not limited to

1. Violence – physical abuse, direct threats of violence, harassment, intimidation, participation in any activity to disrupt any function of PIA, reckless behavior representing a danger to any person(s).
2. Property damage – arson, willful or malicious damage or destruction of property, reckless behavior representing a danger to property.
3. Possession of weapons – possession and/or use of firearms, knives, explosives and/or explosive devices, pellet guns, fireworks.
4. Disobedience – interference, resistance, or failure to comply with the request and/or directions of a PIA staff person acting in the line of duty.
5. Trespassing – unauthorized entry.
6. Deception – furnishing false information to the Institute with intent to deceive.
7. Forgery – including the issuance of a “bad check.”
8. Fighting.
9. Proven illegal use of a controlled substance.
10. Inappropriate behavior with other students.
11. Reckless use of vehicles.
12. Theft – includes theft of property from the institute and from other students
13. Possession or use of controlled substances.
14. Verbal harassment of instructors, office staff, maintenance staff, administrative staff and fellow students.

Acts of Copyright Infringement

1. Photocopying or reproducing any PIA material(s), workbook(s), textbook(s) etc. is a direct violation of the intellectual property rights protected by the copyright laws of the United States and International Copyright Treaty. Any student violation will lead to disciplinary action up to and including dismissal from the PIA.
2. Summary of Civil and Criminal Penalties for Violation of Federal Copyright Laws: Copyright infringement is the act of exercising, without permission or legal authority, one or more of the exclusive rights granted to the copyright owner under section 106 of the Copyright Act (Title 17 of the United States Code).

3. These rights include the right to reproduce or distribute a copyrighted work. In the file-sharing context, downloading or uploading substantial parts of a copyrighted work without authority constitutes an infringement.
4. Penalties for copyright infringement include civil and criminal penalties. In general, anyone found liable for civil copyright infringement may be ordered to pay either actual damages or “statutory” damages affixed at not less than \$750 and not more than \$30,000 per work infringed.
5. For “willful” infringement, a court may award up to \$150,000 per work infringed. A court can, in its discretion, also assess costs and attorneys’ fees. For details, see Title 17, United States Code, Sections 504, 505.
6. Willful copyright infringement can also result in criminal penalties, including imprisonment of up to five years and fines of up to \$250,000 per offense. For more information, please see the website of the U.S. Copyright Office at www.copyright.gov.

Acts of Academic Dishonesty or social misconduct may result in a disciplinary reprimand, disciplinary probation, reporting to law enforcement, loss of certain privileges, restitution for damages, suspension or termination from PIA. Result will be at sole direction of PIA. If at any time during enrollment at PIA a student is arrested and/or convicted of a crime, that student must immediately notify the Director of Compliance and Student Services or School Director.

Care of School Property

Student cooperation is necessary to maintain the proper maintenance and appearance of the campus (grounds), buildings, classrooms, laboratories and shops, equipment, tools, and training aids.

Since care of school property is a cooperative task which must be shared by the students and the staff, students are required to 1) report any damage to school property to your instructor as soon as it is discovered and 2) report any damage resulting from accidents, carelessness, or maliciousness.

- Students must maintain safe working conditions at all times. Liquid spills, trash, or other materials/objects that present hazardous conditions must be immediately removed from the floor, workbenches, etc. In addition, the student must maintain an orderly and clean work station at all times. As required, students will participate in general lab/shop cleanup at the end of the period.
- Shops and laboratories are stocked with equipment and tools that meet or exceed industry standards. It is the instructor's responsibility to provide adequate directions as to the use and care of the equipment/tools and it is the student's responsibility to follow directions. Remember, when in doubt, ask for assistance. Monetary or other forms of restitution may be imposed when damage results from inappropriate use or care of the equipment/tools.
- It is essential that students deposit all forms of waste in the appropriate containers. In addition, smokers should make use of the special containers, and refrain from placing cigarette butts in trash cans.
- Smoking is permitted only in marked, designated areas outside the buildings. Use of tobacco products and electronic smoking/vaping devices is prohibited inside PIA's facilities. Failure to conform to this rule may result in suspension or termination.
- Students must refrain from leaning against or placing feet against the exterior and interior walls.
- Students are responsible for maintaining the established student desk arrangement and keeping the classroom free of any form of trash.
- It is the instructor's responsibility to adjust room temperature controls, window shades, and lighting.

Sexual Harassment and Reporting Policy

PIA does not tolerate any behavior by administrators, faculty, staff or students which constitutes sexual harassment. Sexual harassment is a violation of Title VII of the Civil Rights Act of 1964, as amended. Sexual harassment is defined in the Equal Opportunity Commission's Guidelines on discrimination of sex. Following such definition and for the purposes of this policy, sexual harassment will be defined as follows: Unwelcome sexual advances; Request for sexual favors; Other verbal or physical conduct or written communication of intimidating, hostile, or offensive sexual nature where:

- (A) Submission to such conduct, either explicitly or implicitly, is made a term or condition of the employee's status of employment or student's status;
- (B) Submission to or rejection of such conduct by an employee or student is used as a basis for employment decisions affecting such employee or academic or enrollment decisions affecting such student;
- (C) Such conduct has the purpose or effect of unreasonably interfering with an employee's work situation or a student's education or creating an intimidating, hostile or offensive environment.

All administrators, supervisors, faculty, staff and students will be held accountable for compliance with this policy.

Any employee or student who has been subjected to conduct which constitutes sexual harassment is encouraged to report such conduct to the Director of the School either directly or via the Office of the Director of Compliance and Career Services or Human Resources office. A confidential investigation of the reported incident will be promptly initiated.

Corrective action as a result of violations of Title VII of the Civil Rights of 1964, as amended may include, but not be limited to the following: a written reprimand, suspension with pay, suspension without pay, demotion, termination, student suspension or expulsion.

Any form of willful reprisal against any employee or student who reports sexual harassment or assists in the investigation of such a report is strictly prohibited.

Alcohol and Drug Prevention Program

Policy December 12, 2012

The school makes available information on drug awareness to all students through the Education Department. In compliance with the Drug Free Schools and Communities Act, as amended, a copy of the school's Alcohol and Drug Policy is printed below to ensure that all students at Pittsburgh Institute of Aeronautics are aware of the standards of conduct with respect to alcohol and drugs that affect them.

The possession, use, and/or sale of alcohol and/or drugs on any part of the school's premises or at any school sponsored event or activity is strictly prohibited.

- Students possessing, using, or being under the influence of illegal drugs or alcohol on any part of the school's premises or at any school-sponsored event or activity will be subject to disciplinary action up to and including termination from the school and will be referred to appropriate rehabilitation agencies and/or reported to appropriate legal authorities. The school reserves the right to deny reentry to any student who fails to satisfactorily participate in a prescribed drug/alcohol treatment program.
- Students selling drugs on any part of the school's premises or any school-sponsored event will be terminated from the school and reported to the appropriate legal authorities.

Post-Accident and Reasonable Suspicion Procedures

- When there is an accident involving a student, the school may request that the student report to a PIA-designated physician or medical center for evaluation. This evaluation will involve appropriate testing, including an alcohol/drug screen. Students refusing to report for a medical evaluation following an accident or refusing to authorize the release of alcohol/drug screen results following an accident on school premises may be terminated from the school.
- When there is reasonable suspicion that a student attending school is unfit for classroom, laboratory, and/or shop activities, the instructor or other employee who initially observed the behavior as well as at least one school administrator will complete a formal observation to determine if further action is necessary. Students who are suspected to be under the influence of drugs or alcohol while attending classes or other activities will be removed from these activities immediately, and may be asked to report to a PIA designated physician or medical center for evaluation. This evaluation will involve appropriate testing, including an alcohol/drug screen. Students refusing to report for a medical evaluation following the school's determination of reasonable suspicion, or refusing to authorize the release of alcohol/drug screen results following the school's determination of reasonable suspicion may be terminated from the school.

College Consequences

- Any student found in violation of this policy will be subject to disciplinary actions by the Institute up to and including suspension, termination from the program, and/or referral to civil authorities for criminal prosecution. The Institute may also require participation in an appropriate drug and/or alcohol assistance or rehabilitation program.

Federal Penalties and Sanctions for Illegal Possession of a Controlled Substance

(NOTE: These are only federal penalties and sanctions. Additional state and local penalties and sanctions may also apply.)

21 U.S.C. 844(a)

- 1st conviction: Up to 1 year imprisonment and fined at least \$1,000 but not more than \$100,000, or both.
- After 1 prior drug conviction: At least 15 days in prison, not to exceed 2 years and fined at least \$2,500 but not more than \$250,000, or both.
- After 2 or more prior drug convictions: At least 90 days in prison, not to exceed 3 years and fined at least \$5,000 but not more than \$250,000, or both.

21 U.S.C.853 (a)(2) and 881(a)(7)

- Forfeiture of personal and real property used to possess or to facilitate possession of a controlled substance if that offense is punishable by more than 1-year imprisonment (See special sentencing provisions re: crack).

21 U.S.C. 881(a)(4)

- Forfeiture of vehicles, boats, aircraft, or any other conveyance used to transport or conceal a controlled substance.

21 U.S.C. 844a

- Civil fine of up to \$10,000 (pending adoption of final regulations.)

18 U.S.C. 922(g)

- Ineligible to receive or purchase a firearm.

Miscellaneous

- Revocation of certain federal licenses and benefits, e.g., pilot licenses, public housing tenancy, etc., are vested within the authorities of individual Federal agencies.

Impact of Drug Related Conviction(s) on Student Financial Aid

Drug related convictions may affect a student's ability to obtain Student Financial Aid. Specifically, students will not be eligible for federal aid during the entire award year unless they complete a qualified drug rehabilitation program or pass two unannounced drug tests given by such a program. Detailed information on how drug related convictions affect your ability to obtain Student Financial Aid can be obtained by the Office of the Director of Financial Aid.

Impact of Drug Related Conviction(s) on FAA Certification

Any person, who has been convicted of violating federal or state statutes relating to drug offenses, can be denied their application for a certificate or rating up to 1 year after the date of conviction. The violation can be relating to any one or more of the following actions: growing, processing, manufacturing, selling, disposing, transporting, or importing narcotic drugs, marijuana, depressants, or stimulants. They may also face the suspension or revocation of any certificate that they currently hold (AMT Handbook Chapter 13 Part 65.12). Once working in the industry, cer-

tificated mechanics face harsh penalties including suspension or revocation of FAA certification for refusal to submit to drug and alcohol testing (AMT Handbook Chapter 13 Part 65.23).

Economic Effects of Drug and Alcohol Abuse

- Substance abuse costs American society over \$559,000,000,000 each year.
- Frequent drinking and drug use is associated with absenteeism, tardiness, leaving work/school early and poor relationships with coworkers and peers.

Influence of Drug and Alcohol Abuse on Criminal Activity

- Alcohol and drugs weaken the brain mechanisms that normally restrain impulsive behaviors, including inappropriate aggression.
- The connection between alcohol, drugs and crime is clear. According to the National Council on Alcoholism and Drug Dependence (ncadd.org):
 - Each year, more than 600,000 students between the ages of 18 and 24 are assaulted by another student who has been drinking.
 - 95% of all violent crime on college campuses involves the use of alcohol by the assailant, victim or both.
 - 90% of acquaintance rape and sexual assault on college campuses involves the use of alcohol by the assailant, victim or both.
 - Every day in the U.S., 36 people die, and approximately 700 are injured, in motor vehicle crashes that involve an alcohol-impaired driver. Drinking and drugged driving is the number one cause of death, injury and disability of young people under the age of 21.

Health Risks of Drug and Alcohol Abuse

- There is a strong correlation between alcohol use and cancers of the mouth, larynx, pharynx, and esophagus.
- The correlation between alcohol and oral cancer is even more pronounced for those who use alcohol and tobacco.
- There is a significant negative impact on the health of children who are exposed to illegal drugs or nicotine and who grow up in a household where drugs and tobacco are abused.
- The health effects of drug abuse are numerous and varied, depending upon the type of drug and frequency of abuse. For more information about the short-and long term health effects of drug and alcohol use, visit drugabuse.gov.

Additional Informational Resources

- National Institute of Drug Abuse Report to Congress National Institute on Drug Abuse and the National Institute on Alcohol and Alcohol Abuse www.nida.nih.gov

Counseling Services

Description Of Available Counseling

The following agency is available to employees and students for drug or alcohol counseling, treatment, rehabilitation or reentry programs:

Washington EAP Services offers student assistance with a variety of problems which may affect his or her well-being, such as Family and Parenting, Marital & Relationships, Grief and Loss, Financial, Legal, Gambling, School related concerns, and feelings of depression.

Washington EAP Services

155 Wilson Avenue
Washington, PA
1-800-EAP-LINK
724-223-3430

Other counseling services are also available in the local area.

Abraxas Foundation-Drug and alcohol treatment (412-562-0105)

Alcohol and Drug Abuse Hotline-Drug and alcohol crisis hotline (800-888-9383)

Alcohol Recovery Center-Recovery treatment (412-231-5050)

Alcoholics Anonymous-Self-help for alcoholics (412-471-7472)

Allegheny County Services-Network of drug and alcohol education/rehabilitation (412-350-3328)

Alpha House-Treatment for alcohol and drug abusers (412-363-4220)

South Hills Health Systems-Detoxification drug and alcohol treatment program (412-381-5522)

VA Medical Center-Rehabilitation for alcohol addiction (412-363-4900)

Duquesne University-Psychology Dept. (412-396-6562)

Disciplinary Sanctions

In accordance with the regulatory requirement that an IHE (Institute of Higher Education) distribute a clear statement that it will impose disciplinary sanctions for violations of the IHE's standards of conduct, and consistently enforce those sanctions found in Public Law 101-226, be informed that PIA views the use, possession, transfer or sale of alcohol or drugs by all students and employees on school premises or as part of any of its activities as being very serious and subject to disciplinary sanctions consistent with local, State and Federal law up to and including expulsion for the student and termination of employment for the employee and referral for prosecution of employee/student.

Weapons Policy

PIA does not tolerate the possession of weapons on campus. Possession, use or intent to use any such weapon or potential weapon by any student shall be grounds for immediate dismissal from PIA.

Under this policy, a weapon or potential weapon shall be construed as any contrivance, device, implement, instrument or utensil which may be used to inflict physical harm on any person or persons and is not a prescribed component of the student's required tool inventory. A weapon or potential weapon shall also be construed as a prescribed component of the student's tool inventory which is used in an improper manner for the purpose of inflicting physical harm on any person or persons, or used in a threatening manner toward any person or persons.

School Vehicles

Students are not permitted to operate PIA's automobiles, vans, trucks or other vehicles licensed for highway use.

Only after thorough testing and under the instructor's direct supervision will a properly qualified student be permitted to operate tugs, mobile ground power units (GPUs) or other aircraft ground support equipment.

Emergency Evacuation Procedures

The following evacuation procedures are in effect for all PIA buildings.

Posted in each classroom, shop, and laboratory are Emergency Evacuation Charts. Students are responsible to familiarize themselves with the evacuation route indicated on each chart.

The alarm to evacuate an area is one long steady tone emanating from either the class change bell or fire alarm horn. Upon hearing the signal, or receiving other notification from staff members, the student will:

1. Turn off any equipment being operated.
2. Proceed in a calm and orderly manner to the Evacuation route selected by the instructor in charge.
3. Walk quickly along the Evacuation Route.
4. Remain with the class. Roll call will be taken by the instructor, who MUST be able to account for every student.
5. No smoking is permitted during drills.

Student safety and the safety of others depend on cooperation. Each individual will be held accountable for misconduct during an emergency evacuation or a routine fire drill.

Campus Lunchroom

For convenience, a lunchroom is located on the first floor of PIA's Administration Building on the Main Campus.

Hours:

The lunchroom is normally open to students from 7:15 am - 8:00 am; during morning class changes, lunch periods, and afternoon class changes; from 2:30 pm - 3:30 pm; and during evening make-up sessions. At any other time, students are not permitted in the lunchroom.

Care of Lunchroom:

Vandalism of vending machines is cause for suspension or termination. Student abuse of vending machines will not be tolerated. If a machine is not working properly, or a refund is in order, it should be reported to the bookstore personnel or Academic Dean.

Visitors

All visitors must register at the reception desk.

Visiting a Student

In order to minimize classroom/shop interruptions, it is recommended that a visitor's arrival time coincide with either a class change or the student's lunchtime. Visitors needing to see a student under urgent circumstances should report to the reception desk for assistance or by calling 412-346-2100 prior to arrival.

Visiting a Staff Member

Meetings with PIA staff members must be arranged in advance by calling 412-346-2100.

School Visits and Tours

Every prospective student is asked to visit PIA to discuss the details of the training programs and to tour the school facilities. To make an appointment, call 412-346-2100 and ask for the Admissions Office.

Student Advisement and Academic Assistance

Advisement begins in an informal manner at the time of the prospective student's initial interview with the Admissions Department representative. During this interview, the applicant is advised relative to the school's academic provisions for progress, and told whether or not his/her educational background has provided her/him with the basic skills needed to be successful in the selected major of study. In addition, school life, acceptable conduct, and expected interactions with fellow students, faculty, and other PIA personnel are discussed.

Each prospective student must take the Mathematics Skills Assessment (MSA) either prior to or immediately upon enrollment. Within a short time, the results of this appraisal will be discussed with the applicant, and he/she will be advised if remediation is warranted. This is never done to discourage the student; rather, it is a means of providing additional assistance early in the learning process to enhance the probability of academic success. In addition, student tutors are available for enrolled students after 2:30pm on selected days to assist learners who are having difficulty in specific subject areas. There is no tuition charge to enrolled students for tutoring conducted at PIA.

Students who need academic assistance in order to maintain satisfactory progress have the privilege of remaining in school, each day, at the end of scheduled classes to receive personal instruction. Students may avail themselves of this opportunity by requesting it from the Director. There is no charge for this assistance, provided the student is not using it to make up absence in excess of the school's allowable maximum. If so, then the policy outlined in this document (see ABSENCE on page 8) will be in effect.

Students are encouraged to discuss their academic or school life problems with their immediate instructor. In matters that are of a different nature and require advisement beyond that which the instructor can provide, the student may seek assistance or EAP referral services from the Office of the Academic Dean.

Those who are faced with problems of a financial matter may seek advice from the Financial Aid Office.

Student Messages Policy

Emergency messages (messages requiring prompt action) — The student's classroom or shop activities will be interrupted and the student will receive the message in its entirety. The staff will help in all possible ways. Students may leave school after receiving an emergency message.

All other messages — The student will be provided with ONLY the caller's name and telephone number.

Cell Phone Use

Cell Phones and Electronic Devices in the Classroom

Using cell phones or other electronic devices in the classroom setting can hinder instruction and learning, not only for the student using the device but also for other students in the class. Therefore, PIA requires that students adhere to the following rules:

1. PIA prohibits the use of all cell phone applications in classrooms and laboratories, including but not limited to sending and receiving phone calls, text messages and e-mails; internet searching; and playing games.
2. Cell phones and other electronic devices must be turned off during class and make-up time, and must be kept hidden from view.
3. A cell phone is not permitted in the classroom as a substitute for a calculator.
4. When the room is being used for non-instructional purposes (such as during break times or class changes) cell phones and other electronic devices may be used in the classrooms or laboratories only with the approval of the instructor. The instructor retains the right to prohibit these devices at all times in his/her classroom/lab.
5. If a cell phone must be kept on due to a potential emergency situation, the student must inform the instructor in advance. The phone must be on a silent (vibrate) setting. If an emergency call must be taken during a class, the student must leave the classroom prior to answering the call and is not permitted back into the classroom until the beginning of the next period.
6. Instructors must adhere to any individual guidelines regarding assistive devices communicated by the Office of the Academic Dean for students with disabilities.

Network Policy Regarding Devices connected to PIA Devices

General Statement

PIA is dedicated to providing a reliable network environment to facilitate education and operations. The PIA policy includes all physical cabling at any campus, wireless technologies, and all remote locations which are connected directly to PIA. In our effort to provide a secure and reliable networking environment, we reserve the right to monitor network activity to aid in the solving of problems encountered with or on the network.

Access to this technology has been allowed to enhance the educational experience of our students, and may be used in training areas only with permission of the attending instructor. Students should only use this access in the course of instruction or for other educational purposes.

PIA RESERVES THE RIGHT TO PREVENT ACCESS TO THE NETWORK AT ANY TIME, AND TO REVOKE ANY OR ALL PRIVILEGES OR TO CHANGE SERVICE AT ANY TIME IF THE ACCESS IS BEING ABUSED.

Acceptable Devices

Devices are to be in good working order and designed not to interfere with other devices connected to PIA's network or other lab equipment. These devices must be used for school related activity. PIA reserves the right to restrict access to devices which are connected to the network through MAC Address or IP address blocking. The Owner is responsible for the use or misuse of the device that is attached to PIA's Networks.

Security

Security measures should be taken to ensure that the device connected to the network is not vulnerable to compromise. Compromised or problem hosts connected to the network will be blocked until they are repaired. Recommended actions for devices connected to the network include: fully patched Operating Systems; current anti-virus software and virus definitions; secure passwords, personal firewalls, and intrusion detection software.

Unacceptable Activities while connected to PIA's Network

PIA will not support or condone the activities listed below:

1. Activities which excessively consume network resources.
2. Activities which violate Local, State or Federal Law, and/or International Treaty. This includes, but is not limited to:
 - Providing Services which interfere with the legitimate function of other devices connected to the network
 - Commercial Activities
 - Sending Spam (Unsolicited Bulk and/or Commercial Email)
 - Open E-Mail Relays
 - Denial of Service Attacks
 - Hacking
 - Cracking
 - Probing, scanning or other activities done to learn about other connected devices, whether innocent or malicious in nature (Allowances will be made for System Administrators performing security scans on systems they manage in the course of their job duties.)
 - Packet or Content Sniffing
 - Unauthorized access to hosts
 - Illegal distribution of any copyrighted material
3. "Stealing" or "Borrowing" IP addresses
4. Any activity that tarnishes PIA's professional image

Response to Unacceptable Activities

PIA will work in cooperation with law enforcement agencies when a crime is committed. General inquiries and requests for assistance may be placed through admin@pia.edu. For incidents which do not warrant involvement of law enforcement agencies, PIA will initiate disciplinary action. Hosts which participate in unacceptable activities will be blocked from network access and the responsible party contacted.

Lost and Found

Lost Articles

Articles that have been lost in or around the school buildings may be reported to the instructor and the bookstore.

Found Articles

Articles that have been found should be reported to the instructor and taken to the bookstore.

Lost articles will be retained for six months. After six months, unclaimed articles will be disposed of properly.

Telephone Numbers

Student Parking

Allegheny County Airport Parking Lot

Free parking for PIA students is available at the Allegheny County's airport parking lot. Students using this facility are advised to comply with signs indicating restricted parking sections, stripes defining individual parking spaces, and all other standard traffic direction/warning signs. Failure to do so may result in costly fines and the possibility of additional towing and vehicle recovery expenses. Students are cautioned that littering, engaging in a sporting activity of any type, or using the parking lot for any other unauthorized purpose is prohibited by Federal Aviation Administration airport regulations and that the offenders are subject to prosecution. All concerns associated with the parking lot will be referred to the Allegheny County Police, unless, according to PA Dept. of Ed. regulations, such concerns fall under the jurisdiction of PIA.

PIA currently offers no provision for charging of electric vehicles.

Restricted Parking – Susceptible to Towing

Students are not permitted to park on Allegheny County parking lot spaces designated as Permit Parking or Visitor Parking.

Reporting of Criminal Activity or Emergencies

The Institute is concerned that all situations involving criminal action, emergencies, or policy violations be reported promptly to the appropriate authority. The School actively participates in the United States Department of Education Student Right-to-Know and Campus Security Act. It is the obligation and responsibility of every employee and student to report any situation that falls into the categories specified as criminal action, emergencies, or policy violations. Students will be notified during orientation about specific security policies and concerns they should be aware of while attending PIA. Statistics concerning criminal offenses reported under this Act are available upon request at the time of registration or request for school information.

All facilities of the School are under the supervision of staff members any time they are open to students or the public. Immediate reporting of situations involving security concerns is critical. The following procedures specify the reporting policy in facilities of the Institute.

1. Report all situations to the Instructor or Staff Member.
2. All situations will be forwarded along with investigative information to the Director or his/her delegated representative.
4. The School will promptly investigate any situation reported. Where policies or procedures of the Institute are violated, corrective action will be applied to resolve the situation. If the situation involves a violation of law or an emergency requiring the assistance of government agencies, the Director or his/her designated representative will request such assistance.

Personal Appearance/Attire

In keeping with state regulations, OSHA mandates, and out of consideration for the rights of other learners, the following student safety/courtesy code has been established.

1. Shirts must be opaque, have sleeves, and must be capable of being tucked into trousers/slacks.
2. Shirts/blouses may not contain illustrations or text which are offensive in nature to any group.
3. Full-length trousers/slacks must be worn. From May 1st until September 30th, a warm weather policy will be in effect. Shorts will be permitted but must be no shorter than 4" above the knee. No spandex, bike, soccer or short-shorts will be allowed.
4. Loose-fitting or baggy clothing may not be worn in the shop/lab areas.
5. Clothing with cutout or torn-out areas may not be worn.
6. Shoes must be of a nature that they offer full foot protection to the wearer. No cloth, open toe, or soft sole shoes may be worn.
7. Socks must be worn.
8. Headwear may not be worn in the classroom. Exceptions will be made for headwear of a religious nature.
9. Dark lens glasses may not be worn indoors.
10. Approved safety glasses must be worn in shop/lab areas.
11. Hair must be either trimmed to a suitable length or restrained in such a manner that it cannot be caught up in moving machinery.
12. Jewelry or other removable body adornments may not be worn in the shop/lab areas.

The instructor may make determinations regarding safety/appearance issues in his/her classroom/shop area(s). In instances of disagreement or uncertainty, the Academic Dean, Director or his/her representative will make final determinations concerning safety/appearance issues. All PIA staff members are responsible and empowered to immediately direct any student whose clothing or behavior constitutes a safety hazard.

Exceptions to this code may be granted to individual students through one of the following methods: (A) a written excuse from the student's physician; (B) a written excuse from the Office of the Director. In either case, the excuse must state a specified period of time during which the exemption is in effect. All violations of these regulations will be dealt with in accordance with the procedures described in this catalog.

Conferences with School Personnel

Students and parents are encouraged to seek the assistance of instructors, or the administrators whenever they feel it is appropriate. Parents may arrange a conference by phone or in writing. Advance notice will facilitate proper preparation (gathering of required documents, information, etc.). A student may arrange a conference with any of the aforementioned parties during regular school hours.

In most cases the student will find that the instructor is readily available to assist in resolving problems. Instructors are available to explain general policies, procedures, regulations, grades, attendance, etc. Unresolved problems should be brought to the attention of the Academic Dean or appropriate department Director.

For clarification, gathering of information, or problem solving in the areas of student financial aid programs, placement procedures, grade records, or attendance records, the student is advised to contact a staff member who will then direct the student to the appropriate resource person.

Student Review of School Records

The Family Educational Rights and Privacy Act (FERPA) is a Federal law that protects the privacy of student education records.

- Adult students have the right to inspect and review their education records maintained by the school. If copies of records are requested, the school may charge a fee for copies.
- Eligible adult students have the right to request that a school correct records which they believe to be inaccurate or misleading. If the school does not amend the record, the eligible student has the right to request a hearing before the Director.
- Generally, schools must have written permission from the eligible student in order to release any information from a student's education record.

For more detailed information on FERPA, a student may visit the online site of the U.S. Department of Education at www.ed.gov. Students may review their records by making an appointment with the Director.

Injury or Illness

All accidents should be immediately reported to the instructor. The severity of the injury will determine the immediate course of action. Subsequent to all accidents, an accident report must be completed. Under no circumstances should a student leave for home, hospital or doctor's office without notifying the instructor. It is important that the student provide current information for the notification of significant persons (parents, guardian, wife, or husband) of an accident.

PIA does not provide health insurance coverage for its students. However, PIA recommends and expects each student to secure health insurance coverage through an appropriate provider. Furthermore, PIA expects students to secure normal medical services through a family physician; however, in the event of injury or other medical emergencies on campus, the nearest designated instructor or staff member will notify (if appropriate) an administrator. If the emergency is deemed serious, the appropriate professional emergency care service will be secured by the administration. PIA refers serious accidents or illnesses to the nearest hospital (or hospital of the student's choice) for emergency care and will notify the student's next of kin. Students must understand that they or their families, not PIA, are responsible for the cost of such emergency care including any necessary ambulance service. At no time will PIA be financially responsible or incur any liability for any related cost associated with student required medical assistance, should PIA assist a student in acquiring medical assistance.

Campus Resource Center

The PIA library contains in excess of 8,000 volumes, the majority of which pertain to maintenance and repair. Of equal importance the student will find videos, microfiche, DVDs and CD-ROMs and subscriptions to maintenance publications which provide information on many topics.

The library also contains many volumes which are devoted to general academic subjects as well as periodicals that provide an important resource for term papers, reports, and selective reading.

In addition, computers and internet access are available at no additional charge for assigned and personal research.

Resource Center Hours

In addition to library reading assignments and computer-center projects which occur during scheduled school hours, the Resource Center will be open from 7:15 am to 8:00 am and 2:30 pm to 3:30 pm from Monday through Thursday, and on Friday from 7:15 am to 8:00 am or by appointment.

Sign-Out Procedure

The student must see a library staff member to check out materials prior to removing them from the library. The customary sign-out time is fifteen school days. This time may be extended with the consent of the attending staff member.

Course codes are used to indicate four significant bits of information:

- 1) The two-letter alpha prefix indicates the major topic of study (Examples: EN - English, EL - Electrical, HI - History);
- 2) The first digit indicates the academic year (Examples: 113 - first academic year, 372 - third academic year);
- 3) The second digit indicates the usual quarter of study, except for purely academic subjects like English and mathematics, which utilize a "0" (Examples: 125 - second quarter, 245 - fourth quarter); and
- 4) The third digit in the alpha numeric code is used to distinguish one similar course from another (Examples: PP241 from PP242, AF373 from AF375).

NOTE: Course titles are followed by the number of credit hours granted. Courses which are followed by a letter "P" include a practical component (shop/lab).

Explanation of Alpha Prefixes

AF.....Subject matter deals primarily with the study of the Art of Fabrication.
AG..... Subject matter deals with the study of Aviation General topics.
ELSubject matter deals primarily with the study of ELelectricity/electronics.
ENSubject matter deals with the academic study of the ENGLISH language.
GSSubject matter deals with the study of General Subjects related to the major.
HI.....Subject matter deals primarily with the academic study of HIStory.
MA.....Subject matter deals with the study of MAThematics and related topics.
PHSubject matter deals primarily with the study of PHysics and related topics.
PP.....Subject matter deals primarily with the study of ProPulsion systems.

Art of Fabrication

AF253 Non-Metallic Structures (1 credit hr - P) (36 clock hrs)

This course examines the construction, repair, and inspection of aircraft wooden structures and fabric coverings, as well as the application of finishing materials. Windshields, windows, doors, and interior furnishings are also studied in this unit.

AF255 Introduction to Metallic Structures (2 credit hrs - P) (72 clock hrs)

This course introduces the learner to metal working tools and equipment, the art of forming metal, riveting practices, and the use of special fasteners. A discussion of bonded structures, and the various physical properties of common metals are also addressed. GS113 is a prerequisite for this course.

AF256 Working With Metallic Structures (3 credit hrs - P) (102 clock hrs)

AF256 expands upon the practical aspects of sheet metal construction and repairs. Components are laid out and built by the learner, structural repairs are performed, and the effects of metal fatigue and corrosion are studied. In addition, the use of drawings and blueprints is incorporated to create a reallife maintenance condition. AF255 and GS111 are prerequisites for this course.

AF263 Practical Welding (2 credit hrs - P) (68 clock hrs)

This course exposes the learner to a variety of welding techniques that are useful in many maintenance environments. The course is not designed, in itself, to create certified welders. It does, however, teach the student to perform basic welding constructions and repairs, and prepares him/her for more advanced welding courses. GS111 and GS113 are prerequisites to this course.

AF264 Intermediate Level Welding (4 credit hrs - P) (144 clock hrs)

This unit utilizes the knowledge and proficiencies developed in course AF263 and enhances the learner's welding abilities in a number of welding skill areas. Course AF263 is a prerequisite.

AF371 Working With Composite Materials (2 credit hrs - P) (72 clock hrs)

This course provides an in-depth study of the various composite materials employed in aviation, medical, and other advanced technical constructions. Safety concerns, manufacturing practices, and damage assessment of these modern man-made materials are all explored. Practical experience is provided in both construction and repair techniques used in industry today. AG251 and AF255 are prerequisites for this unit of study.

AF373 Fluid-Powered Systems (4 credit hrs - P) (144 clock hrs)

AF373 examines the hydraulic, pneumatic, and landing gear systems of modern aircraft. Also included in this block of instruction are environmental systems, ice and rain protection, and emergency oxygen systems. The physical laws involved with each are explored, while practical experience is gained. Operating principles, construction, and applicable maintenance practices for each of these systems are studied. PH117 and AG251 are prerequisites for this course.

AF375 Welding Technology (1 credit hr - P) (36 clock hrs)

Welding Technology emphasizes the close inspection of welds employed in structural components. Practical application is utilized to enhance conceptual aspects of the topic. Included in this course is an investigation of the FAA approved repair methods. AG251 is a prerequisite to this course.

Aviation General

AG251 Basic Systems Maintenance (4 credit hrs - P) (144 clock hrs)

This introduction to aircraft maintenance includes general knowledge area subjects employed in almost all aspects of maintenance. Performing weight and balance, constructing hydraulic fluid lines and fittings, conducting nondestructive inspections, and using hardware correctly are all covered. Both theory and practical aspects of this complex field of study are explored, providing the learner with a good technical foundation for future, related topics. MA102 and GS113 are prerequisites to this course.

AG266 Fuels and Fuel Systems (2 credit hrs - P) (72 clock hrs)

This comprehensive course covers fuels and fuel systems from the onboard storage tanks up to the engine combustion chambers. Reservoirs, fuel lines, related valves, distribution systems, and fuel metering devices are all studied. Particular attention is given to fuel system troubleshooting and common maintenance practices. PH117 is a prerequisite to this course.

AG377 Advanced Aircraft Maintenance (3 credit hrs - P) (102 clock hrs)

This course of study includes such diverse topics as: aircraft assembly, rigging, periodic inspection, flight line repair work, and rotary aircraft (helicopter) theory. Live job conditions are mirrored to provide practical experience performing aircraft inspections, as well as both scheduled and unscheduled maintenance. AG377 is the culmination of the entire AMT program. All AMT courses required during the first five quarters of study are prerequisite to AG377.

AG383 Rotorcraft Systems and Maintenance (2 credit hrs - P) (60 clock hrs)

This elective course of study was originally designed to familiarize FAA field inspectors with the intricacies of rotary wing aircraft (helicopters). It evolved into a popular offering for AMT students. AG383 begins with the history of helicopters, and then discusses the aerodynamics peculiar to rotorcraft. Flight controls and basic engine installations are also discussed. Participants gain hands-on experience in many areas of helicopter maintenance. Students must have completed quarters one, two, and three to participate.

Electricity/Electronics Studies

EL125 Practical Electricity (3 credit hrs - P) (108 clock hrs)

This course enhances the ability of the student to grasp more complex electrical concepts. It also provides a means for the learner to attain the specific skills needed to maintain electrical and electronic components and systems. Basic wiring, soldering techniques, connector maintenance, and analysis of both DC and AC circuits are accomplished. PH119 is a prerequisite for this course.

EL126 Electrical Systems (3 credit hrs - P) (108 clock hrs)

EL126 gives the learner practical knowledge concerning the operation and maintenance of a wide variety of electrically operated and controlled systems. Systems studied in this course include, but are not limited to, battery, generator & alternator, inverter, DC and AC motor, position indicating and warning, fire detection and extinguishing, and anti-skid (antilock) brakes. Shop/lab projects are designed to enhance the learner's ability to maintain, overhaul, and repair these systems and their components. EL125 is a prerequisite (or co-requisite) for this course.

EL135 Introduction to Electronics (3 credit hrs - P) (130 clock hrs)

EL135 includes a practical presentation format which covers several topics related directly to maintaining electrical and electronic systems and components. This course also introduces the learner to the most essential aspects of basic electronic devices and circuits, and allows the student to apply this knowledge to the study of common electronic equipment. MA102 and EL126 are prerequisites for this course.

EL243 Diodes, Transistors, and Semiconductors (3 credit hrs - P) (114 clock hrs)

This unit of study picks up where the previous three courses left off. It provides the electronics student with a more detailed background in the operation and application of practical semiconductor (solid state) devices and circuits. Since many of these devices and circuits are designed to perform specific electronic functions, a thorough knowledge of each is vital to the success of the future technician. The course includes intensive studies of circuits containing solid state diodes of all types, bipolar and field-effect transistors, linear (analog) and digital integrated circuits, and special purpose optoelectronic devices. EL135 is a prerequisite for this course.

EL244 Applications of Amplifiers and Power Supplies (4 credit hrs - P) (138 clock hrs)

Many complex electronic circuits are collections of advanced, specially-designed amplifiers. Thus, a study of basic electronic amplifiers is an important step toward the understanding of more elaborate circuitry. Topics in this course include: amplifier fundamentals, typical amplifier circuits, and operational amplifiers. EL244 also includes a thorough and practical study of circuits designed to perform unique but essential functions for given applications. The final section addresses basic radio theory, with presentations on the fundamentals of radio wave propagation and amplitude and frequency modulation. EL135 is a prerequisite for this course.

EL247 Common Electronic Techniques and Practices (3 credit hrs - P) (102 clock hrs)

The techniques and practices introduced in this course are essential to the performance of proper maintenance of all electrical and electronic components and systems. Topics include the correct methods of working with fiber optic media, accepted industry standards for soldering, component and wire preparation, component placement and mounting, special considerations for electro-statically sensitive components, and approved testing and inspection practices. The course culminates in the supervised construction of an AM/FM radio receiver, and a thorough familiarization with the testing procedures necessary. EL243 and EL244 are prerequisites (or co-requisites) to this course.

EL252 Basic Digital Techniques (3 credit hrs - P) (102 clock hrs)

Basic Digital Techniques serves as an introduction to the methods and practices associated with digital circuit design and operation. Subjects covered in this course include digital numbering systems and codes, digital logic circuits, Boolean Algebra and digital arithmetic. MA102 is prerequisite for this course.

EL254 Advanced Digital Techniques (4 credit hrs - P) (138 clock hrs)

This course builds on the knowledge gained in EL252 Basic Digital Techniques. It features in-depth studies of digital counters and registers, logic families, digital-to-analog and analog-to-digital conversion circuits, and memory circuits. EL252 is prerequisite to this course.

EL257 Introduction to Microprocessors (2 credit hrs - P) (80 clock hrs)

A solid background in the fundamentals of computer theory is provided by this unit. Included are: microprocessor number and code systems, microprocessor addressing modes, introductory programming techniques, execution of programs, computer arithmetic, and algorithms. This course also provides a more detailed knowledge of the operation of a typical microprocessor-based circuit. Subjects include: typical microprocessor architecture, instruction sets, advanced addressing modes, stack operations, input/output (I/O) operations, interfacing, displays, and switching. EL254 is prerequisite (or co-requisite) to this course.

EL258 Digital Applications for Electronics (1 credit hr - P) (34 clock hrs)

Microprocessor uses and interfacing are the highlights of this unit. Operations and uses of peripheral and asynchronous communications interface adapters are included. This course also demonstrates how Programmable Logic Controllers (PLC) can be wired and programmed to provide process control of industrial electric equipment through the use of peripheral devices such as input sensors, limit switches, and industrial controls. The student will gain experience in the creation, modification, and use of "ladder" diagrams, schematics, wiring diagrams, flow charts, and PLC program listings.

EL261 Advanced Radio Theory (2 credit hrs) (78 clock hrs)

This course assists the learner in obtaining a solid knowledge of radio theory. No shop/lab is included. Beginning with a review of basic radio theory, subjects studied include: advanced frequency modulation theory, frequency modulation circuits, radio wave propagation, transmission lines, and antennas for special applications. Subject areas are addressed in preparation for the FCC general radiotelephone Operator's (GRO) licensing examination. EL247 is prerequisite to this course.

EL262 Communications Transceivers (3 credit hrs - P) (108 clock hrs)

Subjects covered in EL262 include: citizen band (CB) radio transceiver block diagrams, detailed circuit analysis, testing, alignment, and troubleshooting; high frequency (HF) transceiver circuit analysis; very high frequency (VHF) transceiver detailed circuit analysis, factory-approved testing, and maintenance practices. EL261 is a prerequisite (or co-requisite) for this course.

EL263 Navigation Systems (3 credit hrs - P) (108 clock hrs)

This course addresses operational theory and maintenance practices for Automatic Direction Finder (ADF) receivers, marker beacon receivers, and Emergency Locator Transmitters (ELT). Navigation Systems thoroughly examines the circuitry, operational theory, and manufacturer approved testing and maintenance practices for a typical VHF navigation system. The presentations in this course place the accent on the VHF navigation (VOR), localizer (LOC), and glide scope (GS) functions of these radio systems, including alignment, testing, and troubleshooting. EL262 is a prerequisite (or co-requisite) to this course.

EL264 Individualized Audio & Entertainment Systems (1 credit hr - P) (44 clock hrs)

EL264 provides a well-rounded examination of various audio and video signals in typical individualized entertainment systems. Block diagram studies and detailed circuit analyses of audio control panels focus on the ways in which audio inputs and outputs are switched and controlled. Included in this study are overviews of commercial aircraft audio systems such as intercom (interphone) systems, passenger address and entertainment systems, and passenger video systems. EL247 is prerequisite.

EL372 Avionics Shop Practices (1 credit hr - P) (36 clock hrs)

Presentation topics include: shop management practices, test equipment calibration procedures, a review of aircraft structures, proper use of hardware, FAA regulations pertinent to the operation of a live radio shop, and common avionics (aviation electronics) equipment installation practices. Quarters one through six of the AET program are prerequisites for this course.

EL374 Microwave Systems (4 credit hrs - P) (144 clock hrs)

Topics in EL374 include microwave propagation characteristics, microwave generating devices and circuits, transmission lines and antennas for aircraft microwave applications, radar principles and terminology, radar transmitters, receivers, and antennas, and specific radar applications in aviation electronics. Once mastered, these principles are then applied to the study of Distance Measuring Equipment and Area Navigation (DME/RNAV) systems. In addition, course presentations cover Global Positioning Systems (GPS) principles of operation and typical GPS installation considerations. EL263 is a prerequisite for this course.

EL376 Radar Surveillance & Weather Avoidance (2 credit hrs - P) (72 clock hrs)

Course EL376 addresses two of the increasingly important aspects of commercial aviation. It does so by focusing on the primary related systems used in aviation today. Subjects of this unit include: airborne weather avoidance radar (WXR), air traffic control radar beacon system (ATCRBS), and traffic alert and collision avoidance system (TCAS). Learners take an in-depth look at the construction, operation, testing, maintenance, and troubleshooting aspects of these complex systems. EL372 and EL374 are prerequisites (or co-requisites) to this course.

EL378 Automatic Flight Control Systems (3 credit hrs - P) (102 clock hrs)

EL378 begins with lessons addressing the fundamentals of electromechanical control theory, and includes basic system elements, system functions and responses, control system dynamics, and the various types of control systems. The focus then shifts to flight control systems, including: autopilot system terminology, basic design theory, and a thorough coverage of general aviation autopilots. The course concludes with the study of commercial aircraft automatic flight control systems and flight management systems. As the final offering of the AET program, all other required courses must be completed prior to the start of EL378.

English Language Studies

EN090 Developmental English (1 credit hr) (18 clock hrs)

This course is offered primarily to foreign students who have not yet mastered the technically-oriented terms and uses of the English language. EN090 addresses language deficiencies by developing vocabulary, syntax, and sentence structure. Special emphasis is given to the technical vocabulary and word usage needed by those entering the aviation and electronics career fields. This course is designed for students who have already attained a moderate level of English language fluency, but have not achieved the required TOEFL 500 score required for entry into PIA's associate degree programs.

EN101 English Composition (3 credit hrs) (48 clock hrs)

This course is designed to improve comprehension and to develop the overall analytical skills that one can apply to any subject requiring the interpretation of written materials. With the student's career choice in mind, EN101 incorporates relevant technical vocabulary in its assignments. The structure of the English language, in both speaking and writing, is used to promote inductive thinking techniques. The materials of this course, including its writing requirements, are designed for first-term postsecondary students.

EN105 Technical Writing (3 credit hrs) (48 clock hrs)

Writing clear and concise technical reports is the primary objective of this unit of study. The basic principles of inductive thinking practiced in EN101 are more fully developed. Creating practical written structures helps promote theme consistency through factual support and overall cohesion. EN101 is prerequisite to this course.

EN208 Professional Communication (1 credit hr) (16 clock hrs)

Verbal communication and resume development are highlighted in this course. The student is helped to acquire up-to-date interview and resume building skills. A student portfolio is developed which includes materials necessary for the interview and hiring process. Methods of electronic resume development and delivery are explored.

General Subjects

GS111 Blueprint Reading (1 credit hr - P) (39 clock hrs)

At first, GS111 familiarizes the learner with drafting equipment and drawing procedures. The course then provides practical experience in reading and interpreting blueprints, diagrams, and schematics, while affording the student the opportunity to construct basic isometric, orthographic, and free-hand illustrations utilizing both pencil & paper. This is an introductory-level course, requiring no prior knowledge of drafting or blueprint reading.

GS113 Safety & the Environment (1 credit hr - P) (48 clock hrs)

This general information course addresses a number of topics which affect safe working environments, as well as ecological concerns for future technicians. Among the subjects discussed are: safe use of hand tools, airport operations, confined space entry, human factors, Occupational Safety & Health Administration (OSHA) regulations, and the Environmental Protection Agency (EPA). Nearly all technicians are now affected by these important issues while on the job. Students apply what they have learned by assisting upperclassmen in certain maintenance tasks. This is an introductory level course, requiring no prior knowledge of these topics.

GS127 Using Reference Materials (2 credit hrs - P) (90 clock hrs)

GS127 teaches the student how to employ reference materials in order to effectively inspect, disassemble, test, reassemble, evaluate, research, acquire, maintain, or measure complex systems and their constituent components. Students also learn how to record and store information concerning these same practices. Using the aerospace industry as a model, GS127 offers a series of related lessons dealing with the utilization of technical reference materials in modern industry. EN101 is a prerequisite for this course.

GS136 Introduction to Instruments & Controls (2 credit hrs - P) (72 clock hrs)

This course of study provides a means to apply several of the concepts involving both mechanical and electronic theory to various instrument systems. Beginning with a study of instrumentation techniques and practices, the course continues with presentations concerning basic electronics subjects, such as radio fundamentals and navigation and communication systems. GS136 concludes with introductory material dealing with radar, autopilots, and flight directors. EL135 is a prerequisite (or co-requisite) to this course.

GS137 Advanced Instruments & Controls (3 credit hrs) (104 clock hrs)

Advanced Instruments & Controls is a logical extension of GS136, and provides an overview of some of the more advanced electronically-based systems found on large commercial aircraft. Course highlights include a study of common electronics specifications and standards, and an introduction to advanced communication, navigation, alerting, and warning systems. The study concludes with a more in-depth examination of automatic flight control systems and current electronic instrumentation technologies. GS136 is a prerequisite for this course.

History

HI104 World History - Aviation (3 credit hrs) (48 clock hrs)

From the early unsuccessful attempts at flight to uses in warfare to modern commercial applications, HI104 focuses on the impact of aircraft and their technological advances on historical events, economic development, and political decisions. From the designs of Leonardo de Vinci to modern military and commercial aircraft, this course studies the events and discoveries that helped form history and impact global development. This course is designed for first-year post-secondary students.

Mathematics

MA098 Basic Math Skills (1 credit hr) (24 clock hrs)

This course is offered to students who need to enhance their basic mathematics skills prior to entry into one of the school's associate degree programs. MA098 primarily addresses arithmetical functions of whole numbers, fractions, and decimals, and touches upon simple one-variable algebraic equations. There is no prerequisite for this course.

MA102 Foundations of Mathematics (4 credit hrs) (66 clock hrs)

This comprehensive course is designed to develop the student's skill and confidence with a variety of practical mathematics disciplines. Topics include whole number operations, fractions, decimals, percent, ratios and proportions, powers and roots, signed numbers, algebraic operations, scientific notation, plane and solid figures, graphs, charts, Boolean algebra, and the use of calculators. An acceptable score on the MSA is prerequisite for this course.

MA106 Mathematics for Technology (3 credit hrs) (48 clock hrs)

This course in trigonometry is designed to further students' knowledge in mathematical logistics. Topics include: basic trigonometry, right angle theory, coordinate systems, radian measure, trigonometric functions, sine functions, logarithms, complex numbers, and the polar coordinate systems. MA102 is a prerequisite for this course.

Physics

PH117 Basic Physics (4 credit hrs) (66 clock hrs)

Upcoming technical courses require a basic understanding of a variety of the physical laws of science. PH117 addresses topics such as: atomic structure, heat & temperature, properties of matter, force and motion, light, sound, magnetism, and simple machines. Archimedes' Principle, Bernoulli's Principle, and Newton's Laws of Motion are given particular attention in this broad study. An acceptable score on the MSA is prerequisite for this course.

PH119 Introduction to Electricity (1 credit hr - P) (39 clock hrs)

PH119 introduces the learner to the basic theories and applications of electricity. Ohm's law is studied in the classroom and applied in the lab through construction of simple circuits and electrical diagrams. This course prepares the learner for more complex technical applications of electricity and electronics. An acceptable score on the MSA is prerequisite for this course.

Propulsion Systems

PP241 Introduction to Turbine Engines (2 credit hrs - P) (72 clock hrs)

Introduction to Turbine Engines is a comprehensive look at the theory and operation of modern gas turbines. Engines ranging in size from those that can be hand-carried to high by-pass turbofans as big as a house are studied. Operating principles and fundamental construction form a foundation for future courses. Various engine systems are explored, and learners enjoy the opportunity to disassemble, inspect, and reassemble gas turbine propulsion systems. PH117 is a prerequisite to this course.

PP242 Turbine Engine Technology (3 credit hrs - P) (102 clock hrs)

Information covered in this unit of study includes turbine engine systems and inspection criteria. Particular attention is given to acceptable maintenance practices, engine trim procedures, and remote visual inspections. Additional emphasis is placed on current auxiliary power unit (APU) technology and high efficiency turbofan powerplants. PP241 is a prerequisite (or co-requisite) for this course.

PP245 Introduction to Reciprocating Engines (3 credit hrs - P) (108 clock hrs)

This course includes the history and development of the internal combustion reciprocating engine. Basic piston engine components and their purposes are closely examined. Overhaul and inspection procedures are studied in the classroom then applied in shop. Students who complete this course have a fundamental knowledge about the construction and operation of reciprocating engines. There is no prerequisite for this course.

PP246 Reciprocating Engine Technology (2 credit hrs - P) (72 clock hrs)

PP246 covers engine operating principles, including: firing orders, valve timing, and engine efficiencies. It then goes on to address such engine-related systems as: lubrication, induction, supercharging, heat exchangers, and exhaust. Mathematical computations involving compression ratios, horsepower, gear reduction ratios, and specific fuel consumption are also studied. MA102 and PP245 are prerequisites for this course.

PP265 Advanced Engine Overhaul (2 credit hrs - P) (78 clock hrs)

This advanced course picks up where PP245 and PP246 left off. Learners disassemble, inspect, reassemble, and run up a reciprocating engine. All the finer details of engine overhaul are addressed, including: valve grinding and lapping, cylinder fin repair, helicoil installation, stud removal and repair, hardware identification, pre-lubrication, and engine run-in. PP245 and PP246 are prerequisites for this course.

PP267 Ignition Systems (2 credit hrs - P) (72 clock hrs)

Information covered in PP267 includes the types of engine ignition systems (battery, magneto) and their operating characteristics. Ignition system components, such as coils, condensers, distributors, harnesses, and spark plugs are closely examined. Particular attention is given to magneto ignition systems and their starting aids. EL125 and PP246 are prerequisites for this course.

PP268 Propeller Systems (2 credit hrs - P) (72 clock hrs)

This course examines the fundamental design of propellers and their related systems. Special attention is given to the physical laws which govern propeller operation. The various types of propellers are studied, ranging from simple one-piece wooden props to variable pitch, composite material propellers. Ice control and speed governing systems are also examined. PH117 is a prerequisite for this course.

PP269 Advanced Engine Maintenance (1 credit hr - P) (44 clock hrs)

Advanced Engine Maintenance parallels industry hangar and flight line operations for the powerplant technician. The learner conducts inspection and repair work similar to that found at an aviation fixed-base operation (FBO). Topics covered include: engine replacement, 100-hour inspections, non-destructive testing procedures, and routine aircraft engine maintenance practices, including ground run and towing. Based on the theory learned in previous engine-related courses, PP269 takes the student to the next level of practical applications. PP245, PP246, PP265, and PP267 are prerequisites for this course.

Tuition

The total tuition and payment schedule is as follows:

Total Program AET/AMT	\$36,400.00
Tuition Per Quarter	\$5,200.00

Payments for all terms must be made 2 weeks prior to the beginning of the term.

Any student who fails to attain the necessary minimum grades after completing the first quarter will not be permitted to continue, and, therefore, will not be required to make any further payments.

An applicant who has had previous college training may receive credit for the applicable courses by producing official college transcripts indicating a grade of "C" or better for these courses provided that the catalog descriptions for the courses are comparable to their PIA counterparts. If the descriptions of courses taken at another school only partially parallel PIA's classes, the applicant may be able to receive credit for these subjects by attaining acceptable minimum grades on the applicable by-pass examination(s). Permission to take the by-pass exams can only be granted by the Director.

Registration Fee

A registration fee of \$150.00 must be paid at the time of enrollment (see addendum to catalog).

Books, Tools & Supplies

The charges for books, tools and supplies are approximate charges and are subject to Pennsylvania sales tax where applicable. Prices may change without notice.

Aviation Maintenance Technology Program	\$2,355.00
Aviation Electronics Technology Program	\$2,144.00

FAA Certification

Graduates of the Aviation Maintenance Technician Programs are eligible to test for the FAA's Airframe & Powerplant certification. There are nine (9) examinations (3 oral, 3 practical, and 3 written) which the applicant must pass in order to achieve FAA certification. For those who wish, PIA is authorized by the FAA to administer exams. The current charge for all nine tests is \$945.00. This fee is subject to change with 30 days advance notice.

FCC Licensing Examination

The FCC General Radiotelephone Operator's licensing examination is given by PIA staff. The charge for the basic examination is \$60.00. The school reserves the right to change the fee for the FCC examination by notifying the student 30 days in advance.
